# Introduction

## Overview of UJ's SDG Strategy

The University of Jordan (UJ), established in 1962, is Jordan's oldest and largest university, located in Amman. UJ offers over 280 academic programs across 25 schools, including 102 undergraduate and 188 postgraduate programs (master's, doctoral, and diplomas), with 48 internationally accredited programs in fields like Medicine, Pharmacy, Engineering, and Business. UJ focuses on modernizing education through e-learning, interactive lectures, and smart classrooms to align with market demands. Hosting over 7,000 international students from 130+ countries, it fosters a diverse learning environment.

The University of Jordan has developed its strategic plan for the years 2022-2027 in accordance with a scientific methodology based on keeping pace with global academic, technological development, and sustainable goals, and aligning academic programs with the changing labor market.

The plan focuses on excellence in knowledge-producing scientific research that impacts sustainable development. UJ strategic plan (2022-2027) will emphasize and involve sustainability principles in its operations, wherever applicable and possible.

The University of Jordan is dedicated to integrating sustainability principles across its educational process, research activities, and community initiatives.

### The University of Jordan Strategic Plan (Sustainability part)

(2022-2027) The sustainability part of the University of Jordan strategic plan reflects our commitment to social responsibility and sustainable development. It outlines our vision, mission, values, strategic goals, initiatives, and performance indicators that will drive positive change in our teaching, community services, and research processes. Through this plan, we aim to enhance sustainability and make a significant impact on the local and global community.

Vision: A leading university in scientific, technological, economic, social, and cultural transformation, outstanding in performing its role in the development and modernization of the Jordanian state, and a pioneer in serving the local and global community.

Mission: To create an outstanding educational, learning, and research environment that stimulates creativity, innovation, and entrepreneurship, aiming to prepare individuals who are capable of contributing to sustainable development locally and globally.

Values: Our values guide us in our pursuit of excellence and social responsibility.

They include:

- Excellence
- Creativity, entrepreneurship, and innovation
- Diversity
- Civic engagement and social responsibility
- Good governance

#### Sustainability Strategic Goals

1. Good governance and modern management
2. Purposeful and motivating learning and teaching experience for students and a supportive environment
3. Knowledge-producing scientific research with impact on development
4. Effective societal role
5. Safe and stimulating university environment
6. Sustainable and impactful partnerships

#### Key Initiatives and Achievements in 2023

A major green renovation of the University of Jordan campuses is ongoing in its transition toward a sustainable campus. This renovation adopted the

three-tier approach to sustainable heating, cooling, and lighting of the buildings (i.e., energy conservation, energy efficiency, and renewable energy). Since 2019, The University of Jordan continues to make a huge improvement:

- The GHG in 2023 was reduced by 56% compared to 2019.
- Currently, 100 % of electricity demand is covered using solar energy. The largest on-grid (Net-metering) solar energy project in Jordan with a capacity of 16 MWac is installed on the rooftops and car parks of the university.
- 140,000 sqm of rooftops have been thermally insulated to adhere to the new thermal insulation codes in Jordan, and to conserve energy required for heating and cooling in buildings. Thousands of old fluorescent lamps have been replaced by energy savings units (LED).
- The University has prepared a techno-economic evaluation and tender documents for the electrification of the heating and cooling systems for four main buildings of the campus. While the GHG emissions dropped by 56% during the period 2019-2023, the carbon reduction target of the university by 2050 is to reach net zero emissions through a set of planned measures. This document presents a short overview of the key efforts done by the University of Jordan in its transition toward a sustainable campus both in its main branch, the Aqaba branch, and the Marine Science Station.

Table 1 Campus emissions inventory 2019-2023

reporting year		2019	2020	2021	2022	2023	Till 4 <sup>th</sup> April 2024
<b>Calculated emissions (mtCO2e)</b>							
<b>Emissions for Scope 1: Direct Emissions</b>							
	Diesel for Heating Plants (Liters of Diesel)	1,318,691	1,719,430	1,401,830	2,111,291	1,826,036	79,3450
	Calculated emissions (mtCO2e)	3,569	4,653	3,794	5,714	4,942	2,147
	Gasoline for Fleet Transportation (liters of gasoline)	47,669	31,802	42,956	44,000	46,808	12136
	Calculated emissions (mtCO2e)	111	74	100	102	109	28
	Diesel for Fleet Transportation (Liters of Diesel)	73,180	61,891	69,759	125,000	128,204	31,428.0
	Calculated emissions (mtCO2e)	197	167	337	337	346	85
	<b>scope 1 subtotal</b>	<b>3,877</b>	<b>4,894</b>	<b>4,230</b>	<b>6,153</b>	<b>5,396</b>	<b>2,260</b>
<b>Emissions for Scope 2: Purchased Utilities</b>							
	Electricity for Campus (GWh)	14.5	9.9	0.0	0.0	0.0	0.0
	Calculated emissions (mtCO2e)	8,381	5,722	-	-	-	-
	<b>scope 2 subtotal</b>	<b>8,381</b>	<b>5,722</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>

The University of Jordan has allocated approximately 14 million dinars, 10% of the university budget for 2023; for general maintenance and for classroom and general facilities renovation to develop the infrastructure and support educational facilities in alignment with international standards and digital learning.

- The University of Jordan has signed an agreement with a national recycling company funded by an international organization in order to facilitate the recycling initiatives at the University that includes waste segregation from the source, and improve solid waste management

practices and raising awareness among students, staff and faculty members.  
<https://sawtalhaq.com/article/80375>

- The University of Jordan has a dedicated committee whose sole responsibility is to advance sustainable development and identify priority issues related to sustainability. This includes developing instructions and policies, suggesting strategic objectives to be achieved through the implementation of the university's strategic plan, supervising the implementation of sustainability initiatives, and staying updated on national and international developments in sustainability. This is achieved through collaboration with concerned centers such as the Water, Energy, and Environment Center, the Local Community Networking and Development Center, the Center for Women's Studies, the Center for Strategic Studies, and the Innovation and Entrepreneurship Center.
- Due to the increased interest in achieving sustainable development goals, UJ has designated a faculty member with extensive experience as a Campus Sustainability Coordinator to advance sustainable development at UJ in order to do the following:
  - Proposing best practices for achieving sustainable development goals on campus.
  - Gathering data related to sustainable development and preparing regular reports.
  - Working towards achieving sustainable development goals on campus.
  - Serving as a central point of contact for inquiries, initiatives, and projects related to sustainability.
  - Establishing a database for all initiatives and projects that achieve sustainable development goals.
  - Monitoring progress in achieving sustainable development goals.

- Sustainability Committee Approval
- [https://offices.ju.edu.jo/ar/gco/Lists/Announcements/Disp\\_Form.aspx?ID=78](https://offices.ju.edu.jo/ar/gco/Lists/Announcements/Disp_Form.aspx?ID=78)
- The report will showcase the progress achieved for each of the Sustainable Development Goals, in addition to the areas that require follow-up and development in the coming year. It will highlight the accomplishments made and the challenges faced by the university, with the aim of developing strategies to improve performance and enhance efforts in areas that need greater attention in the future.

---

**Prof. Nathir Obeidat**  
**President of The University of Jordan**

---

**NATHIR MIFLEH MOHAMMAD OBEIDAT IS A JORDANIAN PHYSICIAN WHO CURRENTLY SERVES AS THE PRESIDENT OF THE UNIVERSITY OF JORDAN. HE HELD THE ROLE OF JORDANIAN MINISTER OF HEALTH IN BISHER AL-KHASAWNEH'S CABINET FROM OCTOBER 12, 2020, UNTIL HE STEPPED DOWN ON MARCH 14, 2021**

# 1 NO POVERTY

**SDG 1: No Poverty** is the first of the 17 Sustainable Development Goals established by the United Nations in 2015. This goal aims to end poverty in all its forms everywhere by 2030. It focuses on eradicating extreme poverty, defined as living on less than \$1.90 per day, and reducing the overall poverty rate by ensuring equal access to essential resources such as food, water, education, healthcare, and economic opportunities.

**The University of Jordan** plays an essential role in contributing to SDG 1: No Poverty by addressing poverty on multiple levels. As an educational institution, it recognizes the power of education as a transformative tool to lift individuals and communities out of poverty. The university's initiatives align with SDG 1 through:

1. The University of Jordan offers scholarships and financial aid, including scholarships, loans, grants, the student employment system, and the student support fund, to help underprivileged students access education.

- **Internal Grants (scholarships) and Loan Funds:**

- A. Royal Hashemite Court Grants: Full scholarship (except for the first semester).
- B. Grants for Schools in Poverty Pocket Areas: Full scholarship.
- C. Grants for Top Students in the Kingdom and Districts: Full scholarship.
- D. Student Support Fund Grants for Students from the Central and Northern Regions Studying at Southern Universities: Full scholarship.
- E. Student Support Fund Grants in Official Jordanian Universities: Up to 45 credit hours.

- **Grants: Types, Eligibility, and Application Process**

The University offers a variety of grants designed to support different student groups. These include:

- A. Al-Jasim Grants
- B. Grants for the Children of Teachers
- C. Military Grants
- D. Tribal and Less Privileged Grants
- E. Grants for Children of University Employees

Each grant is tailored to a specific group of beneficiaries, with distinct eligibility requirements. To apply, students must adhere to the university's specified guidelines and submission procedures.

**A. Al-Jasim Grant:** Al-Jasim means that you enroll in a parallel program at a public university, and later the Military Grant will cover your tuition fees.

You need to obtain a course registration form from the public university or a student admission letter stating that you have been accepted at this public university, along with a disability certificate for one of your parents indicating a disability rate of 40% or more. You submit these to the Military Culture Office. For the first semester, you pay the full tuition fees (which are refundable). After your transfer to Al-Jasim, the fees will be reimbursed, and you won't pay anything afterward, not even registration fees. Al-Jasim does not provide a monthly stipend of 20 or 25 dinars. However, after completing four years, any failed or retaken courses will be your financial responsibility.

The Military Culture Office will then send an official stamped book (letter) from the leadership to the public university where you were accepted in the parallel program. This book (letter) requests the university to transfer the student from the parallel program to Grant, which is referred to as the Grant for Children of Martyrs and Injured Military Personnel, allowing you to study in the parallel program funded by the Military Grant.

Any student whose father or mother is a martyr or an injured military personnel with a 40% or higher disability rate can apply only for the parallel program at public universities. If the student's grade is between 60 -65, they may still be accepted into a public university that accepts such grades, like Al-Hussein Bin Talal, Tafila, and possibly Al-Albayt and Mu'tah Universities. The parallel application for Al-Jasim is separate from the unified admission system, and if the student is accepted into the parallel program at a public university, they must pay the full amount (which is refundable).

**Important:** You can extend Al-Jasim Grants to complete your master's and PhD studies. Even if the female or male student gets married, Al-Jasim Grant remains valid until the age of 30. However, the Military Grant applies only until the age of 21, after which you will study at your own expense (through the regular competitive system).

### **B. Grant for the Children of Teachers:**

It is available to the children of teachers who are currently employed by the Ministry of Education, according to the provisions of Article 8/B of the Scholarship System for Children of Teachers.

The applicant must be of Jordanian nationality and have obtained a Jordanian General Secondary Education Certificate (Tawjihi) or its equivalent in the same academic year, in accordance with the applicable admission regulations.

It also applies to the children of seconded, unpaid leave, and assigned teachers according to the provisions of Article 8/B of the Scholarship System.

Children of retired teachers from the Ministry, and children of employees and retirees of the Ministry of Higher Education and Scientific Research, can also benefit, provided their previous service in the Ministry of Education is not less than 5 years.

The student must be no older than 21 years by the last day of December of the year in which they apply for the scholarship.

They must not have received a scholarship or grant from any other source or previously benefited from the provisions of the Scholarship System, and they must have good conduct.

1 NO POVERTY

**Important:** After the application period ends, a competitive selection process is conducted to determine the names of the students eligible for the Royal Grant designated for teachers' children, in cooperation with the Unified Admissions Coordination Unit, according to the approved regulations for this purpose.

Mission System for Children of Teachers in the Ministry of Education No. 20 of 2024 President

## Mission System for Children of Teachers in the Ministry of Education No. 20 of 2024

Mission System for Children of Teachers in the Ministry of Education No. 20 of 2024

Published on page 2028 of Official Gazette No. 5923 dated 4/18/2024

Article 1

This system shall be called (Scholarship System for Children of Teachers in the Ministry of Education for the year 2024) and shall be effective from the date of its publication in the Official Gazette

Article 2

The following words and phrases, wherever they appear in this system, shall have the meanings assigned to them below, unless the context indicates otherwise: Ministry: Ministry of Education. Minister: Minister of Education. University: The official Jordanian university. College: The university or intermediate college in the university. Mission: Covering the cost of studying for a student benefiting from the provisions of this system at the university or college at the expense of the Ministry to obtain a bachelor's degree or intermediate diploma. Higher Committee: The Higher Committee for Missions formed pursuant to the provisions of this system. Technical Committee: The Technical Committee for Missions formed pursuant to the provisions of this system. Student: Anyone who will benefit from the mission in accordance with the provisions of this system. Director: The Director of the Department of Cultural and Public Relations in the Ministry. Directorate: The Directorate of Missions in the Ministry

Article 3

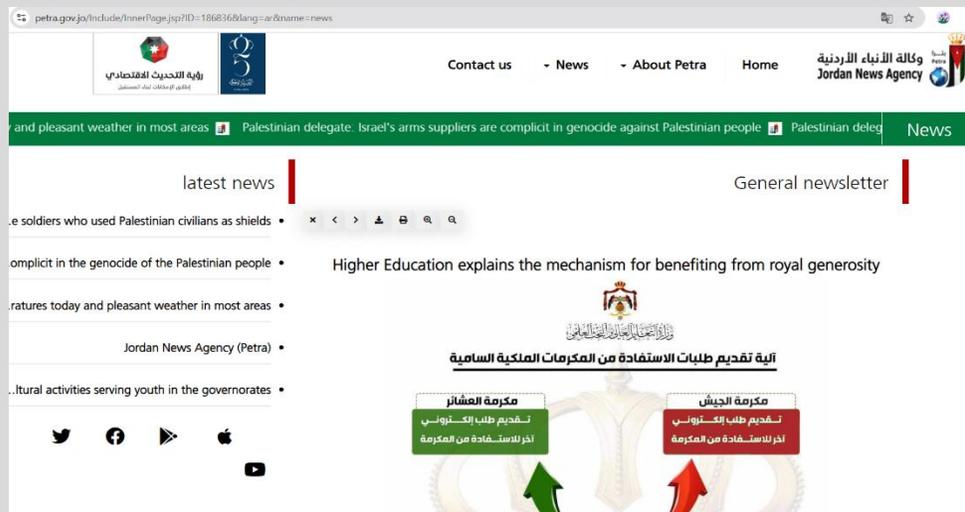

A. The provisions of this system apply to students accepted into official universities and colleges  
B. Despite what is stated in Paragraph (A) of this Article, students accepted into any Jordanian university established pursuant to a special law may be included

Article 4

A. A committee called the (Higher Committee for Scholarships) shall be formed in the Ministry, headed by the Minister and including the following as members  
The Secretaries-General of the Ministry .1  
The Director .2

### C. Military Grant:

The Military Grant allocates 20% of seats in any major. These 20% are distributed across the governorates of the Hashemite kingdom, with each governorate receiving a specific number of seats in each university program.

Competition for the Military Grant is within the same governorate. For example, students from Al-Mafraq compete only among themselves for the seats allocated to their governorate.

The selection process for the Military Grant is different, which means you may be accepted into a major higher than your grade, and you might not get a seat due to high competition in your governorate.

The Military Grant covers the tuition fees for the major, in addition to providing a monthly stipend of 20 dinars for the student.

You compete based on the governorate where your father was born (if he is the military personnel) or the governorate where your maternal grandfather was born (if your mother is the military personnel). For example, if you're from Al-Mafraq but your father was born in Amman, you compete for seats in Amman.

**Important:** The Military Grant does not add any points to your Tawjihi score.

#### **D. Tribal and Less Privileged Grant:**

The Royal Hashemite Grant for the children of tribes in Jordanian Badia schools and schools with special circumstances.

The student is required to submit a transcript of the Jordanian General Secondary Education Certificate Examination, or an authenticated copy, along with a payment voucher of five Jordanian dinars (obtained by the student from the post office, along with the application form and the special envelope).

The conditions include that the student must be a Jordanian citizen and must submit an application for admission to the Unified Admission Coordination Unit. The student must apply for the Grant according to the forms available at the designated Jordan electronic post centers.

The school certificate must be officially authenticated by the school administrations, proving that the student has spent the last two years in the schools covered by the Grant. If the student has transferred from a school covered by the Grant due to their parent's job relocation, they must provide proof from the workplace to benefit from the Grant, and the reasons for the transfer will be considered.

The student must be a regular student who has obtained the Tawjihi certificate in the same year they are applying for the Grant. Additionally, the student must have studied the last two

years at a school designated for less privileged areas and must have completed at least seven years of basic education at a school dedicated to this purpose (a school for less privileged areas). If the student transferred from this school, it must be for academic, social, or official reasons approved by the Higher Committee.

## Royal Grant for Tribal Children in Jordanian Badia Schools and Schools with Special Circumstances

### :Conditions for benefiting from the Royal Grant

- The student must be of Jordanian nationality
- The student must have previously submitted an electronic application for admission to the Unified Admission Coordination Unit before submitting an application to benefit from the Royal Grant
- The student must have obtained the Jordanian General Secondary Education Certificate for the current year only 2024, with regular study, and with a grade point average of no less than (65%)
- The student must have spent the last two academic years in the secondary school covered by the Royal Grant this year, or the student must have spent a period of no less than seven years in a primary school feeding the secondary school covered this year, and transferred from it for academic, social or official reasons approved by the Higher Committee
- The student must submit an application to benefit from the royal grant through the unit's website (benefit application submission software)
- Students who graduate from private schools do not benefit from this grant
- Private study students do not benefit from this grant

### :Required official documents

- A student who transferred from a school covered by the Royal Grant for the current year and was a child of government employees whose work required him to move from one governorate to another, and who did not complete the last two years specified in the conditions for benefiting from the Royal Grant, must bring a certificate from the guardian's employer stating the date of his transfer and the reason for the transfer, and upload it through the software for his request to be considered by the Higher Committee

admissions Policy Department

- General policies for university admission
- Minimum competitive rates for previous years
- Distribution of Jordanian high school students by grade point average and high school branch
- Royal Grant for Tribal Children in Jordanian Badia Schools and Schools with Special Circumstances
- List of schools covered by the Royal Grant for the sons of tribes in the Jordanian Badia and schools with special circumstances for the current year

Browse other sections of the site

## E. Grant for Children of University Employees

The beneficiaries are the children of employees at the University of Jordan and the University of Jordan Hospital.

The student purchases the application card for children of employees, and the admission results are announced after the unified admission results.

If the student achieves a semester academic GPA of "Good" or higher, i.e., 2.50 or above, 80% of the tuition fees will be refunded.

The most important condition is that the applicant's father or mother must be an employee of the University of Jordan or the University of Jordan Hospital.

The student pays the full registration fees, but for the major's credit hour fees, they pay half the price of the competitive admission rate. For example, if the hourly rate is 27 dinars for competitive students, the "Children of Employees Grant" student pays half the price, which is 13.50 dinars.

### Student Clinic

The department provides health care for students, including medical and dental treatment, laboratory tests and dispensing medications. Cases that require follow-up are referred to the university hospital. The department develops health education programs to prevent diseases, holds medical committees and approves medical reports issued outside the university. The department includes health clinics, dental clinics, an emergency department, a laboratory, and a pharmacy.

The department also contributes to spreading health culture and awareness among students of the University of Jordan, in addition to participating in social, sports and other health activities within the University of Jordan

UJ publishes many papers regarding SDG1 to support vulnerable communities and poverty reduction such as:

1. The study titled "Psycho-Social Determinants of Street Beggars: A Comparative Study in Jordan" by Ahmad Sa'ad Alsheikh Ali, Associate Professor at the Psychology Department, The University of Jordan, explores the growing global issue of begging, especially in urban settings. By surveying 117 beggars and 116 non-beggars, the research highlights psycho-social differences between these groups. It reveals that beggars tend to come from poor, disrupted families, while non-beggars exhibit better social conformity and decision-making, stemming from more stable backgrounds. The study aims to understand the underlying reasons behind begging.

### Psycho-Social Determinants of Street Beggars: A Comparative Study in Jordan

**Ahmad Sa'ad Alsheikh Ali**  
Associate Professor, Psychology Department  
The University of Jordan

**ABSTRACT**

The issue of begging is now an all-pervasive manifestation and isn't a bizarre situation for any nation anymore. It is a social issue that prevails in the urban territories of the majority of countries. As the practice of begging is permeating through the society at a breakneck pace, an investigation into this psycho-social phenomenon is the need of the hour. In the view of the growing demand of research in this context, the present study explores the psycho-social factors that differentiate the beggars from non-beggars, i.e., the psycho-social factors that distinguish beggars from others aimed at identifying how the mindset of beggars differs from healthy individuals. Structured questionnaires were distributed to a sample of 117 beggars and 116 non-beggars to explore and understand how the psycho-social behavior of these individuals differ from each other. The idea is to be able to explain the reason why people beg and the real motive behind the existence of begging. This study identified various psycho-social characteristics that differentiate beggars from healthy individuals. It came to surface that impoverished family background, disrupted families, and poor financial status are the major factors that distinguish the beggars from the non-beggars. Also, the factors such as social conformity and decision making were found to be higher in healthy individuals than the beggars who could be attributed to a secure financial and family background, and various learning life experiences.

**Keywords:** Beggars, Begging, Education, Family, Psycho-Social Determinants, Street Begging, Unemployment, Poverty, Financial Status.

**Introduction**

Begging is not a regional issue; instead, it is a global problem that requires more attention. It could be observed that in the urban areas of every country in the world, begging is noticeable, making it an alarming urban issue. Although it is more pronounced in third-world countries, the problem of begging is a definition provided by MOLSA (1992) for begging is: "a method of earning one's living from the income obtained by others using age, health and economic condition as a means for gaining sympathy." Thus it is poverty that buds out to beg (Asrese, Tilahun, & Mekonnen, 2014).

Beggars are the most deprived group of the

2. The research by Lubna Sameer Khalaf and Nahil Ismail Saqfalhait investigates the impact of Micro-Finance Institutions (MFIs) on economic growth in six Arab countries from 1999 to 2016. Utilizing a panel data model, the study finds that MFIs do not significantly contribute to economic growth in these countries. The authors highlight the implications of their findings for policymakers and stakeholders, suggesting that improved regulations and strategies could enhance the microfinance sector's role within the broader financial system in Arab nations.

3. The study by Adnan M. Rawashdeh and colleagues examines the relationship between transformational leadership, job satisfaction, and employee performance in Jordan's telecommunications sector. Using data from 278 employees collected through a self-administered questionnaire and analyzed via structural equation modeling (SEM), the researchers found that transformational leadership positively impacts both job satisfaction and employee performance. Additionally, job satisfaction was shown to significantly mediate the relationship between transformational leadership and employee performance. The study provides valuable insights into these dynamics within a developing country context, though the authors caution against generalizing the findings to other countries.

---

The purpose of this study was to investigate the effect of transformational leadership on employee performance via job satisfaction in telecommunication sector, Jordan. Self-administered questionnaire was used to collect data from 278 employees. Structural equation modeling (SEM) via The Analysis of Moment Structures, i.e., IBM AMOS 22 was applied to test hypotheses. The findings show that transformational leadership was significantly and positively associated with both job satisfaction and employee performance. Furthermore, job satisfaction had a significant relationship with employee performance. Consequently, the results underlined a significant mediation effect of job satisfaction in the interaction between transformational leadership and employee performance. This research provides empirical evidence of the interaction between transformational leadership, job satisfaction and employee performance in a key industry in a developing country, Jordan. Finally, this study was conducted in telecommunication sector in a developing country, Jordan, therefore, the results cannot be generalized across countries.

- **Partnerships for Development:**

The University of Jordan fosters partnerships for development by collaborating with NGOs, government, and international organizations to tackle issues like unemployment, education, and resource access. A key initiative in this effort is a program funded by the European Commission, which allows undergraduate and graduate students to study courses and enables doctoral students to conduct part of their research at European universities through bilateral Erasmus+ agreements. This student exchange program adheres to the university's degree-granting guidelines and provides grants that cover monthly allowances and travel contributions, while students must secure health insurance for their stay at host institutions.

The screenshot shows a web browser window displaying the University of Jordan's website. The URL in the address bar is 'offices.ju.edu.jo/en/oir/lists/erasmusplus/alluni.aspx'. The page header includes the university's logo and name, 'THE UNIVERSITY OF JORDAN Qs', and navigation links for 'Employee Portal', 'Students Portal', 'Library', 'Alumni', and 'Arab'. A search bar is located on the right side of the header. Below the header is a dark blue navigation menu with links for 'Home', 'People', 'Scholarships', 'Agreements &amp; MOU's', 'Exchange', 'SYLFF Fellowships', 'ERASMUS+ Mobilities', 'Study Abroad', and 'ERASMUS+ ICM Partners'. The main content area features a white box with the title 'ERASMUS+ International Credit Mobility - Students' and a sub-section titled 'Erasmus+ Academic Mobility Programme'. The text describes the program as being funded by the European Commission, allowing students to study or conduct research at European universities. It mentions that grants cover monthly allowances and travel tickets. To the right of the main content is a sidebar with the logo of the International Affairs Unit (IAU) and the text 'International Affairs Unit International Relations Department'. Below this is a 'Photo Gallery' section with several small images showing people and events.

## Challenges and Areas of Improvements

**The University of Jordan** is deeply committed to enhancing support for its students and alumni, with a focus on addressing financial and professional challenges. It plans to provide financial aid to students whose living conditions have worsened, including those from low-income families and international students facing economic hardships, ensuring they can continue their studies. The university also aims to connect graduates with employment opportunities aligned with their majors and is actively building collaborations with organizations, firms, and global institutions to increase alumni employability and provide students with training opportunities. These partnerships will allow students to gain practical experience, earn financial support, and establish valuable connections while studying.

Additionally, the university is working to create entrepreneurial opportunities by setting up booths for students to showcase and sell their products and projects within the campus. It also seeks to launch community-based philanthropic initiatives to secure funding and essential materials to further support its students. These efforts aim to provide a holistic educational experience, equip students with real-world skills, and prepare them for future success while fostering a sense of community and collaboration.

**SDG 2 (Zero Hunger)** envisions a world where no one goes to bed hungry, while also protecting the planet. It aims to nourish every person through sustainable farming practices that not only boost food access but also safeguard the environment. By promoting resilient agriculture, it ensures future generations can thrive with nutritious food, without harming ecosystems.

The University of Jordan seeks to achieve collaboration in research, exchange academic and scientific expertise, and advance areas like halal food production, agricultural research, and food manufacturing. The university aims to strengthen partnerships, develop joint research projects, and enhance its capabilities through cooperation with global institutions.

The University of Jordan's Faculty of Agriculture hosted a workshop on water and irrigation management in collaboration with the University of California, AARINENA, and FAO, discussing advancements and promoting future cooperation in agriculture and water resource management.

A screenshot of the University of Jordan's website. The top navigation bar includes 'University website', 'Jobs and assignments', and 'English'. Below this is a secondary navigation bar with 'English', 'Media', 'News Archive', 'Activities', 'Aqaba branch', 'University News', and 'Home'. The main content area features a news article titled 'Advances in Water Resources and Irrigation Management in California and Jordan'. The article includes a photo of a speaker at a podium in front of an audience. The date '20 - Oct 2024' is displayed in a yellow box. The article text reads: 'The University Of Jordan Holds A Workshop On Water Resources Management And Irrigation In Cooperation With The University Of California And International Organizations'. The website also has a 'Related News' section on the left with three items: 'Jordanian: Scholars and thinkers discuss promoting values in university education', 'The University of Jordan and the Jordan Securities Commission sign a memorandum of understanding to develop joint cooperation', and 'Workshop for faculty members at the College of Educational Sciences'. The footer of the page shows the date '2024'.

### A Delegation From Chulalongkorn University In Thailand Visits The Faculty Of Agriculture At The Jordanian University

Jordan University News (AJA) - Dean of the Faculty of Agriculture at the University of Jordan, Dr. Ayed Al-Abdallat, discussed with the founding director of the Halal Sciences Center at Chulalongkorn University in Thailand, Dr. Winai Dahlan, and the accompanying delegation, ways of joint cooperation in the fields of research related to halal food manufacturing

During the meeting, the prospects for future cooperation between the two sides were discussed, as well as the possibility of exchanging academic and research expertise in the fields of food manufacturing, halal food, and the standards adopted in this field in Jordan, and the possibility of conducting joint research in this vital field

- **The University of Jordan has published numerous articles focusing on sustainable agriculture, soil health, and food security. Such as:**
  1. The article "**Soil Health and Sustainable Agriculture**", co-authored by Monther M. Tahat from the Department of Plant Protection and Yahia A. Othman from the Department of Horticulture and Crop Science at The University of Jordan, explores the crucial role of soil health in sustainable farming. It highlights how microbial diversity supports key ecosystem functions like nutrient recycling and greenhouse gas removal. The article discusses how organisms such as mycorrhizal fungi, cyanobacteria, and nematodes enhance soil productivity and plant resilience. It also compares farming practices, emphasizing that while organic farming and conservation of tillage improve soil health, they come with varying costs and benefits for farmers. The review focuses on the impact of crop management on maintaining soil health for sustainable agriculture.

### Abstract

A healthy soil acts as a dynamic living system that delivers multiple ecosystem services, such as sustaining water quality and plant productivity, controlling soil nutrient recycling decomposition, and removing greenhouse gases from the atmosphere. Soil health is closely associated with sustainable agriculture, because soil microorganism diversity and activity are the main components of soil health. Agricultural sustainability is defined as the ability of a crop production system to continuously produce food without environmental degradation. Arbuscular mycorrhizal fungi (AMF), cyanobacteria, and beneficial nematodes enhance water use efficiency and nutrient availability to plants, phytohormones production, soil nutrient cycling, and plant resistance to environmental stresses. Farming practices have shown that organic farming and tillage improve soil health by increasing the abundance, diversity, and activity of microorganisms. Conservation tillage can potentially increase grower's profitability by reducing inputs and labor costs as compared to conventional tillage, while organic farming might add extra management costs due to high labor

2. The article "[Farming System and Sources of Organic Matter: Influence on Soil Health, Yield, and Head Quality of Globe Artichoke](#)", co-authored by Yahia A. Othman from The University of Jordan and Daniel I. Leskovar, examines how organic farming impacts soil health, yield, and quality of globe artichoke. Two experiments, conducted over two growing seasons, compared organic and conventional farming systems and evaluated plant- vs. animal-based fertilizers. Organic farming improved soil health significantly, with higher levels of chlorogenic acid and cynarin in artichoke heads, though marketable yield was lower than in conventional systems. The study also found that plant-based fertilizers like alfalfa meal increased soil respiration and phytochemical concentrations compared to animal-based fertilizers.

 ISHS Acta Horticulturae 1284: X International Symposium on Artichoke, Cardoon and Their Wild Relatives

## Farming system and sources of organic matter: influence on soil health, yield, and head quality of globe artichoke

**Authors:** Y.A. Othman, D.I. Leskovar  
**Keywords:** *Cynara cardunculus*, chicken manure, fish meal, blood meal, alfalfa meal, chlorogenic acid, cynarin  
**DOI:** [10.17660/ActaHortic.2020.1284.12](https://doi.org/10.17660/ActaHortic.2020.1284.12)

**Abstract:**  
 Organic farming systems contribute to enhance food security and agricultural sustainability, with the potential to increase farmer's income when external input costs are reduced. Two experiments were conducted to evaluate the influence of organic farming on soil quality (respiration-CO<sub>2</sub>), yield and head quality (chlorogenic acid and cynarin concentration) of globe artichoke (*Cynara cardunculus*). Both experiments were conducted over two growing seasons, October 2014 to June 2016. In the first experiment, we compared organic and conventional farming systems while organic matter fertilizer source (plant- vs. animal-based) evaluation was considered in the second experiment. For the first experiment, eight cultivars were used; 'Deserto', 'Lulu', 'Romolo', '11-018', '12-179', 'Green Globe Improved' and 'Imperial Star'. The cultivar '12-179' was used for the second study in order to screen plant-based (alfalfa meal) and animal-based (fish meal, blood meal, and chicken manure) fertilizers for soil health, yield and head quality. Conventional farming had higher plant marketable yield compared to organic. Conversely, artichoke head from organic farming had 31% chlorogenic acid and 12% cynarin higher than conventional system. Interestingly, organic farming improved the soil health indicator (respiration-CO<sub>2</sub>) by 20-fold compared to conventional. Although cultivar response to soil farming system treatments was inconsistent across the study period (2015-2016), 'Imperial Star' had the lowest marketable yield and head quality. After two years of organic soil amended with animal-based fertilizers, marketable yield was higher than soil amended with plant-based fertilizer. However, alfalfa meal (plant-based) organic fertilizer increased soil respiration by about 3.5-fold compared to animal-based (fish meal, blood meal, and chicken manure) organic fertilizers at the end of the experiment. In addition, concentrations of phytochemicals (chlorogenic acid and cynarin) in artichoke heads grown in soil amended with alfalfa meal were higher than in those grown with animal-based fertilizers.

3. The study "[Assessing Soil Chemical Properties and Soil Respiration Amended with \*Sesbania grandiflora\*](#)", co-authored by Yahia A. Othman from The University of Jordan, investigates the effect of the leguminous crop *Sesbania grandiflora* on soil nutrients and respiration in organic farming. Conducted over two years, the study found that while soil respiration, particularly in the topsoil, increased significantly, nutrient levels such as nitrogen, phosphorus, and potassium did not show notable improvement compared to baseline levels. The findings highlight that *Sesbania grandiflora* enhances soil respiration but may not substantially boost nutrient content.

← → ↻ actahort.org/books/1286/1286\_9.htm ☆ ⬇️ 🌱 ⋮

 ISHS Acta Horticulturae 1286: XXX International Horticultural Congress IHC2018: II International Symposium on Organic Horticulture for Wellbeing of the Environment and Population

## Assessing soil chemical properties and soil respiration amended with *Sesbania grandiflora*

**Authors:** Y.A. Othman, D.I. Leskovar  
**Keywords:** nitrogen, microorganism, soil health, organic farming, organic matter  
**DOI:** 10.17660/ActaHortic.2020.1286.9

**Abstract:**  
 The objective of this two-year study was to assess the influence of using a leguminous crop, *Sesbania grandiflora*, on soil nutrient levels (NO<sub>3</sub>, P, K, Ca<sup>2+</sup>, Mg<sup>2+</sup>, Na and S), pH, EC, soil organic matter (OM) and respiration. *Sesbania* seeds were planted in a certified organic field in March at a planting density of 50 kg ha<sup>-1</sup> in 2015 and 90 kg ha<sup>-1</sup> in 2016. In order to determine soil chemical analysis, soil cores were collected from the topsoil layer (0-20 cm) prior to the experimental period in February, 2015, and from 3 soil depths (0-20, 20-40 and 40-60 cm) at the end of 2015 and 2016 growing seasons. Except for soil OM %, soil nutrients (NO<sub>3</sub>, P, K, Ca<sup>2+</sup>, Mg<sup>2+</sup>, and S) and pH were higher in 2015 than 2016. In both years soil P, K, Mg<sup>2+</sup>, OM% and respiration in the topsoil layer (0-20 cm) was higher than at deeper soil depths (20-40 and 40-60 cm). Conversely, soil Ca<sup>2+</sup>, S, and Na in the 40-60 cm soil layer were higher than in the topsoil (0-20 cm). No significant differences were found in soil pH, EC and NO<sub>3</sub> across soil layers during the study. Additionally, shoot NO<sub>3</sub> and total N concentration during the flowering period was similar across both years. Shoot NO<sub>3</sub> was 415 and 425 ppm, and total N was 2.98 and 3.06%, in 2015 and 2016, respectively. Interestingly, soil respiration in the topsoil (0-20 cm) increased slightly in 2015, but by 9-fold in 2016 as compared to the baseline level measured in February, 2015. In addition, soil respiration in the 20-40 cm and 40-60 soil depth was 39 and 50% lower than the topsoil (0-20 cm) at the end of the experiment in July 2016. Overall, this study revealed that organic soil amendment using *Sesbania grandiflora* significantly improved soil respiration, but did not potentially enhanced nutrient levels compared to the baseline soil.

- **University of Jordan Food and Nutrition Service Department & The Restaurants and Canteens Department:**
  - **The Food and Nutrition Services Department** at the University of Jordan works towards achieving sustainable nutrition goals, particularly SDG 2 (Zero Hunger), by measuring and reducing food waste. In 2022, they recorded 10 metric tons of food waste, and by 2024, UJ restaurants measured about 9 metric tons of food leftovers. The department also provides healthy Salads and herbal drinks for vegetarian and vegan food, balanced meals at affordable prices for all visitors, with subsidized rates for students, making them lower than both employee meal prices and those of external restaurants. The meals are diverse, nutritionally balanced, and cater to various dietary preferences, including healthy, vegan, and vegetarian options.

### The Restaurants and Canteens Department

It constitutes a vital part that holds the responsibility of providing food and beverage services for university students, the academic and the administrative staff, and its guests in order to promote these distinctive and quality services for the various domestic sectors. By this; the university maintains a decent level in staying at the forefront of leading Jordanian society organizations. It is worth mentioning that the services offered by this department have been expanded and the department performance has been improved in terms of its provided quality of services provided. The department It includes the main restaurant, which offers meals (breakfast and lunch) with its multiple halls, as well as the breakfast during the Holy Month of Ramadan for the university students and home interiors (female students), and the receptions and honor parties held by the university for its guests and participants at various conferences, workshops, on campus seminars, and officials and non-officials visitors to the university officials and non-officials from both inside and outside Jordan. Also, available on campus, a number of cafeterias distributed among students gathering sites that offer sandwiches, snacks, confectionery, pizza, desserts, hot and cold drinks. The department helps students during concerts and special events. The public services to students prices have been reduced some of the fast rate to half a dinar and some types of sandwiches to only 150 fils; a direct support for student meal. The university presents an annual support for students' food service and drink at the cost prices only, regardless of profit; and sometimes even less than the cost.

 THE UNIVERSITY OF JORDAN  University Schools Admissions Research Administrative Portals 

- The Dairy Processing Unit at the University of Jordan produces a range of dairy products, including labneh, liquid milk, pasteurized milk, and pasteurized cheese. The milk used in production is supplied by the Agricultural Research Station, in collaboration with the School of Agriculture, which also provides training programs for students at the university's farm located in Jordan's Valley.
- The School of Agriculture at UJ is recognized for its ongoing engagement with employers, food producers, and farmers, exemplified by the annual Graduation Day event, which includes an agricultural exhibition. This event is held in the second semester to honor graduating students. The school organizes periodic meetings with industry stakeholders, allowing them to participate in committees focused on training and curriculum development. The Institute of Agricultural Research, Training, Extension, and Education supports local farmers and food producers by facilitating knowledge transfer through various events and training courses. Additionally, contributions to University of Jordan Radio provide guidance, while the school hosts Scientific Day activities to further strengthen connections with the agricultural community.

## University of Jordan / Department of Agricultural Stations

The Agricultural Stations Department is located in the central Jordan Valley (Deir Alla), an area about 370 meters below sea level and an area of 856 dunums. It is considered one of the main and important facilities at the university due to its fundamental role in completing the message and strategy of the College of Agriculture in particular and the University of Jordan in general, as it represents the field for students of the College of Agriculture and a fertile investment environment.

The University of Jordan established the Agricultural Stations Department in 2019 in order to achieve the lofty royal vision and focus on the challenges facing the agricultural sector and support farmers and investment in the agricultural sector to obtain additional income that supports the university, as the area used to train students does not exceed 5% of the area of the Agricultural Stations Department and includes the following branches and stations:

The Jordan Valley Branch is located in the central Jordan Valley, (50) km west of Amman, with an area of (856) dunums, and the Dajani Station for Tropical and Subtropical Crops Research in the Ramah area, with an area of (50) dunums - Al-Muwaqqar Dry Lands Division, with an area of approximately (2000) dunums -

مستشفى الجامعة الأردنية  
August 1, 2022

بالتعاون مع المؤسسة العامة للغذاء والدواء ورشة عمل حول "سلامة الغذاء والأمراض المنقولة بالغذاء" في مستشفى الجامعة

عقد مستشفى الجامعة الأردنية ممثلاً بـمكتب التعليم والتدريب والتطوير وبالتعاون مع المؤسسة العامة للغذاء والدواء، اليوم الاثنين، ورشة عمل تدريبية حول "سلامة الغذاء والأمراض المنقولة بالغذاء"، استهدفت كوادر معنية من شعبة التغذية في دائرة الخدمات الفندقية ومستودع التموين في دائرة العطايات والتزويد، وذلك ضمن الخطة السنوية لتدريب الكوادر العاملة في المستشفى.

وتضمنت الورشة محاضرتين الأولى قدمتها المهندسة لانا الجعفري، تناولت خلالها عدة محاور حول سلامة الغذاء وأهمية نظمها وأنواع المخاطر الملونة للغذاء، وبرامج الرقابة الذاتية والإجراءات اللازمة لتحقيق سلامة الغذاء خلال الشراء والاستلام والتخزين وتحضير وتقديم الغذاء وكيفية التخلص من بقايا الطعام.

فيما سلطت الدكتورة هلا الخزعلي الضوء في المحاضرة الثانية على الأمراض المنقولة بالغذاء من حيث عيها ومسبباتها ومتغيرات النظام الداخلي للمنشأة الغذائية والعوامل البيئية التي تؤدي إلى التلوث.

من جانبها أكدت مساعد مدير عام المستشفى لشؤون التعليم والتدريب والتطوير الدكتورة زنده فرح، على أهمية مثل هذه الورشات والتي تهدف إلى إطلاع الكوادر ذات العلاقة على آخر المستجدات ولا سيما في مجال سلامة الغذاء حفاظاً على سلامة المرضى ومنع تلوث الأغذية التي قد تؤدي لحالات التسمم الغذائي، مثنية جهود المؤسسة العامة للغذاء والدواء المبدولة في سبيل تقديم التوعية والتثقيف الصحي وتعزيز مستوى الوعي وتقديم الإرشادات التوعوية ذات العلاقة.

- The University of Jordan organizes numerous seminars focused on addressing water scarcity and agricultural pest management, providing guidance on how to take effective action. These seminars also aim to fully prepare agricultural students for the workforce. Additionally, UJ actively facilitates field training opportunities for its students and ensures that partnerships and agreements are made strategically, benefiting all parties involved. Furthermore, UJ and its students actively participate in international agricultural support projects, which are advantageous both for the university and for Jordan as a country.

- The University prioritizes the purchase of products from local, sustainable sources and provides access to its versatile facilities—such as labs, technology, and plant stocks—to local farmers and food producers, aiming to improve sustainable farming practices. The Department of Nutrition and Food Processing actively contributes to this effort. Additionally, the College of Agriculture has achieved several milestones, including organizing scientific trips for students from various departments to visit farms, and hosting a career day for agricultural students. These initiatives, along with ongoing collaborations with the local community, underscore the university's commitment to sustainability and the development of agricultural practices.

### About The Department

The Department of Nutrition and Food Processing at the University of Jordan is the first academic department in this field of specialization in the Hashemite Kingdom of Jordan. It is also one of the oldest academic departments in the Arab countries. It was established in 1980 with a bachelor's program bearing the name of the department at the time, from which more than 1,700 students graduated.

Since the beginning of the academic year 2007-2008, the study plan has been developed to include two separate bachelor's programs in the department, one in Human Nutrition and Dietetics and the other in Food Science and Technology. A master's program was established in the department in 1988 and a doctoral program in 1996. More than 200 students have graduated from these two ...programs. More

A Scientific Trip For Students Of The Animal Production Department To Dairy Farms In Al-Dhulayl

Yesterday, Saturday 11/23/2019, the students of the Dairy Farm Management course in the Animal Production Department, organized by the course instructor, Prof. Dr. Mufid Al-Nimr, and accompanied by M.Z. Ahmed Shamoan, visited two dairy farms in the Al-Dhulayl area in Zarqa

The herd nutrition officer, Eng. Moamen, also explained how to prepare feed mixtures and provide them to each section of the herd. He also gave the students a clear picture of the automated milking parlor and the importance of managing it in a dairy farm

## 2 ZERO HUNGER

### Challenges and Areas of Improvements

**The University of Jordan** envisions transforming its campus into a hub of sustainable and nutritious food practices while addressing student needs. The university plans to establish specialized healthy food outlets, including restaurants for herbal drinks, fresh fruit juices, vegetarian salads, and nutritious meals. It aims to integrate pharmacies and nutritionists on campus to guide students on healthy dietary practices. Creative student chefs will be encouraged to showcase their culinary talents through affordable bazaars. Additionally, food assistance programs, including meal plans and food banks, will ensure no student faces hunger.

Campus agriculture initiatives are also a priority, with plans to establish student-led farming and hydroponic projects that grow fresh produce on-site. The long-term vision includes creating university-owned farms producing diverse agricultural goods, such as crops and livestock, to supply university cafeterias and restaurants. Through community partnerships with local farmers, NGOs, and global collaborations, the university seeks to promote sustainable agriculture, food security, and educational campaigns highlighting healthy eating and environmental impact. These initiatives collectively aim to foster a resilient, self-sustaining, and food-secure campus community.

## 3 GOOD HEALTH AND WELL-BEING

**SDG 3: Good Health and Well-being** aims to ensure everyone has the opportunity for a healthy life. It focuses on fighting diseases, promoting mental health, and providing universal access to quality healthcare.

**The University of Jordan** plays a vital role in this mission. Through its strong medical programs and commitment to community care, the university trains future healthcare leaders and directly impacts public health and well-being. It's where education meets impact, contributing to a healthier, more sustainable future.

- The University of Jordan (UJ) collaborates with local, national, and global health institutions, including the Ministry of Health, Red Cross, and King Hussein Cancer Center, to improve health and well-being. Joint projects include the Yale-UJ Addiction Medicine Training Program and a Multidisciplinary Diploma on Art Therapy. UJ's Water, Energy, and Environment Center analyzes water and wastewater for hospitals. UJ is also planning to establish a Public Health Institute, supported by discussions with healthcare experts, to focus on research, training, and advanced public health programs.
- The University of Jordan actively supports this mission through numerous strategic agreements with national and international health organizations. These partnerships strengthen medical programs, expand healthcare access, and drive impactful initiatives, ensuring the university contributes effectively to achieving SDG 3 and building a healthier, more sustainable future.

# 3 GOOD HEALTH AND WELL-BEING

## The University of Jordan and its partnerships and agreements with national and international health organizations:

A.” The University of Jordan” and “ the University of California” signed an agreement to The University of Jordan and the University of California signed a memorandum of understanding to enhance academic and research cooperation in agriculture and natural resources. The agreement, signed by UJ President Dr. Nazir Obeidat and UC representatives, aims to launch joint research programs, improve agricultural extension services, exchange knowledge and technology, and provide training opportunities. Both universities emphasized the importance of this collaboration in addressing agricultural challenges in Jordan and developing sustainable solutions. The agreement also includes plans for joint seminars, scientific exchanges, and collaborative research projects.

### Director's Word

The Institute of Public Health at the University of Jordan was established in response to the health and epidemiological challenges facing Jordan and the region. The Institute aims to support the Middle East and North Africa region in epidemiology, preventive medicine, health promotion, disease control and prevention, and the provision and management of early detection projects, disease registries, patient support programs, health economics and information technology evaluation.

We have placed epidemiological and clinical research among our main priorities. The Institute began offering a range of postgraduate programs and continuing medical and professional education programs, in addition to providing consultations and research projects according to priorities in Jordan and the region. This Institute is a platform for all researchers and experts from the region. The Institute, through scientific and technical committees, provides scientific support for any initiative that would contribute to improving health care and disease prevention in the Middle East

وفد يمثل المجلس العربي للاختصاصات الصحية يزور مستشفى الجامعة الأردنية

التقى مدير عام مستشفى الجامعة الأردنية الأستاذ الدكتور نادر البصول، اليوم الأحد، وفداً يمثل المجلس العربي للاختصاصات الصحية برئاسة الأستاذ الدكتور راشد العبري، وتأتي هذه الزيارة بهدف تجديد اعتماد (25) برنامج لفايات تدريب الأطباء تحت مظلة المجلس العربي.

ورحب البصول بالوفد الزائر مؤكداً حرص المستشفى على ترجمة رؤيته التي تركز في جوهرها على أن يكون قُدوةً وداعماً للتعليم والتدريب والتطوير محلياً وعربياً وعالمياً، مع الحرص الكامل على وضع أعلى معايير للتعليم الطبي وخلق فرص للتطوير المهني المستمر ومواكبة التطورات في هذا المجال، وتزويد المتدربين الطين بتجربة استثنائية لخلق أطباء أميين وشخصيات في المستقبل، مبيّناً بأن المستشفى يحتضن عدداً من برامج الزمالة المعترف بها كالجراحة العامة والجراحة العصبية وجراحة الفم والوجه والفكين والأمراض الباطنية والأمراض الجلدية والتناسلية وطب العيون وجراحاتها والتخدير والعناية الحثيثة لكبار السن وطب الطوارئ وطب الأسرة وأمراض النساء والولادة وعلم الأمراض التشريحي وغيرها من البرامج.

وأشاد البصول بمستوى الأطباء خريجي المؤسسات الصحية الأردنية والأخصائس الجامعة الأردنية المصنفة في الترتيب (368) على مستوى العالم حسب آخر تصنيف لمنظمة "كو إس" للجامعات العالمية للعام 2024، لافتاً إلى سعي المستشفى الدائم لأن يكون البورد العربي جزءاً من منظومته وذلك لتعزيز القادة للمقيمين غير الأردنيين لتقديم خدماتهم الطبية في بلادهم بشكل رائد بعد انتهاء فترة إقامتهم.

واستعرض البصول، بعض الإحصائيات والأرقام التي تُبين حجم العمل في المستشفى بالإضافة إلى إحصائيات تُبين أعداد الطلبة الخريجين في برامج الاختصاص العالي في الطب وطب الأسنان على مدار العشرين عام السابقة.

من جانبه، ثمن الأستاذ الدكتور راشد العبري باسمه وباسم الوفد الزائر جهود الجامعة الأردنية ومستشفياتها ودورها الرائد والقيادي في مجال التدريب لمختلف المهن والاختصاصات الصحية من خلال برامج التطوير المهني المستمر واستشراف مستقبل المهن الصحية وأنماط الممارسة في الاختصاصات الصحية بما يواكب التطورات، مشيداً بالمشاركات الفاعلة لأعضاء الهيئة التدريسية في كلية الطب في الجامعة الأردنية ولجان الامتحان ولجان التقييم والتدريب ولجان التطوير المهني وذلك تجسيدا للتعاون والتكامل في مجال التدريب بين المجلس والمؤسسات والكليات الصحية.

ولفت العبري، إلى تمزُّج مستوى التدريب في مستشفى الجامعة بصفتها حاضنة طبية وتعليمية وأكاديمية مميزة تسعى لتقديم خدمات طبية رائدة عن طريق تأهيل اختصاصيين في المجالات الصحية ذوي كفاءة مهنية وعلمية وفق المعايير والمتطلبات العالمية، حالها كحال باقي مؤسسات الوطن الصحية.

وحضر اللقاء نائب مدير عام المستشفى للشؤون الطبية الأستاذ الدكتور سامي أبو حلوة والشؤون الإدارية الدكتور أمجد بني هاني ومساعد مدير عام المستشفى للشؤون التعليم والتدريب والتطوير الدكتور زينة فرح وعدد من مدراء الدوائر الطبية ورؤساء البرامج التدريبية في المستشفى.

- The University of Jordan actively engages in outreach programs to enhance health and well-being in the local community, focusing on disadvantaged groups and refugees. These initiatives include student and staff volunteering efforts, free medical days, and awareness campaigns on various health topics like nutrition, hygiene, and disease prevention. The School of Medicine, Nursing, Dentistry, Pharmacy, and Rehabilitation Sciences lead many of these projects, which often involve direct community education and support, such as visits to local health care institutions and schools. Notably, the university offers a Professional Diploma in Refugee and Forced Migration Studies, which includes specialized outreach projects tailored for refugee communities. Events like health awareness initiatives also take place on campus and in public spaces, reinforcing the university's commitment to community health and well-being.

The University of Jordan's Faculty of Nursing held a health event titled "Be the Spring in Their Autumn" for International Day of Older Persons. Dean Dr. Areej Othman emphasized the importance of supporting seniors in all aspects of life. The event covered topics like seniors' rights, nutrition, preventive care, and diseases like Alzheimer's and depression. This initiative is part of a series of awareness activities aimed at addressing the challenges faced by older adults, involving third- and fourth-year nursing students.

## President of the University of Jordan Oversees Operations and Inaugurates Medical and Educational Projects:

1. Dr. Nathir Obeidat, President of the University of Jordan, conducted an inspection tour of the Financial Affairs Unit and the student clinic, where he reviewed the blood donation campaign in collaboration with the Ministry of Health. During the visit, he met with staff and emphasized the importance of continuous development, automation, and speeding up transaction processes to provide advanced electronic financial services. Obeidat acknowledged the unit's crucial role in managing financial operations like revenues, expenses, and salaries. This visit aligns with the university's commitment to monitoring its facilities and ensuring efficient operations.

## Achievements

The University of Jordan Hospital has received the Joint Commission International (JCI) accreditation for the fifth consecutive time in medical care, education, and research, lasting three years with no observations. Hospital Director Dr. Nader Al-Basoul praised the staff's exceptional efforts and emphasized the accreditation's significance for the healthcare sector. The hospital, first accredited by JCI in 2010, is recognized as a global medical and academic research center. Al-Basoul also thanked the team for their dedication in achieving this milestone.

The screenshot shows the news page for the University of Jordan. The URL is [news.ju.edu.jo/Lists/News/Disp\\_FormNews1.aspx?id=1261#](https://news.ju.edu.jo/Lists/News/Disp_FormNews1.aspx?id=1261#). The navigation bar includes links for "University website", "Jobs and assignments", and "English". The main header features the university's name in Arabic "أخبار الأردنية" and a logo. A "Related News" section on the left lists three articles: "Jordanian University receives the official report on the King Abdullah II Award for Excellence and Transparency", "President of the University of Jordan mourns the death of student Hanin Zakaria from the Faculty of Sports Sciences", and "Dr. Nidal Nasirat from the Faculty of Arts participates in the Arab Music Conference - at the Egyptian Opera House". The main content area displays a large image of a gold JCI accreditation certificate with the text "JOINT COMMISSION INTERNATIONAL" and "QUALITY APPROVAL". A date overlay indicates "03 - Jun 2024". Below the image, the text reads: "Jordan University Hospital Obtains The JCI Accreditation Certificate For The Fifth Time In The Field Of Medical Care, Medical Education And Scientific Research".

## Achievements

The University of Jordan's nursing program has been awarded an eight-year renewal of its international accreditation by the Accreditation Commission for Education in Nursing (ACEN). This renewal recognizes the program's adherence to global quality standards and underscores the college's excellence in nursing education, research, and community service. The college is the first in the country to achieve this accreditation and is currently ranked highly at both regional and global levels.

### Infectious Diseases and Vaccines Center

A better society free from infectious diseases and

PHOTO GALLERY

Overview

The Infectious Diseases and Vaccines Center was established on 29/9/2014 at the University of Jordan. The center hopes to be a link between the different health sectors and works to establish teams of doctors, microbiologists, veterinarians, vaccine scientists, and pharmacists with the aim of controlling infectious diseases.

The center hopes to carry out educational and medical research activities in the field of important infectious diseases in Jordan and also hopes to play an advisory role regarding health policies in Jordan.

The center has a distinctive role as part of one of the oldest research universities in Jordan / the University of Jordan. This will enable the center to communicate directly with a distinguished group of academics and scientists.

## University Services

Electronic gates | Administrative Services

### Student Clinic

The department provides health care for students, including medical and dental treatment, laboratory tests and dispensing medications. Cases that require follow-up are referred to the university hospital. The department develops health education programs to prevent diseases, holds medical committees and approves medical reports issued outside the university. The department includes health clinics, dental clinics, an emergency department, a laboratory, and a pharmacy.

The department also contributes to spreading health culture and awareness among students of the University of Jordan, in addition to participating in social, sports and other health activities within the University of Jordan

# 3 GOOD HEALTH AND WELL-BEING

## Challenges and Areas of Improvements

**The University of Jordan** is dedicated to advancing SDG 3 (Good Health and Well-being) through various initiatives. It aims to expand student clinics, offering comprehensive therapy services, including physical, psychological, mental, psychodynamic, and behavioral therapies. The university plans to collaborate with local and international doctors, leveraging expertise both on campus and via telehealth applications. It envisions hosting health-focused seminars to educate students on maintaining a balanced lifestyle, fostering energy, positivity, and productivity.

To enhance healthcare infrastructure, the university seeks partnerships with local and global entities to procure modern medical equipment for its hospital and clinics. Mental health will be prioritized through robust counseling programs, awareness campaigns, and support networks. The university also aims to advance research in public health and preventive medicine by forming alliances with global health institutions. Additionally, it intends to promote health education through workshops and collaborate with health organizations to address pressing public health challenges.

These efforts will ensure a healthier university community, improve access to healthcare, and support sustainable, eco-friendly health practices for long-term well-being.

# 4 QUALITY EDUCATION

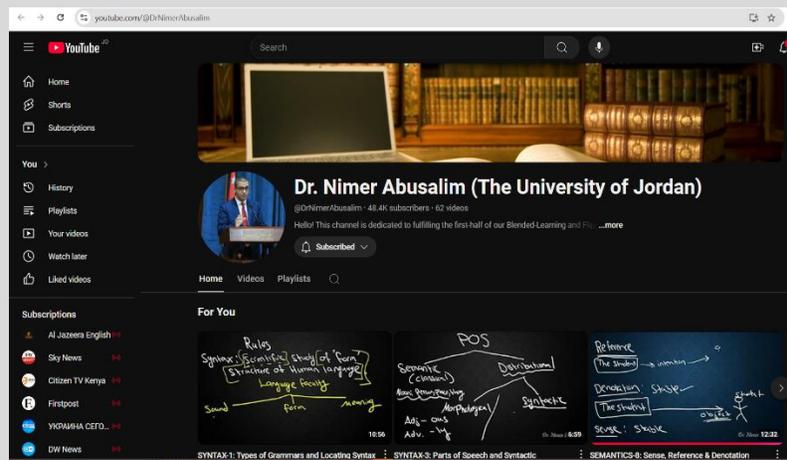

**SDG4: Quality Education** aims to ensure inclusive and equitable quality education for all. The University of Jordan actively promotes SDG 4 through initiatives that enhance access to education, foster innovative teaching practices, and engage with local communities. By aligning its programs with global educational standards, the university strives to contribute to a more equitable educational landscape in Jordan and the broader MENA region.

- The University of Jordan is dedicated to fostering an inclusive educational environment that extends beyond our enrolled students. We provide a range of resources, including library services, online courses, and access to lectures, to support learning and professional development for the wider community. By offering these educational tools, we promote lifelong learning and community engagement.

1. The University of Jordan (UJ) offers various educational resources accessible to non-students, including lectures available on YouTube channels maintained by many faculty members.

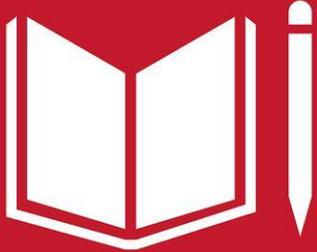

Dr. Ahlam Sbeihat teaches Spanish Language

Dr. Nimer Abusalim teaches Linguistics

# 4 QUALITY EDUCATION

**Dr. Nurah Allozi teaches Accounting 1&2 and managerial**

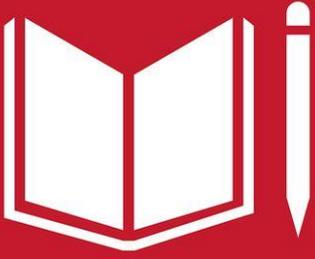

**Dr. Bilal Abu Salih teaches Data Structure**

**Dr. Esra Alzaghoul teaches JAVA**

**Dr. Maha Elbeltagy teaches Anatomy**

**Dr. Mohammad Tayeh teaches Financial Markets**

# 4 QUALITY EDUCATION

2. UJ hosts external examinations for various organizations, such as the Jordanian Medical Council and the Jordanian Nursing Council, utilizing its facilities.

## Theses Deposit Center

The University of Jordan Library has been accredited by the Association of Arab Universities since 1986 as a repository of the theses and dissertations completed at Arab Universities. In view of this, JU Library is committed to adhere to the regulations laid down by the Association, taking into consideration the protection of intellectual property rights as well as the general interest of researchers across the Arab world. .

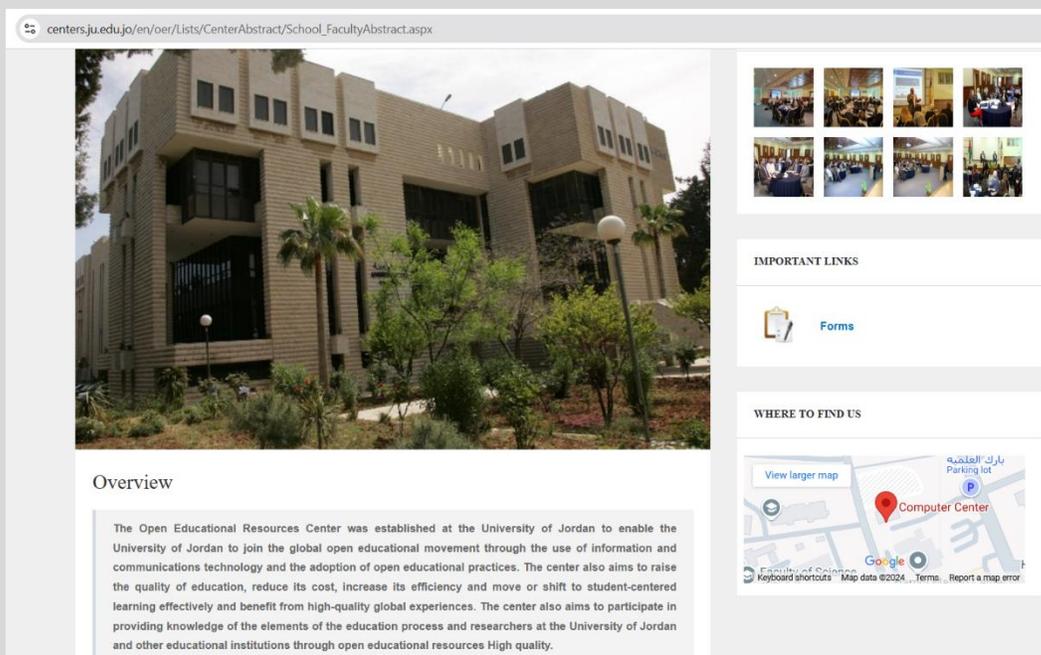

The Library offers this service through the Dissertations and Theses Database (<https://theses.ju.edu.jo>), which includes abstracts, full texts, and bibliographic lists for dissertations and theses. The full text for dissertations and theses can only be accessed onsite via the online Dissertations and Theses Database. The universities from which these theses were completed can obtain a copy of them upon request. .

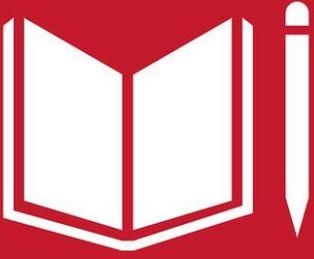

4. The university offers services to official Jordanian universities, including the Horizon system and a unified index for all universities.

5. The university has an Open Educational Resources and Blended Learning Center aimed at enhancing knowledge dissemination among educators and researchers at UJ and other educational institutions through high-quality open educational resources.

# 4 QUALITY EDUCATION

- The University of Jordan hosts various events open to the public, such as lectures and educational initiatives. These events promote knowledge sharing and community engagement, allowing everyone to benefit from our faculty's expertise and the university's resources.

**DDS in Dentistry / Program Overview**

➤ **Background to the program and subject area:**

The School of dentistry plays an important role in dental health education and promotion not only among dental health care providers, but also in the local community. The School's philosophy is to provide up-to-date and evidence-based dental knowledge, and to promote dental health care in the society through research and continuous education programs. The School focuses on the development of prevention programs for common dental and oral health problems prevalent in the local and regional communities, and at the same time educating about the health problems prevalent in other parts of the world.

➤ **Vision statements of the program:**

### Cultural Immersion

The student experience at the University of Jordan is marked by an extensive range of academic programs, reflecting the institution's dedication to catering to diverse interests and career aspirations. From engineering to medicine, business, arts, law, and others, students have ample opportunities to explore their passions and develop specialized expertise in their chosen fields. Moreover, the university's commitment to academic excellence is underscored by its state-of-the-art facilities and a faculty renowned for their expertise and dedication to student success.

Beyond academics, the campus life at the University of Jordan is vibrant and multifaceted, offering students access to a rich tapestry of cultural and social opportunities within Jordan. Whether attending cultural events, exploring historical landmarks, or engaging with local communities, students have the chance to immerse themselves in the dynamic fabric of Jordanian society, enriching their overall educational experience.

Furthermore, the university fosters a dynamic environment through its numerous clubs, organizations, and extracurricular activities. These platforms provide students with opportunities to develop leadership skills, pursue their interests outside the classroom, and build lasting friendships with peers who share similar passions and aspirations. Additionally, support services for holistic student development are readily available, ensuring that students receive comprehensive assistance and guidance throughout their academic journey.

Overall, the University of Jordan provides a stimulating and enriching environment that not only prepares students for academic success but also nurtures their personal and professional growth. By fostering a culture of innovation, inclusivity, and engagement, the university equips students with the skills, knowledge, and confidence needed to emerge as leaders and thrive in their future endeavors, both within Jordan and on a global scale.

## 3. The University of Jordan School

units.ju.edu.jo/ar/school/Lists/CenterAbstract/School\_FacultyAbstract.aspx

Overview

The University of Jordan School was established by a decision of the University of Jordan Deans Council in 1983. It relies on the curricula approved by the Ministry of Education and the latest theories and methods in the field of learning and teaching. It works to contribute to the development of teaching methods and school curricula in cooperation with the Faculty of Educational Sciences in particular and the university's colleges in general. It is keen to provide the appropriate climate to develop creativity and effective participation, as well as to create the appropriate atmosphere for faculty members at the university to conduct applied research in the field of learning and teaching, and to train university students from the Faculty of Educational Sciences and the various university colleges. The school includes primary and secondary school classes (for the scientific branch) in addition to kindergarten classes. It was taken into account that the number of students in one class is between (20-25) male and female students. The school is mixed for all grades and the number of students in the school ranges between (600-650) male and female students. The school always looks forward to keeping pace with all modern technological developments and using modern strategies and methods in our advanced curricula. Preparing generations capable of facing all challenges, and instilling values, principles and true belonging through hard work, love of the homeland and preserving its pillars and soil. The school opens its doors to hold seminars, lectures and awareness programs in cooperation with local community institutions to provide everything that serves the homeland and prepares a generation that belongs to the homeland and is a leader. The school is supervised and its educational policy is drawn up by a council headed by the Dean of the Faculty of Educational Sciences, and includes in its membership, in addition to the school principal, a distinguished elite of faculty members from the University of Jordan and members of the local community. The educational process is also supervised by a technical committee of faculty members from the university from various specializations. In addition to the curricula of the Ministry of Education, the school applies other programs that include foreign languages (English) from kindergarten classes, French from the fifth grade, computer, music, and various artistic, sports, scouting, cultural and religious activities. The school is working to start introducing the American (SAT) and (AP) programs. The school includes advanced computers distributed over two laboratories, a library, in addition to providing Internet service, physics, biology and chemistry laboratories, independent professional and technical workshop rooms, football and basketball courts, and a nursing room to follow up on students' periodic examinations, vaccinations and emergency cases.

## 4. Local Community Networking and Development Center

lcndc.ju.edu.jo/Lists/CenterAbstract/School\_FacultyAbstract.aspx?ID=1

The Local Community Networking and Development Center was established pursuant to the Board of Trustees' decision in 2012 in order to forge closer ties with the local community and the Arab and regional education institutions and research bodies, and to harness university excellence in serving the local, regional and global communities.

In addition, the Center aims to utilize investment and make best use of the available human and material resources to serve the local community.

**Core Values:**

- Transparency: displaying ideas and contributions of scientific knowledge to stakeholders in the community.
- Integrity: building a relationship with the community based on the values of justice, humanity, respect of opinion, freedom and right so individuals (the principle of equal opportunities and professional ethics).
- Responsiveness: meeting the requirements and needs of the beneficiaries of the University's services and programs in accordance with its mission.

**Community Service and Development:**

Community service is one of the main roles of the University of Jordan, since its establishment in 1962, the University has attached great importance to the issue of harmony between its programs and the needs of the Jordanian society, development plans and the Arab and regional communities, it is keen to provide students enrolled in its programs with access to educational, research and service opportunities available in relevant Jordanian institutions.

**Graduate Spirit:**

- To respect cultural, ethnic and religious diversity in the Jordanian society and appreciate ethical values and interpret them into a sense of responsibility in the workplace and in the society.
- To be keen to retain national belonging and respect the laws and regulations in the community.
- To engage in community service.

**Stakeholders Networking:**

A database will be prepared for all Stakeholders inside and outside the University of Jordan, locally, regionally and internationally, constantly updated in order to activate and strengthen relationships and links with the community institutions, production bodies and industry, and display ideas and contributions of scientific knowledge before stakeholders. Also provide programs that satisfy the needs and requirements of all beneficiaries.

Moreover, create the environment for all stakeholders to contribute to the core values of the University, in order to improve the quality of education and educational outcomes in community development.

2. Students with disabilities at the University of Jordan receive support for attending classes and taking exams, including reading assistance. The university also employs several faculty members with disabilities, promoting a diverse and inclusive academic environment.

offices.ju.edu.jo/en/oir/Lists/EUPProjects/Disp\_form\_new.aspx?ID=30#:~:text=Edu4All%20aims%20to%20reach%20students,teaching%20and%20to%20serving%20students

## Co-funded by the Erasmus+ Programme of the European Union

People with disabilities have the right to equal opportunities in all areas of life (including Education) as well as to live in dignity and freedom, recent studies in Jordan and Palestine show respectable ratio of people with disability continue higher studies either also it showed that they are likely to receive financial aid. However, data show that students with disabilities are less likely to enroll in higher education than their nondisabled peers. One the main reasons behinds this conclusion is the Lack of facilities keeping disabled away from higher education and corporate jobs. For example, up to our knowledge after gathering information from the General Union of Disabled (GUD) at both PCs, most of the universities in PCs have insufficient accessible curriculum resources and have not made any curriculum adjustments for students with disabilities attending their programs. Most of the universities also fail to prepare any individualized learning plans for students with disabilities and to provide even the most basic accessible infrastructure for students, particularly those with motor disabilities. While existing university policies allow students with disabilities who finish their high school to enroll in their not-inclusive programs, there is a severe shortage of support (or incorporate) accessibility (in existing) curricula and resources through appropriate accessibility services and accommodations for students with disabilities. Also, there is a lack of trained staff to support these students to learn in this environment. Thus, a concerted effort is needed to make out universities more inclusive. Edu4All is an innovative project to empower students with disabilities academically, socially, and psychologically through five goals: reach, development, equity, quality, and sustainability. **Edu4All aims to reach students with disabilities and to build their capacity by including them in universities programs and increasing the successful participation of them, to build the capacity of staff (lecturers, administrative, and technician) and to ensure they are well trained for teaching and to serving students** with disabilities, to modernize the existing the curricula to be accessible by students with disabilities via the use of assistive technologies, to ensure that the educational experiences students receive are high quality, and to ensure sustainability.

### Introduction about the School of Rehabilitation Sciences

The School of Rehabilitation Sciences was established at the University of Jordan in 1999. It began with three departments: physical therapy, occupational therapy, and prosthetics and assistive devices. A fourth department was added to it in 2003, which is the Department of Hearing and Speech Sciences. It grants bachelor's degrees in the four specializations, in addition to a master's degree. Undergraduate students spend 4 years of study during which they must complete a total of 132 credit hours, covering theoretical, practical and clinical topics. The four departments share many of the topics presented during the first year, while in the second year they share some of them, while students spend the rest of the four years in studying topics related to their specializations, with the aim of providing them with

## Challenges and Areas of Improvements

**The University of Jordan** is committed to advancing its initiatives in line with SDG 4 (Quality Education) in the coming years. The university plans to equip classrooms, lecture halls, and auditoriums with the latest technology, ensuring that instructors can effectively share their expertise and students can easily absorb and engage with the material. This technological upgrade will foster creativity, encourage global competitiveness, and contribute to academic excellence. Additionally, the university aims to support faculty with educational YouTube channels by providing necessary resources and spaces for content creation, expanding educational outreach beyond campus. The university is also focused on improving and expanding its laboratories across all faculties, making them more accessible and productive for students. Furthermore, to increase global engagement, the university will expand its exchange programs, allowing students to learn in different cultural environments, enhancing their education through diverse global perspectives. The university plans to continue offering scholarships, enhance digital learning platforms, and provide support for students with disabilities to ensure inclusivity. It also seeks to strengthen partnerships with international institutions, collaborate on research initiatives, and align its curriculum with industry needs, equipping graduates with the skills required for the evolving global workforce. Through these initiatives, the University of Jordan is striving to contribute significantly to the achievement of SDG 4.

# 5 GENDER EQUALITY

(SDG 5) Gender equality is dedicated to achieving gender equality and empowering all women and girls. Its objectives include eliminating discrimination, ensuring equal participation in leadership roles, and addressing issues such as gender-based violence and harmful practices. By promoting equal access to education, health, and economic opportunities, SDG 5 aims to create a more equitable and just society.

The University of Jordan (UJ) actively supports SDG 5 by encouraging female enrollment in traditionally male-dominated disciplines and offering scholarships, mentorship, and leadership training for women. Additionally, UJ conducts research and outreach initiatives that address gender-based violence and discrimination, fostering a culture of inclusivity and equality. Through these efforts, UJ significantly contributes to advancing the goals of SDG 5 and promoting sustainable development within the region.

The University of Jordan, through the Center for Strategic Studies (CSS), addresses Sustainable Development Goal 5 (SDG 5) by researching gender-based violence, particularly economic violence against women. While not publishing specific SDG 5 progress reports, the CSS's Jordan Gender Barometer Survey examines the structural factors contributing to economic violence, advocating for women's rights and informing public policy to promote gender equality.

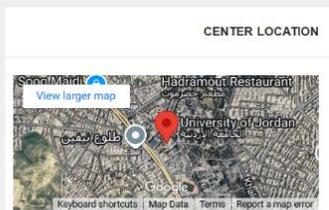

<https://hivos.org/assets/womeninleadership/2021/01/Hivos-JORDAN-GENDER-BAROMETER.pdf>

The University of Jordan concluded the 16-day campaign against gender-based violence, sponsored by HRH Princess Basma bint Talal. She highlighted the need for ongoing efforts to eliminate violence against women, especially for marginalized groups. President Dr. Ekhleif Tarawneh defended Jordan's cultural values regarding women's rights and called for action against all forms of violence to empower women and promote their leadership.

Princess Basma sponsors the closing ceremony of the "16 Days of Activism against Gender-Based Violence" campaign

The President of the Jordanian National Commission for Women, Her Royal Highness Princess Basma bint Talal, sponsored today, Tuesday, at the University of Jordan, the closing ceremony of the 16-day campaign to combat violence against women. The Women's Studies Center at the University of Jordan, in

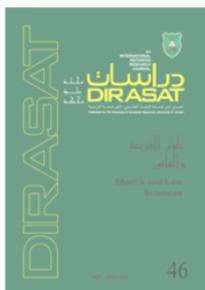

The study analyzed the economic and social costs of discrimination against **women** in Jordan's labor market and the benefits of their increased participation. It found that low participation costs the global economy 28 trillion dollars and Jordan 11 billion dinars in 2013. The study recommended a gender-sensitive approach to empower **women** and improve job quality without sacrificing wages or working conditions.

## Socio- Economic Cost of Discrimination against Women in The Jordanian Labor Market

### Abstract | الملخص

The study aims to examine the economic and social cost of discrimination against women in the labor market and to identify the economic and social gains in increasing the economic participation of women. The descriptive approach was used to describe the phenomenon through the available information and data in studies, research, reports, sources and references issued by international and local institutions. The study found that the global and local community pays a high price due to the weak economic participation of women and that the increase in women's participation in the labor market, like their male counterparts, increases national GDP by 28 trillion Dollars. At the local level, the weak participation of Jordanian women, like their male counterparts, has cost around 11 billion Jordanian dinars, for the year 2013. Moreover, increasing the participation of women achieves economic and social returns and gains at the macro and micro level. The study recommends the importance of adopting a gender approach in the process of women's economic empowerment in order to re-examine the quality of services and jobs available to women in the labor market. This is to avoid quantitative expansion at the expense of wages, working environment and support services for women and to protect women from reproducing the patriarchal system that is embodied in the new global capitalist system

## Center for Women's Studies

مركز دراسات المرأة  
Center for Women's Studies

The center for women's studies is considered to be one of the main units at The University of Jordan, awarding Masters Degrees in this field. The center increasingly gets the attention and support of Her Royal Highness Princess Basma Bin Talal.

The center was founded in 2006 after it was originally a program in Women's Studies that was established in 1998. The Program grew to become a department for Women Studies, and then it became a specialized center in women's issues at both the local and the global levels.

- The University of Jordan has **maternity and paternity policies** to support **women's** participation in academia. These include paid maternity and parental leave, one hour of paid breastfeeding daily, and one year of unpaid leave after maternity. The university also provides health insurance for women and their children, equal end-of-service benefits for all employees, and equal access to savings and housing loans. These policies demonstrate the university's commitment to creating an inclusive environment.

The screenshot displays a SharePoint document page. The left sidebar shows a navigation menu with categories like Documents, Admissions, Brochures, etc. The main content area is divided into two columns. The left column contains the document title and a detailed description of the instructions for sick leave, emergency leave, and maternity leave, including the date of issuance (5/5/2016) and the relevant article (Article 24) of the University of Jordan's Faculty Regulations. The right column contains the title 'Maternity leave' and the beginning of Article (42), which defines the entitlement for pregnant women.

### Women's Participation At UJ's Student Union Election

BY JT

Student Union Council elections at The University of Jordan have officially wrapped, marking the first elections since 2019. This election came after drastic political reform in Jordan started with the formation of the Royal Committee, and the enactment of the 2022 elections law, according to a statement for The Jordan Times.

### UJ Launches Women's Studies Center Alumni Forum

On the occasion of International Women's Day, University of Jordan (UJ) President Prof. Nathir Obeidat, launched the Alumni Forum of the Women's Studies Center. The event took place in the presence of vice presidents, deans, faculty members, administrative staff, local community leaders, and former graduates of the center.

Obeidat addressed the women of the University of Jordan, Jordan, and Gaza, emphasizing their inherent strength, capability, and strong personality. He highlighted the achievements of women in education, creativity, and other fields, emphasizing their role as leaders and guardians of passion, equality, and opponents of hunger, poverty, and ignorance.

The **multipurpose gym** is utilized for a variety of sports activities including basketball, volleyball, handball, five-a-side soccer, ground tennis, badminton, and closed female aerobic sessions. It features a seating area with a capacity of approximately 450 people, an electronic scoreboard, and a platform for ceremonies or graduations.

The **Female Aerobic Lounge** has a maximum capacity of 20 students and provides five weekly sessions led by a professional trainer at a highly affordable rate.

**Squash courts** There are two squash courts available, both built to international standards. One court is designated for male players, while the other is reserved for female

- **Empowering Women at the University of Jordan: Mentorship, Graduation Support, and Anti-Discrimination Policies.**
- The University of Jordan (UJ) has women's mentoring schemes with over 10% female student participation. These include academic mentoring by faculty and peer mentoring through student clubs. The Deanship of Student Affairs also organizes mentoring activities focused on academic, psychological, and career guidance. Additionally, the Center for Women's Studies offers vocational and political guidance programs specifically for female students, promoting their personal and professional development.
- The University of Jordan (UJ) measures and tracks the likelihood of women's graduation compared to men's. The university has established schemes, including mentoring programs, designed to support female students in preparing for the real world and addressing any disparities in graduation rates.
- The University of Jordan (UJ) has a policy in place that protects individuals reporting discrimination from any educational or employment disadvantages. The university maintains a penal system against all forms of discrimination and has established investigative committees to address cases of injustice or discrimination related to educational or appointment matters.

# 5 GENDER EQUALITY

## Challenges and Areas of Improvements

**The University of Jordan** is committed to furthering gender equality (SDG 5) by seeking partnerships with renowned international organizations such as UN Women, Women for Women International, Global Fund for Women, the European Institute for Gender Equality, and the International Center for Research on Women. The university plans to explore new pathways for empowering women in society while fostering collaboration between creative young men and women who can share their success stories with students, inspiring them as role models. Additionally, the university intends to host seminars highlighting the integral role both genders play in societal change and explore the creative synergies that result from combining their efforts in fields like medicine, business, languages, and diplomacy. By adopting policies aimed at equal representation in the workplace and promoting gender balance in hiring, the university is furthering its commitment to a more inclusive and equitable academic and professional environment for all.

**SDG 6: Clean Water & Sanitation:** seeks to ensure the availability and sustainable management of water and sanitation for all. This includes access to clean water sources, improving water quality, promoting efficient water use, and protecting water-related ecosystems. The aim is to address global water scarcity and ensure that communities have safe water and sanitation by implementing practices that sustain water resources.

### **Efforts by the University of Jordan**

**The University of Jordan (UJ)** actively supports SDG 6 through research and projects focused on water quality and sustainable water management. The university's Center for Strategic Studies and departments such as the Water, Energy and Environment Center (WEEC) conduct studies on issues like the safety of raw spring water, wastewater treatment, and efficient water use. Through collaborative projects like NAWAMED and various research initiatives, UJ contributes to improving local water management, advocating for policies that promote safe, accessible, and sustainable water sources in Jordan.

- Many articles by our University of Jordan graduates and researchers have been published to address critical water management issues in Jordan. These studies focus on assessing spring water safety, promoting sustainable wastewater treatment, and highlighting the need for effective strategies to ensure water quality and availability. The University plays a vital role in researching and developing solutions to combat water scarcity and enhance environmental sustainability in the region.

## 1. “IS RAW SPRING WATER SAFE FOR DRINKING?”

This study assesses the safety of spring water in Jordan, particularly for drinking. By analyzing samples for alpha and beta radioactivity and 13 different metal concentrations, it found that most springs are safe, except for Jerash, which could pose risks. This research fills a gap in the understanding of spring water quality in Jordan, providing valuable baseline data for future studies.

2. The study ["Estimation of Industrial Water Demand and Reclamation in Jordan"](#) examined water demand and reclamation in Jordan's industrial sector by surveying 395 factories. It found that the average monthly water demand per worker is  $0.634 \text{ m}^3$  for domestic use and varies from  $0.07$  to  $21.38 \text{ m}^3$  per ton for process use. Wastewater generation ranges from  $0.515$  to  $0.628 \text{ m}^3$  per worker monthly for domestic purposes and  $0.04$  to  $12.45 \text{ m}^3$  per ton for processes. On-site treatment of 90% of wastewater could meet 37.83% of process water needs, saving 9.7 million  $\text{m}^3$  of fresh water annually and reducing  $\text{CO}_2$  emissions by 25,954 tons

3. Research article [“Quantity not quality: promoting sustainable wastewater practices in Jordan”](#): Jordan, facing severe water scarcity, now relies heavily on treated wastewater, particularly for agriculture and industry. However, mixing treated wastewater with rain-fed freshwater in dams has led to reduced water quality. This study compares current dam water quality with historical data, confirming that mixed storage degrades water quality. It recommends sustainable practices, particularly separate storage for treated wastewater in dams, to maintain water standards for diverse uses.

4. **“The Potential of Dew Water Harvesting and its Quality in Jordan”**: This research examines dew water harvesting to address Jordan's water scarcity. It finds that urban dew in Amman has high mineral content from Saharan dust, requiring filtration for safe drinking. The study identifies three dew formation zones, with the Central Plateau yielding the most dew (0.05-0.15 L/m<sup>2</sup>/day) and the Eastern Desert the least. These findings highlight dew harvesting's potential for agricultural use and the need for climate adaptation in water management.

**5. Nanotechnology & Water Treatment Research Group:** This research group tackles water contamination, a major health and environmental issue in Jordan and globally, using nanotechnology. It develops nano-photocatalysts for pollutant degradation and polymeric nanocomposite membranes for water filtration. The study also investigates polymer nanocomposites, correlating processing, structure, and properties to enhance performance.

**6.” Water Audits of Academic Institutions in Water Stressed Countries; the Case of the Jordan University”** This study addresses water scarcity in Jordan, focusing on the University of Jordan's consumption patterns. Analyzing surveys and flow rates revealed that 80% of water use was in schools and offices, primarily for toilets (64%). Adopting water-saving devices could reduce demand by 13.7%, saving approximately \$19,911 quarterly. The research emphasizes the need for both fixture upgrades and water conservation education.

## Water Audits of Academic Institutions in Water Stressed Countries; the Case of the Jordan University

Ola Al-Qawasm<sup>1</sup> and Munjed Al Sharif<sup>2</sup>

<sup>1</sup>Department of Land, Water, and Environment, University of Jordan, Researcher at National Agricultural Research Center, Baqa'a-Jordan  
<sup>2</sup>Civil and Environmental Engineering Department, German Jordanian University, Amman, Jordan

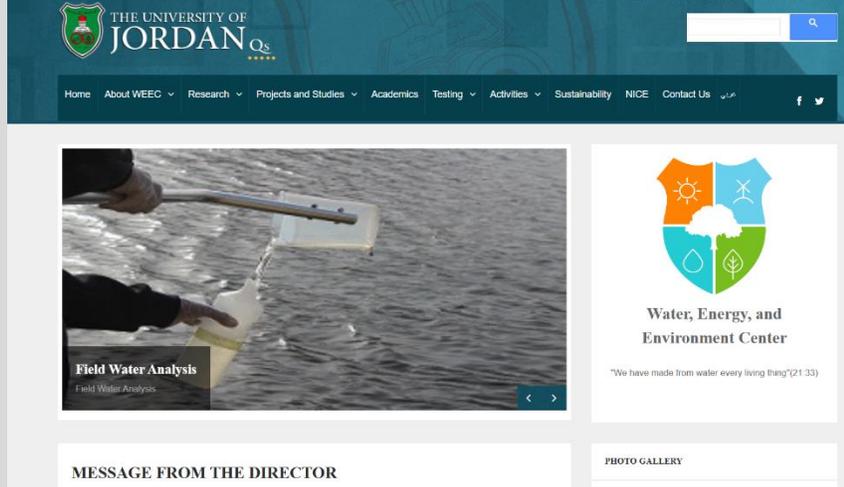

Received 26 June 2021; Accepted 14 August 2021

**Abstract**  
Water use efficiency is considered as a step forward towards water auditing for assessing the financial, social, and environmental benefits. The diversity of activities and water end-use in the university can be considered as significant as in a small city where residential, commercial, and industrial uses are present. The end-use analysis is important for understanding the reduction in water demand due to retrofit fixtures to a more efficient one. A mixed-methods study used qualitative methods such as the questionnaire's distribution, and quantitative methods such as physical flow rate measurement for the sanitary fixtures and the laboratory equipment. Sanitary installation-plumbing supply fittings standard JS 1945:2011 was used as a benchmark. In addition to the feasibility study. Eighty percent of the volume of water consumption went to the schools and the administrative offices. The main internal use of water was the toilet with percent reached 64%. Adopting water use efficiency would reduce the water demand to 13.7%, and this would be reflected in money savings that would be 19911 (\$/quarter). Retrofitting fixtures indoors on the university campus is not enough and should concern changing behaviors in the university community by incorporating water conservation in the academic curriculum.

**Keywords:** Water Audit, Water end-use Analysis, Water Flow Rate, Water-saving Devices, Water Scarcity, Water use Efficiency.

**1. Introduction**  
The world is facing an increasing water deficit that is intensified by the impacts of climate change. This is especially true in arid and semi-arid regions. For that, many countries are adopting the concept of sustainability, water demand management, water use efficiency, and water audit or (Water End-use Analysis) towards managing and sustaining this precious source. The main source for water in Jordan is groundwater with about 59% of all sources (MWI, 2017). Groundwater depends mainly on annual rainfall, besides the type and distribution of the rainfall storms in the whole year, but rainfall fluctuates from year to year and even the annual water demand by 30.85% through adopting and retrofitting water-saving devices in sanitary places (Oduro-Kwarteng et al., 2009). The water end-use analysis was defined that the ways customers use water daily by different sanitary fixtures with frequency use (Oduro-Kwarteng et al., 2009). Universities may be considered as small cities in terms of population, size, and daily activities that generate direct and indirect impacts on the environment (Alshuwaikhat and Abubakar, 2008). Besides, institutions of education in Jordan are among the large consumers of water representing about 14% of the commercial water consumption (MWI, 2012 a). This is since there are 32 public and private universities

• Sustainable water management in Jordan, focusing on addressing water scarcity and quality through research, education, and collaboration with stakeholders.

1. The Water, Energy and Environment Center (WECC) at the University of Jordan, established in 1982, addresses water-related challenges in arid regions through research on water management, treatment, and reuse. It has expanded to include environmental and energy issues, focusing on the water-food-energy nexus for sustainable development. The center offers integrated water resource management, renewable energy research, training, consultancy services, and water quality laboratory analysis for public and private sectors.

**Water, Energy and Environment Center- University of Jordan - Work Package 3**

Water, Energy and Environment Center (WEE-Center) at the University of Jordan and in close cooperation with the Helmholtz Centre for Environmental Research (UFZ) will support achieving the third objective of the WATERUN project, which is oriented to develop a planning tool for stormwater management mainly using decentralized approaches. The WEE-Center is currently hosting the office of inter-ministerial committee formed by the Cabinet in Jordan (NICE) to provide assistance in the development of integrated water management approaches with a focus on decentralized options.

The NICE committee and NICE office will support the UFZ in the development of modeling tools at block-level for reducing Urban Water Runoff through data provision and facilitation of model testing in the case study of Amman. In addition to this role, WEE-Center will support WP3 by providing a full MSc scholarship to develop a simplified hydrological modeling tool that shall examine the economic value of rooftop water harvesting and reuse within apartments and buildings in Amman particularly for toilet flushing. Accordingly, both the potential of reducing pollution load and the economy of scale will be tested. The scholarship will be provided through Dutch funded project (3S-WATER) coordinated by the IHE-Delft and launched March, 2023.

# 6 CLEAN WATER AND SANITATION

- projects collectively focus on enhancing sustainable water management in the Mediterranean through integrated water resource management (IWRM). They emphasize interdisciplinary collaboration, stakeholder engagement, and innovative solutions to address water scarcity and environmental challenges while improving water efficiency and access.

## 1. NAWAMED Project Summary

The NAWAMED project focuses on enhancing domestic water reuse in Mediterranean countries using nature-based solutions. It promotes decentralized, low-cost treatment of non-conventional water (NCW) like greywater for toilet flushing and irrigation. The initiative aims for a 30% reduction in water consumption at pilot sites, reusing 9,000 m<sup>3</sup> of unconventional water annually. With a budget of €3.2 million over 36 months, it benefits local authorities, practitioners, and students.

**NAWAMED**  
**Nature Based Solutions for Domestic Water Reuse in Mediterranean Countries**  
**Project description**  
In Mediterranean countries, domestic water use accounts for a minor part of water consumption – a much larger amount is used for irrigation – but it requires the best quality and its demand is continuously growing, along with improving lifestyle and increasing urban population. Moreover, urban water is still the main cause of pollution of rivers and groundwater, even when treated before being discharged. Per capita domestic water use can be drastically reduced by using non-conventional water (NCW) resources for not potable purposes: greywater (and

**2.** The Innovations in Water Education project aims to strengthen collaboration between higher education institutions (HEIs) and enterprises in the Eastern Mediterranean to develop adaptive courses in Water Resources Management. It focuses on enhancing graduates' employability and creating a Water Network for shared resources. The initiative will also establish a virtual learning platform, making education more accessible, especially for rural students.

### Innovations In Water Education :: Enhancing Water Security And Socio-Economic Development In The Eastern Mediterranean Under Climate Change

**PROJECT WEBSITE**

Innovations in Water Education Program

The purpose of this project is to bring together and strengthen the cooperation between companies and HEIs through the development of courses in Water Resources Management, while taking into consideration potential climate change impacts, with adaptive learning and teaching methods. HEIs are not highly engaged to the larger society that can lead to graduates less desirable by enterprises and companies. This can be alleviated by establishing truly collaborative relationship between HEIs and enterprises. This is one of the purposes of establishing the Water Network. The enterprise involvement in the course should be active and proactive. WaSec will also strengthen the collaboration among the countries of the region by providing courses that could be adopted and implemented by all the countries of the region. Students from different countries of the region will have the chance to interact with each other through the virtual courses. The courses will utilize new learning methods and pedagogical approaches that would intrigue the interest of younger generations. Finally, the ability to practice distance-learning will assist students, particularly from

# 6 CLEAN WATER AND SANITATION

3. Nanocomposite membranes enhance traditional polymer filters for effective water purification. By integrating nanoparticles into polymers like PVDF, these membranes improve filtration performance and reduce contaminants. This technology supports environmental protection, wastewater recycling, and lowers treatment costs.

**Novel Polymeric Nanocomposites Membranes For Water And Wastewater Treatment**

4. From October 2018 to October 2019, the Sustainable Water Management Plan for Queen Alia International Airport (QAIA) evaluated the existing water management system. It analyzed water consumption to identify conservation measures and created a model to project groundwater depletion and treatment costs until 2032.

**Groundwater Resources**

**Sustainable water management plan for QAIA**

Start Date: Monday, October 1, 2018  
End Date: Tuesday, October 1, 2019  
Topic: water resources management

Detailed evaluation of the existing water management scheme in QAIA and all facilities operated by AIG. This included a detailed description of water consumption per facility to the lowest possible evaluation scale. Consequently, possibilities for additional economically feasible water conservation measures are suggested. Preparation of a model that projects groundwater depletion based on the current and forecasted pumping rates. The model shall determine the cost of pumping until 2032 and predict deterioration in water quality and, consequently, the additional cost of water treatment.

( 0904467)Design of Sanitary Systems

**Course Description :**

History of plumbing systems, Basic definitions; Water sources, water quality and treatment, drinking water quality, Basic fluid mechanics principles, building cold water supply systems and design, building hot water supply systems and design. Valves in water supply systems and selection, plumbing materials; plumbing fixtures. Building soil and waste drainage systems (internal and external), traps, clean-outs, interceptors, and back water valves; indirect waste piping and special wastes; drainage systems design; vents and venting; design of storm water drains; building fire fighting systems.

# 6 CLEAN WATER AND SANITATION

## Challenges and Areas of Improvements

**The University of Jordan** plans to implement a comprehensive and inclusive strategy to make significant progress toward SDG 6 (Clean Water and Sanitation), and to reduce water usage and minimize waste. This includes conducting a detailed assessment to identify whether the issues are related to water supply or consumption. If the problem lies with supply, the university will explore options to import water and collaborate with relevant entities on better collection methods. On the consumption side, strict policies and measures will be put in place, such as installing water-saving devices in bathrooms. Workshops and seminars will also be organized to educate both the campus community and the broader public on water conservation and innovation. Additionally, the university aims to enhance the maintenance and supervision of its sewerage system and integrate advanced technologies in personal spaces and bathrooms. To improve sanitation, the university plans to build new, well-equipped restrooms with essential amenities such as sanitizers, toilet paper, and clean water, ensuring a healthier and more sustainable campus environment.

## 7 AFFORDABLE AND CLEAN ENERGY

**SDG 7: Affordable and Clean Energy** aims to provide universal access to affordable, reliable, and sustainable energy, focusing on renewable sources and energy efficiency to combat climate change and promote sustainable development. By increasing clean energy availability, SDG 7 supports progress in poverty reduction, economic growth, and environmental protection.

**The University of Jordan (UJ)** supports SDG 7 through significant research and sustainable practices. UJ publishes studies on renewable energy, optimal charging locations for electric vehicles, and efficient hybrid power systems. The campus itself uses energy-efficient standards, such as LED lighting, thermal insulation, and a 16 MW solar PV system covering 100% of its electricity needs. Additionally, the university's Green Innovation Fund supports startups focused on low-carbon technology, contributing to a more sustainable future in Jordan.

- **The University of Jordan recognizes the critical importance of energy and has established the Water, Energy and Environment Center to address this need. The center focuses on two main areas:**
  - A. Water and Environment: Conducting research on water resource management, hydrological monitoring, groundwater, irrigation management, environmental issues, and wastewater treatment.
  - B. Renewable Energy: Investigating renewable energy sources like solar and wind, energy storage solutions, end-use efficiency in buildings, and energy economics and policy.

# 7 AFFORDABLE AND CLEAN ENERGY

## UJ publishes several papers related to Sustainable Development Goal 7 (SDG7), including:

- An analysis of cost-optimal renewable energy expansion for the near-term electricity system in Jordan.
- study on the optimal locations for electric vehicle charging stations in Amman, Jordan.
- A Homer-based optimal design for hybrid power systems tailored for educational institutions.

C. This research focuses on optimizing the placement of electric vehicle (EV) charging stations in Amman, Jordan, in response to rising energy demand and environmental concerns. Two models were developed: the Flow-Capturing Location Model (FCLM), which maximizes usage, and a modified version that aims to minimize costs. Using traffic flow data from seventeen zones in Amman, the study found that while the FCLM produced valid results, the modified model offered significant cost savings.

### Optimal Locations of Charging Stations for Electric Vehicles in Amman, Jordan

Farah Al-Habarnih<sup>(1)</sup>, Rana Imam<sup>(2\*)</sup>

<sup>(\*)</sup> Corresponding author

DOI: <https://doi.org/10.15866/irece.v11i5.17742>

#### Abstract

With the increased demand for energy resources around the world, the pollution, and the emissions of greenhouse gases (GHG), the search for alternative solutions and means to reduce energy consumption has become vital. The rise in the demand for electric vehicles (EV) is coupled with the need to provide suitable charging stations in order to serve urban areas. The aim of this research is to find the optimal locations for electric vehicle charging stations in Amman, the capital of Jordan. The charging infrastructure location problem has become more significant due to the prevalent adoption of EV in Jordan. Two models have been developed and applied: the Flow-Capturing Location Model (FCLM), and the modified flow-capturing location model. The first one aims to maximize the flow captured by charging stations, while the second one minimizes the total cost of charging stations. The data used has been the Origin-Destination (O-D) flows for the central seventeen traffic analysis zones in Amman. The results of the two models have been compared to analyze the impact of both planning approaches in order to obtain the total cost of charging stations. The results have showed that the FCLM provides valid results for the study area; nevertheless, a cost reduction has been achieved by applying the modified FCLM.

B. Jordan's electricity sector faces challenges such as rising demand and reliance on fossil fuel imports. This paper uses an optimization model to identify a cost-effective strategy for expanding the electricity system through 2030, highlighting the potential for up to 50% renewable energy generation with a slight cost increase from \$54.42 to \$57.04 per MWh. A mix of photovoltaic systems and pumped hydro storage is favored over shale oil expansions. To achieve more than 50% renewable energy, significant wind energy deployment is necessary, potentially supplying 45% of demand in a system with 90% renewable energy.

**Abstract**

Jordan is affected by an ever changing environment in the midst of climate change, political challenges, a fast growing economy and socio-economic pressures. Among other countries in the Middle East and Northern Africa, Jordan is facing a number of electricity related challenges, such as a rising energy demand, high dependency on fossil fuel imports and management of local, fossil and renewable resources. The paper presents an analysis based on an open source optimisation modelling approach identifying a cost-optimal extension of the Jordanian electricity system with growing demand projections until 2030 utilising pumped hydro energy storage and determining the costs of different CO<sub>2</sub> mitigation pathways. The results highlight the large potential of renewable energy for the cost effective, environmentally friendly and energy independent development of the Jordanian electricity sector. A share of up to 50% renewable energy can be achieved with only a minor increase in levelised cost of electricity from 54.42 to 57.04 \$/MWh. In particular, a combination of photovoltaic and pumped hydro storage proved to be a superior solution compared to the expansion of existing shale oil deployments due to high costs and CO<sub>2</sub> emissions. Aiming for a more than 50% renewable energy share within the electricity mix calls for substantial wind energy deployments. In a system with a renewable energy share of 90%, wind energy covers 45% of the demand.

**ABSTRACT**

This paper presents the concept of optimal design of hybrid power systems as alternative power generation source for educational institution. In this work, three different configurations of hybrid power generation systems are proposed. These hybrid systems include, namely, PV-Diesel-Battery, PV-Grid, and PV-Wind-Diesel-Battery hybrid systems. The proposed systems are optimally designed using the Hybrid Optimization Model for Electric Renewable (HOMER) software. The best hybrid system design is chosen based on economic comparisons, environmental effects, and social acceptance to supply the load demand. The economic comparisons among the different proposed hybrid systems are used to select the hybrid system which has the lowest net present cost (NPC) and cost of energy (COE) values and the highest internal rate of return (IRR). Moreover, a comparison of environmental impacts between the proposed hybrid systems based on the percentage reduction in carbon emission is performed. Furthermore, the paper considered the social impact of installing a hybrid power system is considered.

**Key words:** Microgrid, optimization; HOMER, renewable

The electricity market is getting bigger every day, in some countries, companies sell and buy electricity in the stock markets, so its prices are changing according to bids and offers in the market. Also, electricity prices vary according to the used technology [1].The educational institution is located in Amman city (32°0.9' N, 35°52.3' E) has relatively high amount of electric energy consumption, especially during midday hours. Consequently, a high yearly electricity bill as the load is supplied from the national grid which leads to high COE. Therefore, an optimal alternative for this issue is the integration of clean energy sources such as solar and wind energy sources.

HOMER computer modeling software is a global standard for optimizing microgrid design in all sectors, from village power and island utilities to grid-connected campuses and military bases. Originally developed at the National Renewable Energy Laboratory and enhanced and distributed by HOMER Energy [2].

The following sections present case studies that focus on selecting the best hybrid generation system for a specific site. A comparison between three different hybrid systems has

## 7 AFFORDABLE AND CLEAN ENERGY

- **All new building designs and renovation projects on the university campus are managed by the Engineering Department, which consists of qualified architects, civil engineers, mechanical engineers, and electrical engineers. This team adheres strictly to national codes and manuals that establish the technical requirements for energy efficiency in Jordan's construction sector.**

The relevant codes and manuals include:

1. Thermal Insulation Code and Manual
2. Jordan Green Building Guide
3. Natural Lighting Code
4. Natural Ventilation Code
5. Interior Illumination Code
6. Energy Efficient Buildings Code and Manual
7. Solar Energy Code and Manual
8. Central Heating Code and Manual
9. Mechanical Ventilation and Air Conditioning Code and Manual
10. Code for Gas Piping in Buildings

Policy Creation and Review Timeline:

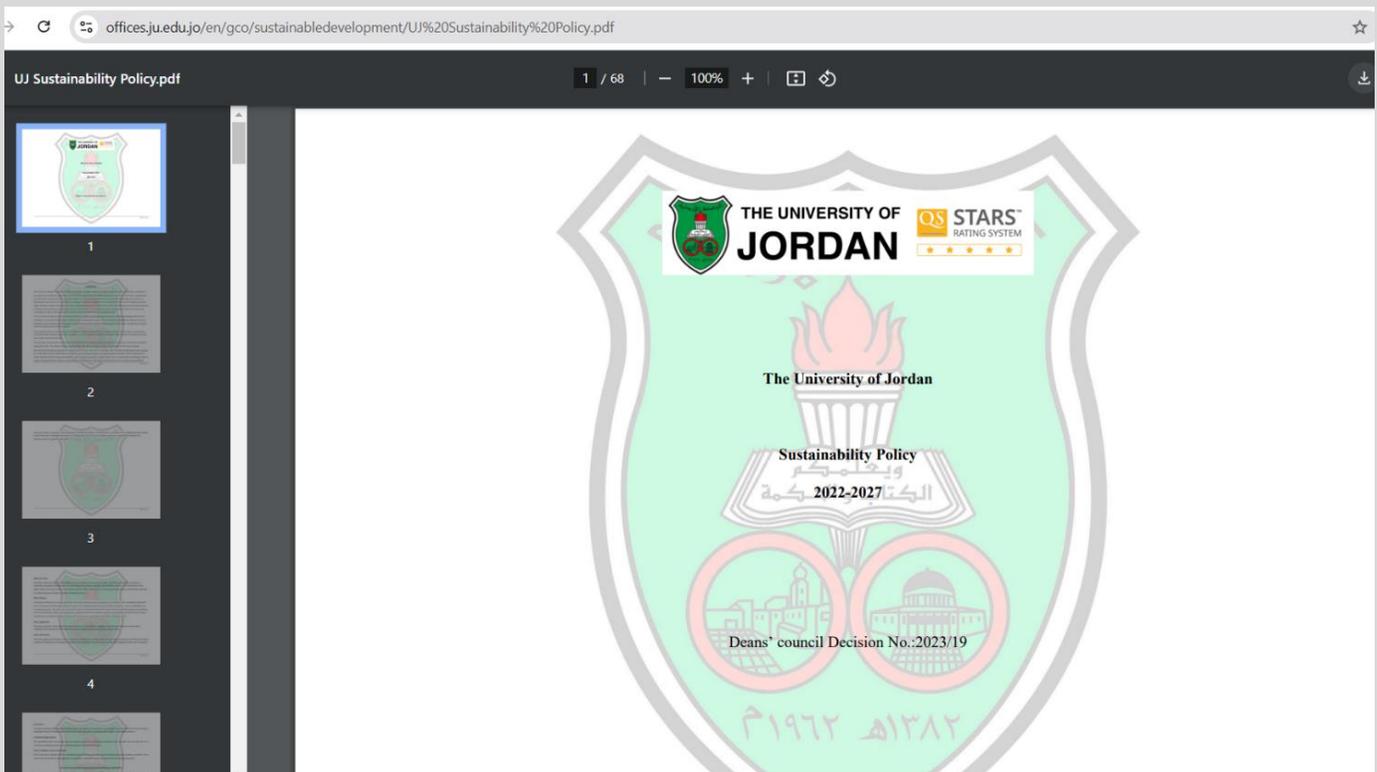

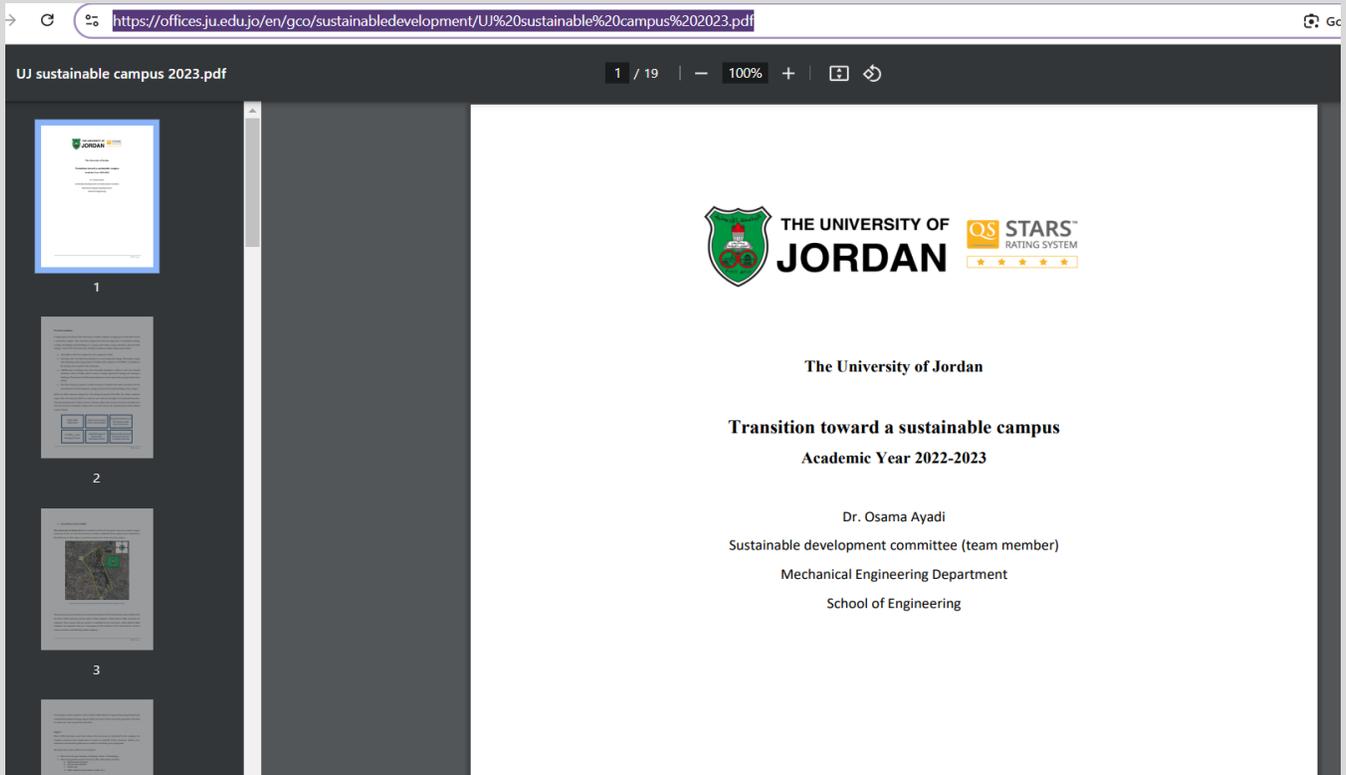

- Policy Created: 1964  
Comment: This policy has been in effect since the establishment of the Engineering Department in 1964.
- Policy Reviewed: 2022

By following these standards, the Engineering Department ensures that all projects meet the necessary energy efficiency and sustainability criteria.

# 7 AFFORDABLE AND CLEAN ENERGY

## Created Policies

# 7 AFFORDABLE AND CLEAN ENERGY

- **The University of Jordan has implemented several sustainability measures:**
  1. **Thermal Insulation (2019–2021):** Insulated 140,000 sqm of rooftops to meet Jordan’s thermal insulation code, achieving a U-value below 0.55 W/m<sup>2</sup>.K.
  2. **Lighting Upgrades:** A campaign by the Operations Department to replace indoor and outdoor fixtures with energy-efficient LEDs, many with motion sensors, is ongoing.
  3. **Energy-Efficient Standards:** The Engineering Department updated specifications for lighting and air conditioning in new installations to prioritize energy efficiency.
- 
- **The solar energy project at the University of Jordan is the largest of its kind among universities.**

NewsBrief University of Jordan News (UJ News) Sanaa Al-Samadi - The University of Jordan signed an agreement today with the Jordanian Electricity Company to start operating solar energy systems at the university, which is the largest among universities, and is also considered the largest rooftop solar energy project in Jordan.

The President of the University of Jordan, Dr. Abdul Karim Al-Qudah, confirmed that the project will produce 16 megawatts of electricity annually, which will cover the annual financial value of the university and the hospital's electricity bill, which amounts to eight and a half million dinars annually. This project is also economically feasible, as the university will be able to recover its capital faster than other traditional projects. He pointed out that the project came within the university's strategy aimed at making it an environmentally friendly university, by diversifying energy sources and benefiting from renewable energy without future environmental risks. He added that the project will constitute a basic pillar for the university's achievement and a basis for good management of human and material resources and rationalization of expenses by reducing the use of traditional fuel in generating energy.

## University of Jordan signs agreement to start operating solar energy systems

Amman, July 25 (Petra) - The University of Jordan signed an agreement on Sunday to start operating solar energy systems at the university with the Jordanian Electricity Company, which is considered the largest rooftop solar energy project in Jordan, and the largest at the level of Jordanian universities.

The President of the University of Jordan, Dr. Abdul Karim Al-Qudah, confirmed in a statement that the project will produce 16 megawatts of electricity annually, which will cover the annual financial value of the electricity bill for the university and the hospital, amounting to 8.5 million dinars annually.

He added that this project is economically viable, as the university will be able to recover its capital faster than other traditional projects, noting that the project came within the university's strategy to make it an environmentally friendly university, by diversifying energy sources and benefiting from renewable energy without future environmental risks.

He stressed that the project will constitute a fundamental pillar for the university to achieve and a basis for good management of human and material resources and rationalization of expenses by reducing the use of traditional fuel in generating energy. Al-Qudah explained the importance of installing solar cells, which were distributed in 110 locations within the university campus, which lies in insulating the roofs of the university buildings; the cost of which is estimated at approximately 2 million dinars, indicating that the university adopted the method of water and thermal

Amman, Dec. 15 (Petra) - The University of Jordan President, Dr. Abdul Karim Qudah, said that the solar energy project has reached 80 percent completion.

Qudah indicated in a statement on Tuesday that the university has reaped the first fruits of the project, with the King Abdullah II College of Information Technology and the College of Rehabilitation Sciences operating entirely on solar energy. He added that the project, which is expected to be launched in the coming months, will produce 16 megawatts of electricity annually, which will cover the annual financial value of the university and the hospital's electricity bill, which amounts to eight million dinars. Qudah explained that the project came within the university's strategy to make it an environmentally friendly university, by diversifying energy sources and benefiting from renewable energy without future

# 7 AFFORDABLE AND CLEAN ENERGY

- The University of Jordan (UJ) calculates carbon emissions according to the GHG Protocol Corporate Reporting Standard. Between 2019 and 2021, UJ reduced its carbon emissions by 50% by installing Jordan's largest solar PV system at any university, with a capacity of 16 MW. This system meets 100% of UJ's energy demand, effectively eliminating the need for imported electricity and reducing annual carbon emissions to zero.

The University of Jordan operates its own Environmental and Air Research Laboratory, which, in collaboration with its research partners, plays a key role in measuring and managing carbon emissions on campus.

# 7 AFFORDABLE AND CLEAN ENERGY

Established in 2013, the Master's program in Renewable Energy at the University of Jordan spans two years, providing students with 33 credit hours of core and elective coursework. The curriculum covers key areas like energy systems, efficiency, management, and renewable technologies, ending with a thesis. Graduates gain skills to tackle global energy challenges and pursue careers in renewable energy consulting, system design, project management, and academia.

The screenshot shows a web browser window with the URL `engineering.ju.edu.jo/ar/arabic/lists/programsSpecifications/school_progopic_last.aspx?prog=30&categ=12`. The page header includes navigation links: Accreditation, Other topics, Programs, Sections, About the college, and College. The University of Jordan logo and name in Arabic are on the right. A search bar is on the left. Below the header is a banner image with the text "Administrative offices" and "Program Specifications". The main content area is split into two columns. The left column is titled "MSc Renewable Energy / Program Overview" and contains the text: "About the Master's Program in Renewable Energy", "The program was established in 2013 and aims to provide students with the skills and knowledge necessary to meet the diverse challenges in the local, regional and global labor markets in the field of renewable energy. The Master's program in Renewable Energy extends over four academic semesters, for a total of two years, and includes a curriculum consisting of 33 credit hours", and "The graduate of the program is expected to be able to develop creative engineering solutions to the latest regional/global energy issues using effective and modern technical methods, demonstrate effective and modern technical knowledge in the field of specialization, have". The right column is titled "Program Specifications" and contains a list of links: Program Overview, Program details, Employment, Intended learning outcomes, Program Intended Learning Outcomes Matrix, Teaching and assessment strategies and methods, Software Quality Assurance, Study plan, and Practical and field training.

In 2017 the university prepared a tender for the design and installation of a 16 MW solar photovoltaic system that covers 100% of the university's electricity consumption. A special dedicated part of this tender mentioned that “Energy audit level II and thermal insulation of rooftops of all listed buildings in Zones 1 and 2 is required as part of the scope of work of this tender”. So, this tender asked for the energy audit for 87 buildings on the campus. The main outcome of these audits is focusing on improving the thermal insulation of the building envelope, which was done for the roofs of about 80 buildings (140,000 sqm). Moreover, the university is planning to replace all single glass windows for lecture halls with double glass. And finally, most of the diesel boilers used for space heating of lecture halls will be replaced by energy efficient reversible heat pumps, thus reducing fuel consumption and carbon emission

### PV Tender Overview

Subject: Invitation to Tender for the:

TENDER FOR DESIGN, ENGINEERING, SUPPLY, DELIVERY, INSTALLATION, TESTING, COMMISSIONING, CLEANING AND MAINTENANCE OF GRID-CONNECTED 16 MW AC PHOTOVOLTAIC SYSTEMS AT THE UNIVERSITY OF JORDAN, AMMAN, JORDAN

- The University of Jordan (UoJ) announces the start of the tendering process for the Design, Engineering, Supply, Delivery, Installation, Testing, Commissioning, Cleaning and Maintenance of Grid-Connected 16 MW AC Photovoltaic Systems at the University of Jordan.

Scope of Work

- The scope of the project is a nameplate of 16 MW AC generated using PV panel arrays without using any storage system. Two types of systems will be used mainly: rooftops with 12 MW AC capacity, and carparks with 4 MW AC capacity, using net-metering. The total university consumption (sum of all its distributed meters) is about 29 GWh annually.

# 7 AFFORDABLE AND CLEAN ENERGY

The University of Jordan's Aqaba branch launched a solar energy project costing 300,000 dinars to produce 500 kilowatts, saving 70% of its annual 350,000-dinar electricity bill. This project alleviates financial strain, allowing funds for future expansions. A second phase aims to achieve a zero electricity bill by adding another 350-kilowatt station.

Aqaba News Home

### University of Jordan branch in Aqaba switches to solar energy

The University of Jordan, Aqaba branch, has begun implementing the first phase of the project to produce electrical energy using solar energy at a cost of 300 thousand dinars with a production capacity of 500 kilowatts peak, which will save it 0 percent of the annual electricity bill of 350 thousand dinars.

The Commissioner of Environment and Regional Affairs at the Authority, Suleiman Najadat, stressed during his patronage of the project launch ceremony on behalf of the Chairman of the Authority, Nasser Al-Shraideh, that the University of Jordan, Aqaba Branch, constitutes a developmental tributary due to the pivotal role of universities in bringing about development. He pointed out that the energy challenge is the most prominent challenge facing the branch and drains most of its budget, praising the initiative adopted by the university administration.

# 7 AFFORDABLE AND CLEAN ENERGY

The university undergoes energy reviews monthly to keep track with the electricity and diesel energy bills, in addition to monthly reports of the productivity of the solar energy system to ensure it covers 100% of the demand. Moreover, the energy research team at the university have recently published a research paper titled " Impacts of COVID-19 on educational buildings energy consumption: case study of the university of Jordan" exploring the insights obtained from analyzing the energy bills before, during, and post the pandemic period, and how this can be helpful for the energy efficiency measure for different building's categories. It is also an indicator in its strategic plan.

### 3.3.3 Administrative buildings

The monthly electricity consumption in administrative buildings at the University of Jordan shown in Figure 10 shows a significant 30% decrease in the annual electricity consumption in 2020 compared to 2019, coinciding with the outbreak of the COVID-19 pandemic and the subsequent implementation of full lockdown in March and April followed by the rotational scheduling, where employees worked 1 day on and 1 day off. This led to a decrease in the number of employees present in the office, which reduced energy consumption. The seasonal energy consumption pattern was still evident in 2020, with higher consumption during summer and lower consumption during winter. These findings suggest that rotational scheduling can effectively reduce energy consumption in administrative buildings, which has positive implications for energy conservation and cost savings.

Figure 10

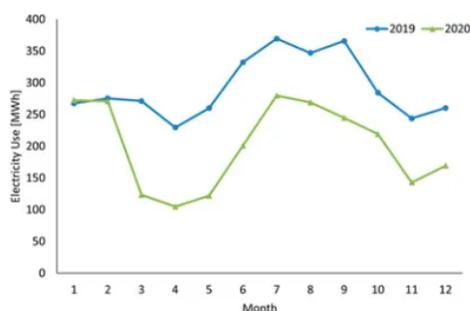

FIGURE 10. Monthly electricity use trends for the administrative buildings over 2019–2020.

# 7 AFFORDABLE AND CLEAN ENERGY

the University's annual electricity consumption has been increasing steadily due to the growing number of buildings, students, and services. At a high electricity tariff of 0.376 US \$/kWh, the resulting electricity bill amounts to roughly 10 million US dollars annually, placing considerable financial pressure on the University's annual budget. In response, the University has identified Renewable Energy and Energy Efficiency (RE & EE) as strategic objectives for the next decade. Specifically, the University has set an ambitious goal of achieving 100% electrical energy independence, primarily through renewable solar energy via photovoltaic (PV) panels. In 2017, a tender was prepared for the Design, Installation, and Maintenance of Grid-Connected 16 MW AC Photovoltaic Systems at the University of Jordan to meet the annual electricity needs of the University. The contract award was 22.5 million USD. And the payback period of this investment is less than 3 years.

## Jordan University, JEPSCO start operating solar energy systems on campus

By JT - Jul 25, 2021 - Last updated at Jul 25, 2021

Share 0 Tweet 0 googleplus 0 in Share 0 Email 0

AMMAN — The University of Jordan and the Jordan Electric Power Company (JEPSCO) on Sunday signed an agreement to start operating the solar energy systems in the university.

The project, the largest solar panel installation on rooftops in the Kingdom, will generate some 16 megawatts a year, which would cover the university and the university hospital's electric bill of JD8.5 million a year, the university president, Abdulkarim Qudah, said.

The solar panels have been distributed on 110 sites inside the campus, at a cost of JD2 million, the Jordan News Agency, Petra, reported.

Highlighting the importance of the project, Hassan Abdullah, general manager of JEPSCO, said that the project will feed three main stations inside and nearby the university.

# 7 AFFORDABLE AND CLEAN ENERGY

UJ has Association of Energy Engineers which is a non-profit organization dedicated to the field of energy in general and specifically the sustainable energy. The organization aims to spread scientific awareness in the society about the importance of energy and the correct use & preservation methods through training workshops and field visits, in addition to the informative sessions from the branches around the world - in our case the University of Jordan. It is also interested in student societies and industrial environments. And aimed at strengthening the work on sustainable development in the communities. In addition The ASHRAE Jordan Chapter in partnership with the Jordanian Engineers Association (JEA) had held a scientific lecture to all engineers in the community to attend. The speaker highlighted innovative design strategies and eco-friendly construction materials that significantly reduce energy consumption in the country's buildings

"Jordanian" Scientific Day for the Energy, Water and Environment Center

University of Jordan News (UJ News) Sanaa Al-Samadi

The Vice President of the University of Jordan for Scientific Colleges Affairs, Dr. Reda Al-Khawaldeh, said, "The University of Jordan has a role in providing the energy sectors with specialized and qualified cadres who have sufficient experience to solve the energy problem in Jordan."

During the opening of the scientific day for the renewable energy master's project, Al-Khalayleh pointed out the university's interest in supporting and assisting national efforts in facing the challenges of the energy sectors in light of the increasing rise in oil derivatives prices globally.

According to the Director of the Water, Energy and Environment Center at the University, Dr. Ahmed Al-Salaymeh, the scientific day organized by the center as part of the university's celebrations of the fiftieth anniversary of its founding aims to introduce students to the uses of renewable energy, spread awareness of the concept of rationalizing energy consumption, and communicate with the private sector and companies concerned with renewable energy.

Al-Salaymeh pointed out that the day includes holding lectures and workshops on the uses of renewable energy, how to save energy, and training students on energy efficiency.

In a related context, the Director of the Regional Office for European Union Projects in Aqaba, Dr. Ismat Karadshah, reviewed the funding programmes offered by the Union in the fields of water, energy and environment.

For her part, the Director of the "Edama" Association for Energy, Water and Environment, Hala Zawati, announced during the scientific day the opening of the first branch of the association within the University of Jordan under the title "Edama U" to contribute to spreading awareness among students about the topics of energy, water and the environment.

Zawati explained that the "Edama" Association is a non-profit business association concerned with the sustainability of energy, water and the environment.

On the sidelines of the scientific day, Dr. Al-Khalayleh opened the exhibition specializing in renewable energy with the participation of a number of private sector companies concerned with rationalizing energy, environment and water consumption.

It is noteworthy that the Master's Program in Renewable Energy at the University of Jordan is the first of its kind in Jordan, and the number of its students is (11) male and female students. The program's topics focus on renewable energy sources, how to increase the efficiency of renewable energy, and the laws and regulations related to energy sources and their management.

April 10, 2022

ETC Universities "Webinar"

- The Electrical Training Center (ETC), in cooperation with the University Energy Committees of the AEE Foundation, is pleased to invite you to attend a scientific seminar entitled: "ETC Universities Webinar".

We are honored by the presence of all interested university students and faculty members. The seminar aims to introduce university students and teaching staff to the unique opportunities offered by the Electrical Training Center, in addition to discussing some practical topics of interest to students.

The Electrical Training Center (ETC) is a division of the National Electric Power Company (NEPCO) and is a leading training center that provides engineers and technicians with high quality training using real equipment and experienced field trainers. The center trains electricity sector cadres and interested university students from inside and outside Jordan.

Speakers:

- Eng. Amer Shadifat, Director of the Electrical Training Center - Introduction to the Training Center.
- Engineer Mohammed Al-Dalabeeh about the training center's courses for students.
- Engineer Ahmed Abu Ghazal on power transformers.
- Eng. Faisal Abu Zaid. "Moderator"

Monday 4/11  
9:45 - 11:00 PM

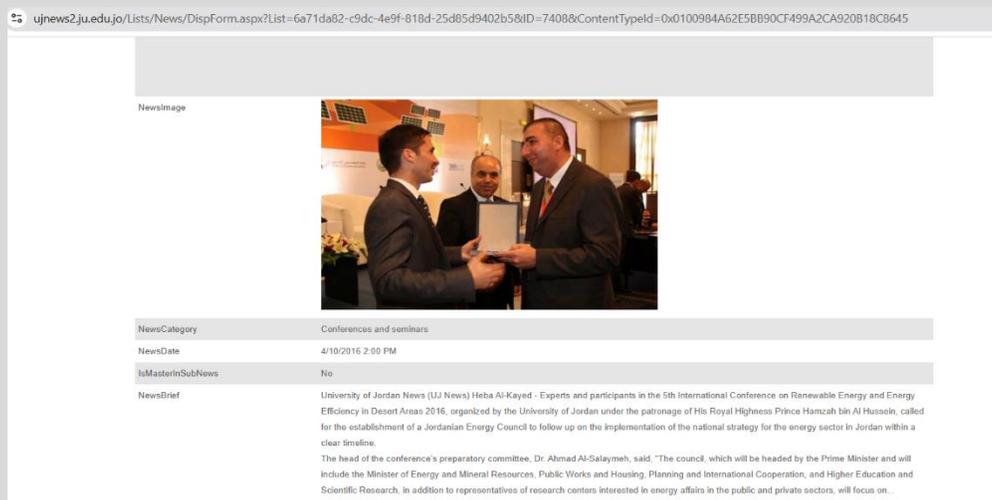

Registration and attendance link:

# 7 AFFORDABLE AND CLEAN ENERGY

- At the 5th International Conference on Renewable Energy, experts urged creating a Jordanian Energy Council to oversee the national energy strategy. They recommended boosting renewables to 10%, investing in solar and bioenergy, updating lighting, converting biomass to energy, and addressing solar panel maintenance. The event gathered global experts to discuss energy solutions for Jordan.

- The University of Jordan hosted the closing conference for the EU-funded "Eco-Car" project, a vocational training initiative on electric and hybrid vehicles under Erasmus Plus. Dr. Nazir Obeidat highlighted the project's role in aligning with the university's goals to develop specialized skills for the labor market. Supported by the Ministry of Energy's strategy to promote renewable energy and reduce emissions, the project established diplomas, training workshops, and labs. Experts from Jordanian and European universities discussed advancements in sustainable transport, aiming to shape the future of eco-friendly vehicle technology.

NewsCategory	University community
NewsDate	1/31/2019 10:35 AM
IsMasterInSubNews	No
NewsBrief	Amman, January 30 (Petra) - Minister of Energy and Mineral Resources Hala Zawati and President of the University of Jordan Dr. Abdul Karim Qudah signed on Wednesday a grant agreement worth JD70,000 provided by the Jordan Renewable Energy Fund to provide the Stem Cell Center with solar cell systems with a capacity of 125 kilowatts. Zawati, who chairs the Board of Directors of the Jordan Renewable Energy Fund, said in a press statement following the signing, which was attended by the Director of the Stem Cell Center at the University Dr. Abdullah Al-Awidi Al-Abbadi, that the agreement comes within the framework of the Ministry of Energy and Mineral Resources' support for the scientific research development sector and encouraging renewable energy applications in the academic and medical sectors.

The University of Jordan collaborates with the government on clean energy and energy-efficient policy development. Its Sustainability Policy aligns with local and international Sustainable Development Goals (SDGs), focusing on climate change, water conservation, and social impacts. Applicable to the entire University community, the policy is reviewed and updated annually to ensure its effectiveness.

### Smart Control Systems For Energy Management: New Master Degree (SEM-SEM)

PROJECT WEBSITE

**Smart Control Systems for Energy Management**

This project main objective is to increase public awareness and utilization of renewables, promote for energy saving and management, as well as develop new research areas in those fields. Based on surveys and questionnaires from previous projects Clean Energy and Research in Environmental Studies (CERES)(517401-TEMPUS-1-2011-1-ESTEMPUS-JPCR) and Master on Sustainable development and Renewable energy (MANSUR) (511069-TEMPUS-1-2010-1-IT-TEMPUS-JPCR), a solid conclusion for the establishment and developing a training course and a master program was evident. The project will have a broad scope of goals which targets academic, industrial and civilian sectors, and the consortium partners. On the academic level, 4 universities from EU, namely: SU, UNIOVI, IST and UCY Universities and along with 4 Universities, namely: AAST, ASU, HU, NU and 3 Jordanian Universities: University of Jordan, Mutah university and JUST are to work on the preparation of the new MSc degree and training program. Being supported by Knowledge Transfer Partnership (KTP) in UK, KTP will help spreading the business and technical skills to academia and at the same time enhance research opportunities thus bridging between universities and industry. On the industrial level, ALEXSEEDS is a leading company specialized in a variety of food

### Vocational Training Diploma On Electrical And Hybrid

PROJECT WEBSITE

**ECO-CAR**  
Vocational Training Diploma on Electrical and Hybrid Vehicles

The **primary purpose** of this project is to develop the capacities in the field of Electrical and Hybrid cars in Jordan, and bring together and strengthen the cooperation between companies and HEIs through the empowering the engineers with needed skills in that meet the market need. This include providing specialised engineers to work in servicing and maintaining EV/HEV companies and also providing the vocational training centres with qualified trainers to graduate qualified technicians that able to meet market needs.

**The specific objectives are:**

- Establish a collaboration Network between HEIs, enterprises, and Vocational training centres;
- Capacity building for academic staff on recent Electrical and Hybrid vehicles and new teaching methodologies (i.e. blended learning), to let them acquire the needed knowledge and skills to teach the diploma.
- Accredited Professional Vocational and career oriented diploma on EV/HEV targeting engineers with the true integration of enterprises and Vocational training

The University of Jordan Innovation and Entrepreneurship Center's Green Innovation Fund plays a crucial role in supporting innovations and startups. This initiative champions sustainability by offering grants and funds to startups and initiatives focused on the green technology sector. By supporting innovative projects in renewable energy, eco-friendly solutions, and low-carbon practices, the center not only fosters entrepreneurship but also contributes to the global goal of ensuring access to affordable, reliable, and clean energy for all. The Green Innovation Fund at the University of Jordan is a beacon of hope, inspiring the next generation of eco-conscious entrepreneurs and driving forward the sustainable energy agenda. This event took place in November of 2021.

# 7 AFFORDABLE AND CLEAN ENERGY

## Challenges and Areas of Improvements

**The University of Jordan** is actively working towards achieving Sustainable Development Goal 7 (Affordable and Clean Energy) by implementing various innovative measures aimed at promoting renewable energy and improving energy efficiency. One of its primary strategies is the installation of solar panels across campus buildings to harness clean and renewable energy, thereby reducing reliance on fossil fuels and lowering energy costs.

To enhance energy efficiency, the university is introducing solutions such as upgrading building insulation to minimize heat loss, using double-glazed windows, and replacing traditional lighting with energy-efficient LED systems. Smart building automation systems are also being deployed to optimize the use of electricity, heating, and cooling. Additionally, solar-powered water heating systems are being integrated into institutional and residential facilities, promoting sustainable energy use.

The university is also addressing transportation-related emissions by making bicycles more accessible for students and staff. These bicycles can be used for commuting between faculties, offering a convenient and eco-friendly alternative to motorized transport. Furthermore, the university is exploring the introduction of electric buses to reduce carbon emissions, improve energy efficiency, and support sustainable mobility within and around the campus.

Urban greening initiatives, such as rooftop gardens and green walls, are being encouraged to improve building energy efficiency and mitigate the urban heat island effect. Additionally, wind energy is being considered for rural areas where space constraints are less of a challenge. The combination of solar and wind energy ensures a balanced and reliable energy mix.

The University of Jordan's comprehensive approach extends beyond its campus, serving as a model for sustainable practices. By implementing these measures, the institution not only contributes to achieving SDG 7 but also fosters a culture of environmental responsibility and innovation, paving the way for a cleaner, more sustainable future.

**SDG 8: Good Jobs and Economic Growth** promotes inclusive and sustainable economic growth, full employment, and decent work for all. This goal emphasizes fair wages, labor rights, and safe working conditions as key drivers of economic stability and improved quality of life.

### **SDG 8 at the University of Jordan**

**The University of Jordan supports SDG 8** through fair wage policies, ensuring all staff and faculty are paid at least the local living wage. UJ recognizes labor rights, allowing freedom of association and collective bargaining for all employees, including women and international staff. The university's policies on non-discrimination and equal treatment further reinforce its commitment to fostering an inclusive and equitable workplace, aligning with the core principles of SDG 8.

- **UJ has instructions about salaries and allowances for employees of the University of Jordan issued in accordance with Article No.25 of the Jordanian Official Universities Law No. 42 of 2001. The basic salaries of faculty members, administrative and technical staff at the university, the grades and categories of these salaries, and the sequence of their increases are determined according to the salary scale. Those in charge of administrative responsibilities at the university shall be paid a management allowance, and faculty members shall be paid a specialization allowance equivalent to (135%) of their basic salaries. Administrative employees who have completed two years of university service are paid an additional bonus, and for employees who have not completed two years of university service, an additional bonus of (25%) of the basic salary is paid. A monthly transportation allowance and family allowance for each kid are paid to all university employees.**

### Salaries and Allowances System for Employees at the University of Jordan / Issued pursuant to Article (25) of the Jordanian Official Universities Law No. (42) of 2001

#### Article 1

This system shall be called (The Salaries and Allowances System for Employees at the University of Jordan for the year 2002) and shall be effective from the date of its publication in the Official Gazette.

#### Article 2

Salaries - Article 2

The salaries of faculty members, administrative and technical employees at the university, the grades and categories of these salaries, and the sequence of their increases shall be determined - according to the following salary scale - A - Faculty members Rank Category Salary Annual increase From to In dinars

## Details of the unified salary and allowances system in Jordanian universities

Responsible sources in higher education confirmed

that the council is about to approve a unified system for salaries and allowances for employees in Jordanian universities. According to the sources, the system will address the issue of brain drain that Jordanian universities are suffering from due to the economic conditions that university employees are suffering from

A semi-final version of the system is still under study in the corridors of the Higher Education Council, as information indicates that Dr. Wajih Owais, Minister of Higher Education and Scientific Research, is determined to approve generous increases for faculty members in implementation of the royal directives to the government to raise the standard of living for university employees

According to the system, the details of which state that the system approves an increase in the basic salaries of employees with a minimum of 30 dinars for each rank and degree, and there is an increase in the specialization allowance from 135% to 160%. The system also maintained the granting of the parallel allowance so that it does not exceed 30% of the total revenues for parallel and non-regular programs

The system of salaries and allowances for employees in official Jordanian universities issued pursuant to Article ( ) of the Jordanian Universities Law No. (23) of 2009

Article 1 This system is called (The system of salaries and allowances for employees in official Jordanian universities for the year 2011) and shall be effective from the date of its publication in the Official Gazette

#### Salaries

Article 2 - The salaries of faculty members, administrative, technical and professional employees at the university, their salary grades, categories and sequence of increases shall be determined according to the following salary scale

- A- Faculty members

Rank Category	Salary	Annual increase
Professor	401 851	15
Associate Professor A	391 439	12
B	306 354	12
Assistant Professor A	301 341	10
B	249 289	10
Lecturer A	222 264	7
B	185 207	7

**Financial Affairs Unit**

Distinguished financial management that keeps pace with technological and economic development to achieve the university's goals

**PHOTO GALLERY**

**ADVERTISEMENTS**

**Overtime**

Overtime for full-time faculty members and lecturers

Full-time faculty members and lecturers are assigned to carry out additional teaching by a decision from the University President and based on the recommendation of the Department Head and the General Registrar. The number of credit hours for additional teaching may not exceed six credit hours. In special cases, as determined by the University President, this number may be increased to nine hours.

Overtime work for full-time faculty members and lecturers is as follows

Teaching: Assigning a faculty member to teach an additional load that exceeds his scheduled load.

Supervision: The assignment to supervise university theses is as follows

- Sole supervision: One faculty member is assigned to supervise a specific student, in which case one credit hour is calculated for him as additional work instead of supervision
- Joint supervision: Two full-time lecturers participate in supervising the student, in which case each of them is calculated for half a credit hour as additional work instead of supervision

- **The University of Jordan recognizes unions and labor rights, including freedom of association and collective bargaining for all staff, including women and international personnel. This commitment is reflected in the university's policies and supported by initiatives from the Jordan Engineers Association and local news coverage.**
- The Jordan Engineers Association (JEA) joined the University of Jordan's Science and Graduate Day at the College of Engineering. JEA President Ahmad Samara Al-Zoubi praised the partnership with the university, highlighting its role in producing skilled engineers for the local and global markets. JEA's social initiatives, like "Fazaa Ahl" for housing renovations and support for public universities, were also showcased. The event featured workshops on engineering challenges and skills development, with JEA presenting its services for engineers in a job fair.

- Dr. Mahmoud Maharmeh from the University of Jordan visited the University of Gothenburg (UG) in Sweden as part of an academic exchange. During the three-week visit, he engaged with UG nursing faculty, gave lectures on nursing in Jordan, visited local healthcare facilities, and explored research collaboration. Dr. Maharmeh valued the visit for its role in enhancing educational and cultural ties between the two institutions.

**The University of Jordan (UJ)** upholds a strong policy of non-discrimination against women, reflected in its Code of Conduct for faculty members, administrative staff, and students. This Code of Conduct for Students was issued by the Council of Deans in 2017, while the Code for Faculty Members emphasizes that educators must respect students' rights and treat them fairly, impartially, and without discrimination based on race or gender. UJ's Strategic Plan incorporates values such as Integrity, Transparency, Fairness, Tolerance, Openness, Loyalty, Civic Engagement, and Good Governance, ensuring these principles are embedded in its objectives.

Additionally, UJ has established Regulations concerning staff systems and salary structures. Regulation No. (52) of 2003 categorizes university employees into classified and contracted roles, defining the terms for salary, bonuses, and other employment conditions. To promote pay equity, UJ is committed to measuring and eliminating gender pay gaps, ensuring that faculty and administrative staff are compensated based on their experience and qualifications, irrespective of gender, religion, or background. Regulation No. (114) of 2002 outlines the salary and bonus system, reaffirming the university's commitment to equitable compensation practices. The university's policies have been consistently reviewed, with emphasis on maintaining non-discrimination in salary decisions.

## 8 GOOD JOBS AND ECONOMIC GROWTH

### Challenges and Areas of Improvements

**The University of Jordan** is advancing SDG 8 by fostering entrepreneurship through startup incubators, hackathons, and innovation workshops while collaborating with local and global industries to provide internships, training, and research opportunities. The university seeks to inform students about new opportunities and vacancies and engages with local and international firms to explore opening new markets and creating jobs. It supports marginalized groups, including women, refugees, and students with disabilities, through scholarships and mentorship programs, and ensures fair employment practices for its staff. By offering vocational training in high-demand fields like IT and renewable energy and promoting green jobs aligned with sustainability goals, the university equips students for emerging sectors. Lifelong learning programs and online certifications enhance competitiveness for alumni and local communities, while seminars and campaigns raise awareness about ethical labor practices and decent work standards, reinforcing its commitment to inclusive and sustainable economic growth.

**SDG 9: Industry, Innovation and Infrastructure:** highlights the importance of resilient infrastructure, inclusive industrialization, and innovation as key components for economic growth and accessibility while promoting environmental sustainability.

**The University of Jordan** aligns with SDG 9 by integrating research and industry partnerships to advance innovative practices and sustainable infrastructure, thereby addressing community needs and fostering regional development.

- **The University of Jordan (UJ) has contributed significantly to Sustainable Development Goal 9 (SDG 9) through various research publications, including:**
  1. "An Impact of Smart Traffic Sensing on Strategic Planning for Sustainable Smart Cities" - This paper discusses how smart traffic sensing can enhance sustainable urban planning.
  2. "Exploring the Relationships Among Tacit Knowledge Sharing, Mentoring, and Employees' Abilities: The Case of Al-Hikma Pharmaceutical Company in Jordan" - This study analyzes the impact of knowledge sharing and mentoring on employee capabilities in the pharmaceutical sector.
  3. "Fintech in COVID-19 and Beyond: What Factors Are Affecting Customers' Choice of Fintech Applications?" - This research explores customer preferences for fintech applications during and after the COVID-19 pandemic.

- The "Smart Traffic Sensing Approach for Smart Cities" study focuses on smart governance in smart city networks, particularly in traffic management. It presents two key contributions:
  1. It addresses the limitations of conventional traffic lights and explores the challenges and opportunities of traffic sensing technologies.
  2. It introduces the Smart Traffic Sensing Approach (STSA), which uses ultrasonic-acoustic and biosensors integrated with LED solar cells to manage vehicle flow at intersections.

This technology reduces energy use, alleviates congestion, and enhances monitoring of mobile phone violations. Overall, STSA supports smart city infrastructure development and promotes sustainable urban growth.

- The study **"Exploring the Relationships among Tacit Knowledge Sharing, Mentoring, and Employees' Abilities"** examines how tacit knowledge sharing and mentoring influence employees' skills in problem-solving, adaptability, and innovation at Al-Hikma Pharmaceutical in Jordan. Findings show that while tacit knowledge sharing improves adaptability and creativity, mentoring enhances all skills and mediates the effect of knowledge sharing on abilities. This highlights the value of mentoring and knowledge-sharing in boosting organizational performance.

### Abstract

**Purpose**  
This study aims to assess the relationships among tacit knowledge sharing, mentoring and employees' abilities in the areas of solving the work problems, adaptation to environments and creation of new innovative ideas.

- The study, "[FinTech in COVID-19 and Beyond: What Factors Are Affecting Customers' Choice of FinTech Applications?](https://doi.org/10.3390/joitmc6040153)", explores how FinTech applications help build resilience during crises like COVID-19. Analyzing survey data from 500 Jordanians, it finds that perceived benefits and social norms significantly influence FinTech adoption, while perceived risks do not. Customer trust also mediates the relationship between perceived risks and usage intention. The study recommends that FinTech providers focus on user-friendly, secure solutions to foster trust and increase adoption.

## FinTech in COVID-19 and Beyond: What Factors Are Affecting Customers' Choice of FinTech Applications?

by Mohammad K. Al nawayseh

MIS Department, Business School, the University of Jordan, Amman 11942, Jordan

*J. Open Innov. Technol. Mark. Complex.* **2020**, *6*(4), 153; <https://doi.org/10.3390/joitmc6040153>

**Abstract**

Accessing financial services is considered one of the main challenges facing communities during crises. This research studies the role of using FinTech applications to build resilience during the COVID-19 pandemic. The research empirically examines the factors affecting Jordanian citizens' intention to use FinTech applications. The sample of the research comprised 500 potential FinTech service users in Jordan. Based on the research conceptual model, five hypotheses were developed and tested using structural equation modeling techniques (SEM-PLS). The research results indicate that perceived benefits and social norms significantly affect the intention to use FinTech applications. However, it has been found that perceived technology risks do not significantly affect the intention to use FinTech applications. Moreover, the results also indicate that customer trust is significantly mediating the relationship between perceived risks and intention to use FinTech applications. FinTech service providers should insure that their products are easy to use, fulfill needs and protect consumers' data in order to ensure trust, hence positively influencing consumer adoption.

- At the Government Communication Forum, University of Jordan President Nathir Obeidat highlighted UJ's global ranking of 268th and 110th in graduate employability. He discussed the university's strategic focus on technological education and infrastructure upgrades, noting that 180 out of 500 classrooms and labs have been improved, with plans for completion by mid-2025.

- **The Department of Infrastructure and Networks at the University of Jordan** provides essential services to maintain and enhance the university's internal network. Key responsibilities include:
  - **Network Maintenance:** Configuring and managing both wired and wireless networks, ensuring robust internet connectivity with a capacity of 350 Mbps across campus.
  - **E-Mail Services:** Offering and overseeing email services for faculty and students.
  - **Security Systems:** Implementing advanced surveillance and electronic access control systems, including a Next Generation Firewall for data protection.
  - **Data Management:** Establishing a backup system for critical data and migrating servers to a Virtual Private Cloud environment.
  - **Student Services:** Integrating student IDs with electronic access systems and facilitating online payments.
  - **Communication Services:** Operating university radio stations and providing video conferencing capabilities.

The department also focuses on expanding network infrastructure, enhancing connectivity in new buildings, and ensuring the availability of internet services across the campus and off-campus units.

### Infrastructure and Networks Department

The Infrastructure and Networks Department is responsible for overseeing the wired and wireless networks infrastructure operations. It consists of two sections, the Wired and Wireless Networks Section and the Internet and Safety Section.

#### The Department follow-up and executes the following tasks:

- (1) Develop the existing wired network by replacing the sub and main switches with modern ones and of greater capacities and competence.
- (2) Provide internal networks for the most important buildings in the University and provide backup paths.
- (3) Provide connectivity service for buildings under construction (Faculty of Arts, the Admission and Registration building, Faculty of Rehabilitation Sciences, housing, Jerash and Ammon student housings).
- (4) Preparation of additional computer labs to meet the needs of greater number of students and conduct more computerized examinations.
- (5) Follow-up on internal network administration software to detect faults and bottlenecks.
- (6) Networking with off-campus units (Faculty of Physical Education, Agricultural Research Station in Jordan Valley) and provide those units with Internet service.
- (7) Installation of new lines.
- (8) Provide wireless internet in classrooms, hallways and students gathered points to serve the students and faculty.
- (9) Provide fixed and wireless phone services through the university network.
- (10) Provide Internet service through two tracks, the major university network and the alternative network (Telecommunications Company).
- (11) Networking the horizon - Library project.
- (12) Provide Cache Engines to improve network efficiency and speed the exchange of information for Internet users.
- (13) Provide video-conferencing service via the internal and external networks.
- (14) Provide protection and Internet security, through the application of network safety tools.

• **The Industry Liaison Unit** at the Faculty of Engineering and Technology aims to foster collaboration between academia and industry, offering services to various industrial sectors, including large, medium, and small companies. Established in 1992 with the support of USAID, the unit conducts seminars, workshops, and training programs for industry professionals and facilitates consultations and research by faculty members. Its goals include:

1. Promoting the university's engineering capabilities to industry.
2. Connecting faculty with industry to identify and address challenges.
3. Finding training and project opportunities for engineering students.

Key achievements include organizing training courses, expert meetings, and industrial consultations, and developing partnerships with various institutions. The unit also supports student career development through job placements and organizing career days. It has initiated projects like "Doctor for Every Factory" to enhance industry support and recently expanded its reach by collaborating with multiple local and international partners.

Industry Liaison Unit/Faculty of Engineering and Technology The policy of the Industry Liaison Unit is to contribute to creating a cooperative climate among those interested in industry from industrial companies, consulting companies and scientific research centers. The unit provides its services to all sub-sectors in industry, including large, medium and small companies. These services include seminars, workshops and training programs directed at managers, engineers and senior technicians to develop their skills and competencies. The unit also provides consultations and research conducted by professors from the Faculty of Engineering and Technology at the University of Jordan, assisting and encouraging the participation of experts from industry and industrial service companies to form a cooperative network that provides the best support within its goals and aspirations for industry. The Industry Liaison Unit was established in 1992 in cooperation with the United States Agency for International Development to promote and disseminate the concepts of industrial engineering and link the university with industry. Its services later developed to contribute to industrial development through industrial, mechanical, chemical, electrical, communications, mechatronics, computer engineering, civil and architectural engineering. Since its establishment, the unit has been able to provide engineering services and activate and apply engineering and administrative concepts in industry, which has contributed to raising the level of performance in a number of industrial and production institutions. The objectives of the Industry Liaison Unit upon its establishment are summarized in: - 1- Introducing the industry to the capabilities available in the College of Engineering from engineering professors, laboratories and equipment. 2- Introducing professors in the College of Engineering and Technology to the industry and creating links and communication between professors and the industry and identifying and defining the problems of the industry and the points that need to be developed and implementing programs and means that will help the industry overcome weaknesses and engineering and administrative problems. 3- Assisting in finding training opportunities for students of the College of Engineering and Technology and developing graduation projects in the industry to serve industrial companies and others and provide companies with their need for graduates of the College of Engineering and Technology. These objectives have developed to also include: - 4- Introducing the industry and providing services in the field of modern technology and scientific engineering developments. 5- Contributing to creating a cooperative climate among those interested in the industry from industrial companies, consulting companies and scientific research centers. Unit achievements: - • Organizing an expert meeting on small industries where working papers were presented by the Industry Liaison Unit, the Ministry of Industry, the Oman Chamber of Industry, the Vocational Training Corporation, the Industrial Development Bank, the Economic and Social Commission for Western Asia (ESCWA), the Near East Foundation and the Engineers Syndicate. • Organizing several training courses and workshops, including contractual courses for companies from the public and private sectors. • Conducting several field visits to industrial establishments to promote the activities of the Industry Liaison Unit, and to identify the various problems facing these establishments to take appropriate measures. • Implementing several industrial consultations, including (Ministry of Public Works and Housing, Petra Engineering Industries Company, Modern Jordanian Cables Company, Jordan Cement Factories Company in cooperation with the Royal Scientific Society, Jordan Paper Bags Company, Al-Jaafar Modern Industries Company, Solidarity Group Company, Al-Zay Ready-Made Garments Company, International Mold Manufacturing Company, Jordanian Armed Forces, Royal Air Force, Public Security, Ministry of Industry and Trade, Jordan Phosphate Mines Company, Al-Mashreq Hotel and Tourism Projects Company, etc.) and submitting many proposals for other consultations. • Holding a specialized conference to exchange views entitled "Developing the Industrial Sector for Prosperity". The aim of this conference was to conduct a dialogue between industrial investors in the private sector, the government sector and the academic sector about the obstacles facing the industrial sector in addition to providing participants with administrative skills and explaining their impact on developing industrial products and informing them of the experiences of Taiwan and Malaysia in developing the industrial sector in their countries. • Holding a course for the Arab Cement Union entitled Programmable Logic Controllers, attended by (22) participants from various Arab countries. • Holding a course on "Change Management" in cooperation with ESCWA and the Friedrich Ebert Foundation. • The Industry Liaison Unit won the El Hassan Bin Talal Award for Scientific Excellence (second prize) in 1997. • The Unit, in cooperation with Lloyd's Register, held a workshop for fifth-year students from the Faculty of Engineering and Technology. The course was part of the activities to raise the efficiency of graduates from the Faculty of Engineering and Technology and pave the way for them to serve the community with high efficiency and ability. • The Unit signed a comprehensive cooperation agreement with the Ministry of Public Works and Housing to train the Ministry's staff at the University of Jordan. The training program included engineers, administrators, and technicians. In addition, all engineering, administrative, and technical consultations were provided to the Ministry. • The Unit, in cooperation with the Ministry of Industry and Trade, held a specialized course on how to calculate the added value in local industries. • The Unit, in cooperation with the Ministry of Foreign Affairs, held a specialized course in the field of computer programs and Microsoft Office programs. • Carrying out several laboratory tests and analyses for different companies in cooperation with the laboratories of the chemical and mechanical engineering departments at the university, including: - Al-Qawafil Industrial Agricultural Company - Mas Al-Arab Company - Overseas Company - Mashhad Agricultural Company • The unit held several training courses outside Jordan, in Saudi Arabia, Qatar, and the

### DEPARTMENT LOCATION

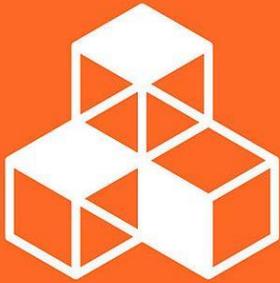

### About the Department

The Maintenance Department was established in 1964 to maintain and repair the infrastructure and superstructure of the university buildings and various facilities, preserve their sustainability, and create a healthy environment of a distinguished level for all its student, teaching, and administrative bodies to enable them to perform their duties to the fullest extent, through the following

- Re-modernizing and rehabilitating buildings and manufacturing wooden furniture and - all types of carpentry
- Manufacturing doors, protective nets, iron and aluminum facades for all colleges of - the university campus and its facilities
- Maintenance of electrical and electronic devices and scientific devices -

...More

- A delegation from the University of Jordan's Faculty of Engineering met with the USAID-funded Water Infrastructure Project and CDM Smith to discuss water systems design and wastewater treatment. They emphasized collaboration to train engineering students, aligning research with market needs. Plans are underway to sign an agreement between the University and the Ministry of Water and Irrigation to enhance student skills through targeted training.

### Jordan Water Infrastructure Project Team Visits The Faculty Of Engineering At UJ

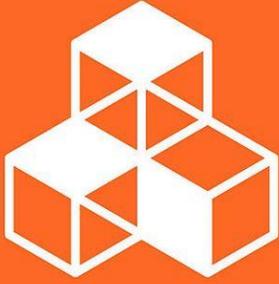

University of Jordan News (UJ News) - Yesterday, Sunday, a team from the Faculty of Engineering at the University of Jordan, represented by its Dean, Dr. Munawwar Al-Tarakeh Al-Abbadi, his Assistant for Training and Graduate Affairs, Dr. Asid Matar, and the Head of the Civil Engineering Department, Dr. Rabab Al-Lawzi, met with the USAID-funded Water Infrastructure Project team in Jordan, represented by Engineer Akram Al-Qahwi, and the project team from "CDM Smith", represented by its Director, Cecile Tibiol, and the Project Capacity Building Task Manager, Engineer Yazan Al-Abbadi

# 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

## Challenges and Areas of Improvements

**The University of Jordan** is committed to advancing SDG 9 (Industry, Innovation, and Infrastructure) through innovative strategies. This includes developing research and innovation hubs focused on emerging technologies like AI, renewable energy, and sustainable infrastructure. The university plans to promote STEM education, expand partnerships with local and international industries, and support students in launching startups through mentorship, funding, and resources. The campus itself will be transformed into a living laboratory for smart and sustainable infrastructure, with the use of IoT, green technologies, and energy-efficient systems. Furthermore, the university will enhance digital transformation by offering training in blockchain, machine learning, and big data, while supporting public-private partnerships for real-world infrastructure projects. Students will engage in hackathons, design modular and flexible spaces, and participate in global workshops, all fostering industry connections and developing practical solutions for smart cities. Initiatives like a sustainability incubator, VR/AR labs, and green roofs will provide hands-on experiences and foster collaborations across disciplines. These efforts will equip students with the skills needed for future industries and contribute to the university's leadership in innovation and sustainable development.

# 10 REDUCED INEQUALITIES

**SDG 10: Reduced Inequalities** seeks to promote inclusion and reduce inequalities within and among countries by eliminating discrimination and ensuring equal opportunities for all, regardless of background or status. It emphasizes empowering marginalized groups and creating fair access to resources, aiming to leave no one behind.

**The University of Jordan (UJ) aligns with SDG 10** by implementing policies and programs aimed at reducing inequality and promoting inclusivity on campus. UJ enforces a non-discriminatory admissions policy based on GPA, accepting students without bias related to gender, religion, or ethnicity and providing direct admission options for international students. UJ actively tracks the enrollment of underrepresented groups, such as ethnic minorities, low-income students, women, disabled students, and refugees, ensuring fair access to higher education. Furthering this mission, UJ has policies to recruit and support students and staff from diverse backgrounds, including specialized admission pathways for refugees and students with disabilities. The university also provides accessible facilities, anti-discrimination policies, and a dedicated diversity office to support an inclusive learning environment. Through these efforts, UJ demonstrates a commitment to equality and the goals of SDG 10.

- Students in Jordan are accepted in regular program based on their Tawjihi (GPA) without discrimination based on gender, religion, or race. The University of Jordan's Parallel and International Programs accept Jordanian, Palestinian, children of Jordanian women, and international students, requiring certificate equivalency verified by Jordan's Ministry of Education. Admission is GPA-based, with minimum thresholds varying by program, such as 85% for Medicine and Dentistry. Community college graduates are also eligible if they meet specific GPA requirements. Applications are submitted online, with fees paid through local banks or eFAWATEER.com. Accepted students must provide authenticated documents, complete personal data, and take proficiency exams in Arabic, English, and computer skills. Once completed, they receive their schedule and university ID.

The image is a screenshot of the website 'registration.ju.edu.jo/home.aspx'. The page features a purple and white logo for the Admission and Registration Unit, which includes a clock and two stylized figures. Below the logo, it states 'Admission and Registration Unit' and 'More than (55) years of experience inherited by the Admissions and Registration Unit staff to serve students'. To the right is a large banner image of a university campus with a clock tower, overlaid with the text 'Majors and university fees'. Below the banner are two blue navigation bars: 'REGISTRAR GENERAL'S WORD' and 'Admission and Registration Services'. The 'REGISTRAR GENERAL'S WORD' section shows a portrait of Dr. Ashraf Al-Adwan, Registrar General. The 'Admission and Registration Services' section includes a 'Public Services' tab and a grid of 12 service icons with labels: 'Accepting foreign certificate holders', 'Bridging Community Colleges', 'Calculate your GPA', 'University Calendar', 'Student Registration System', 'Submit a Bachelor's Application', 'Material holders', 'Description of', 'Study plans', 'Transfer from', 'Transfer to the', and 'Document'.

**Parallel/International Program Admission**

Conditions for admission to the Parallel and International Programs for obtaining a bachelor's degree:

**First: Certificates and Nationalities Allowed to Apply for the Parallel and International Programs:**

Program	Student Nationality	Certificate Nationality	Special Conditions	Currency
Parallel Program	Jordanian	Jordanian, Arab, and Foreign	Foreign certificates need Jordanian Ministry of Education's equivalence. Arab certificates need authentication or equivalence from the Jordanian Ministry of Education.	Jordanian Dinar
	Palestinian	Jordanian, Arab, and Foreign for the current

## Undergraduate Entry Requirements

### **Dear Future International Students,**

Welcome to the University of Jordan we're thrilled you're considering joining us for your higher education journey. At the University of Jordan, you'll find a supportive community, world-class faculty, and endless opportunities for growth. We can't wait to welcome you to our campus and see the incredible contributions you'll make.

To get started, click on the link below to know more about programs and fees.

[Specialization and University Fees](#)

[Program Library](#)

### **Step 1: General Guidelines, Dates & Required Documents:**

To enroll at the University of Jordan, you need to meet the minimum required GPA for the General Secondary Education Certificate, as follows:

1. For Medicine and Dentistry, the required GPA is 80%.
2. For Pharmacy and Engineering, the required GPA is 70%.
3. For Sharia, the required GPA is 65%.
4. For Medical Laboratory Sciences, Nursing, and Rehabilitation Sciences, the required GPA is 60%.
5. For other schools, the required GPA is 55%.

The registration for international students is available throughout the academic year, except for the schools of medicine and dentistry, where registration follows the academic calendar, which normally starts in October.

[Academic calendar](#)

- The University of Jordan offers extensive sports facilities for all students, ensuring their right to participate in activities without discrimination. Facilities include a versatile hall for various sports, an aerobics hall for female students, two international-standard squash courts, a busy table tennis hall, and a main stadium seating 6,000.

Recently, the university hosted a sports tournament for Chinese expatriate students organized by the Chinese International Students Union. The event highlighted cultural exchange, with the University of Jordan (A) team winning the basketball championship against the University of Jordan (B) team. Dr. Ayoub and Chinese Ambassador Chen Chuan Dong awarded prizes, emphasizing the importance of cultural diversity and expressing hopes for future tournaments that enhance collaboration between Chinese and Jordanian students.

# 10 REDUCED INEQUALITIES

- The University of Jordan is committed to prioritizing women's rights and eliminating any discrimination they face, both within the university and in the broader community. In this context, the Center for Strategic Studies at the University has launched a study on economic violence against women, which was conducted under the patronage of Her Royal Highness Princess Basma bint Talal.

- University of Jordan has a special admission for students with special needs, students from less fortunate schools, refugee students, Palestinian students, disabled students, and other underrepresented groups in Jordanian society.

- The University of Jordan adheres to the Jordanian constitution and takes planned actions to promote diversity and inclusion in its recruitment processes. The university actively recruits faculty from various nationalities and cultures to teach specific languages at the School of Foreign Languages, ensuring a rich cultural and educational environment. Additionally, the university maintains an acceptance rate for students from special cases, including martyrs, refugees, students with special needs, and those from less fortunate schools. For administrators and faculty members, the university complies with the relevant legislation in the Labor Law, fostering an inclusive and equitable workplace.

**Amendments on 9/11/2022**

\*\*\*\*\*

**Article (1):** This code shall be called “**The code of conduct for faculty members at the University of Jordan**”, and it shall be enforced as of the date of its issuance.

**Article (2):** The following terms, wherever mentioned in this code, shall have the meanings assigned to them below, unless the context indicates otherwise: -

**University:** University of Jordan.

- The University of Jordan is committed to promoting human rights, providing healthcare, and managing legal affairs, all without any inequality or distinction among individuals. The Master of Human Rights and Humanitarian Development program, established in 2008, fosters a culture of human rights and humanitarian development, emphasizing equality, justice, and dignity while training skilled researchers and practitioners. The university also prioritizes the health and well-being of its students through its Health Care Department, which offers comprehensive medical services without discrimination. Furthermore, the legal departments within state institutions, including the university, play a vital role in ensuring that decisions are made in compliance with legal standards, supporting fair and just governance.
- The Community Service Center takes care of the less fortunate students to help them by all means, while the Women’s Studies Center takes care of all matters related to women and their empowerment in society. There is also a department in the Deanship of Student Affairs concerned with students with special needs.

# 10 REDUCED INEQUALITIES

- The University of Jordan (UJ) provides accessible facilities for people with disabilities. The campus features disability-friendly areas, including designated parking, accessible washrooms, wheelchair ramps, and elevators within buildings, as shown on the campus map. UJ is committed to supporting students with disabilities through various initiatives, including academic services and a 90% tuition waiver. The university actively participates in projects like Edu4ALL, which aims to create an inclusive education unit and train faculty and staff to enhance learning opportunities for disabled students. Additionally, the "Safe Path" initiative helps blind and visually impaired students navigate the campus independently, further demonstrating UJ's commitment to accessibility and equal educational access for all.

**Amman** - A longitudinal floor with prominent protrusions and lines in bright yellow extends for a distance of 1,500 meters from the main gate of the University of Jordan to several main places inside it, such as the library, the Student Affairs Office, and the bank. These places have been designated to help blind and visually impaired students move around the university independently and easily without relying on an escort.

Omar Abu Haneya, one of the project's supervisors and a professor at the College of Education with a visual impairment, said, "The blind can use the path to identify the road's landmarks, such as stairs and slopes, in a "safe manner, away from the streets and traffic, and away from the sidewalk benches and trees

The new platform is called "**Safe Path**", and the idea of establishing it began with a group of activists in the

## The University of Jordan

The University of Jordan (UJ) was established in **1962** and has become Jordan's largest and most leading university. UJ offers more than **250** programs from **24** schools in various disciplines. About **94** of those programs are dedicated for BSc degrees while the remaining offer a wide variety of specialties in graduate study programs. UJ is a comprehensive university in terms of teaching **both scientific and humanities** fields of study. UJ graduates have exceeded 200 thousand and have a good employment reputation according to the QS World University Rankings in 2018. Since 2018, UJ is ranked among the worldwide top 601-650 universities. In the Arab world, UJ has been among the top ten universities since 2018. Recently, UJ achieved five stars according to the QS Stars University Ratings.

- **At the University of Jordan (UJ), our policy prioritizes the inclusion and support of students with mental, physical, or learning disabilities. To ensure accessibility and success for these students, UJ provides the following:**

### **1. Deaf-Mute Students:**

- UJ offers translators for online lectures and exams to support deaf-mute students.
- Tutorials in sign language are also available to ensure easy access to course materials.

### **2. Students with Visual Impairments:**

- UJ provides on-call volunteers to assist visually impaired students during exams.
- Psychological support and counseling services are available through a specialized team, benefiting all students, including those with special needs.
- UJ regulations grant an additional 50% of exam time to all special-needs students.

Additionally, People with disabilities have the right to equal opportunities, including in education, but they face lower enrollment rates in higher education due to limited accessibility and support. Many universities lack tailored curricula, accessible resources, and proper infrastructure, especially for motor disabilities. The Edu4All project aims to change this by improving accessibility in university programs, training staff, updating curricula, and fostering independence and community involvement to create a sustainable, inclusive education system.

## Co-funded by the Erasmus+ Programme of the European Union

People with disabilities have the right to equal opportunities in all areas of life (including Education) as well as to live in dignity and freedom, recent studies in Jordan and Palestine show respectable ratio of people with disability continue higher studies either also it showed that they are likely to receive financial aid. However, data show that students with disabilities are less likely to enroll in higher education than their nondisabled peers. One the main reasons behinds this conclusion is the Lack of facilities keeping disabled away from higher education and corporate jobs. For example, up to our knowledge after gathering information from the General Union of Disabled (GUD) at both PCs, most of the universities in PCs have insufficient accessible curriculum resources and have not made any curriculum adjustments for students with disabilities attending their programs. Most of the universities also fail to prepare any individualized learning plans for students with disabilities and to provide even the most basic accessible infrastructure for students, particularly those with motor disabilities. While existing university policies allow students with disabilities who finish their high school to enroll in their not-inclusive programs, there is a severe shortage of support (or incorporate) accessibility (in existing) curricula and resources through appropriate accessibility services and accommodations for students with disabilities. Also, there is a lack of trained staff to support these students to learn in this environment. Thus, a concerted effort is needed to make out universities more inclusive. Edu4All is an innovative project to empower students with disabilities academically, socially, and psychologically through five goals: reach, development, equity, quality, and sustainability. Edu4All aims to reach students with disabilities and to build their capacity by including them in universities programs and increasing the successful participation of them, to build the capacity of staff (lecturers, administrative, and technician) and to ensure they are well trained for teaching and to serving students with disabilities, to modernize the existing the curricula to be accessible by students with disabilities via the use of assistive technologies, to ensure that the educational experiences students receive are high quality, and to ensure sustainability.

- As part of the University of Jordan's Mandatory Requirements, students can select a topic of their interest from “Life and Work Skills” course to enhance their personal and professional skills; one of these courses is sign language. This course enables students to communicate with hearing-impaired peers and equips them with essential life skills such as communication, leadership, decision-making, and conflict management. It allows students to choose practical skills that align with their interests, abilities, and future aspirations, preparing them for success in various aspects of life.

### About The Circle

Based on the royal directives and international agreements on human rights and the rights of persons with disabilities in particular, the **Student Guidance Department** was established in the Deanship of Student Affairs in 2002. Its most prominent tasks include providing support, specialized services and facilitating arrangements for students with disabilities and university students in general through two divisions: the Division for Supporting Students with Disabilities and .the Division for Guidance and Mental Health

The department has many activities that contribute to helping university ...students reach the highest levels of adaptation to the university stage. [More](#)

### **Reasonable Accommodation Policy at the University of Jordan**

**The University of Jordan (UJ)** implements a comprehensive reasonable accommodation policy to support students with disabilities through its Student Guidance Department's Student Support Division. Key services include:

- Tuition Discounts: A 90% discount on tuition for undergraduate and graduate students with disabilities.
- Accessible Academic Materials: Provision of materials in Braille and audio formats, along with specialized assistive technologies.
- Skill Development Courses: Courses in sign language and mobility skills to empower students.
- Facility Adaptations: Continuous efforts to make campus facilities accessible, including exam accommodations.

UJ also promotes disability awareness through workshops and student volunteering.

In addition, the university is committed to creating a supportive environment for female students, enhancing their academic and personal development through community engagement. The Counseling and Mental Health Division offers individualized support, while the Housing Department provides services to female students living away from home, including exceptional residences like Jerash and Ammon.

Overall, UJ demonstrates a strong commitment to inclusivity and support for students with disabilities, ensuring they have equal opportunities for academic and personal success.

3. Providing talking and magnifying computer programs for blind and visually impaired students .in the department's computer lab for people with disabilities
4. Holding specialized courses for students with disabilities in the fields of: sign language, .Braille, talking computers, and mobility, orientation, and movement skills
5. Working on rehabilitating the university environment for students with disabilities at the .5 university to become a safe and less restrictive university environment. The first phase of the safe path for students with visual impairment has been completed and the following phases .will be completed successively
6. Interpreting lectures and exams for deaf students into sign language either directly or through .6 .distance learning
7. Providing academic support to deaf students in the Student Guidance Department and 7

# 10 REDUCED INEQUALITIES

## Challenges and Areas of Improvements

**The University of Jordan** is actively advancing SDG 10 (Reduced Inequalities) by fostering an inclusive and supportive environment for students from diverse backgrounds. The university provides scholarships and financial aid to students from low-income, refugee, and marginalized groups to ensure equal access to education. It develops programs and courses that are inclusive of people with disabilities, offering assistive technologies and resources to support their learning. Gender equality is promoted through policies and mentorship programs, especially in underrepresented fields like STEM. The university also supports refugees by offering language courses, cultural orientation, and social integration programs. Access to vocational training is expanded to underserved communities, and online learning opportunities are provided to overcome geographical and financial barriers. Disability support services are strengthened, with more labs opening to assist students with disabilities during learning and examinations. Diverse student representation is encouraged in governance and leadership roles, and international exchange programs are promoted to ensure students from disadvantaged backgrounds gain global exposure. Comprehensive anti-discrimination policies and awareness campaigns create a safe, inclusive environment, fostering tolerance and dialogue across different cultures, religions, and ethnicities. Through these efforts, the University of Jordan is contributing to reducing inequalities and ensuring equal opportunities for all students.

**SDG 11: Sustainable cities and communities** focuses on making cities and human settlements inclusive, safe, resilient, and sustainable. It emphasizes the importance of access to affordable housing, sustainable transport systems, and inclusive public spaces, while also addressing the need to reduce the environmental impact of urban areas and enhance their resilience to climate-related challenges. As urban populations grow, achieving SDG 11 is crucial for ensuring the health and well-being of urban communities worldwide.

**The University of Jordan supports SDG 11** through various initiatives aimed at promoting sustainability and accessibility. It publishes reports on its progress, including the QRARUNA project, which focuses on climate change and sustainability policy development. The university provides public access to its cultural heritage sites, libraries, museums, and green spaces, and promotes sustainable commuting options while prioritizing pedestrian access on campus.

**The Centre for Strategic Studies at the University of Jordan**, with support from the QRARUNA project, hosted a conference to present the main findings of a needs assessment conducted for Civil Society Organizations during the first half of 2019. This assessment aimed to identify the requirements and challenges faced by these organizations in addressing sustainability and climate change issues.

Additionally, the university has initiated the development of an interdisciplinary program focused on Climate Change and Sustainability Policy, known as CLIMASP. This program is designed to equip students with the necessary skills and knowledge to tackle climate-related challenges effectively. Furthermore, the university is integrating climate change concepts into its undergraduate curriculum through the development of Environmental Engineering courses, ensuring that students are well-prepared to address these critical issues in their future careers.

## EU Projects

### Development Of An Interdisciplinary Programme In Climate Change And Sustainability Policy” CLIMASP

PROJECT WEBSITE

The Climate Change and Sustainability Policy (CLIMASP) minor at The University of Jordan is an interdisciplinary program funded by the European Commission Tempus under the coordination of the UNESCO Chair ICT in Education for Sustainable Development, University of Crete, Greece. Students from Faculty of Engineering & Technology, The school of Business, and Faculty of Educational Sciences choosing the CLIMASP minor as a complement of their major opens to them new opportunities for further studies and career paths. The CLIMASP minor consists of core courses, elective courses and the required capstone course in three concentration areas: 1) Climate Change, Environment and Society; 2) Climate Change, Economics and Public Policy; and 3) Climate Change, Science and Technology. The courses included in the CLIMASP minor are an integral part of the continuing disciplines curricula. It is thus an advantage for students seeking a successful and rewarding complement to their main field of study. Upon completion of the

## EU Projects

### Development Of Environmental Engineering Courses And Injection Of Climate Change Concept For Undergraduate Curriculum

PROJECT WEBSITE

The project aims to ensure that the universities in Jordan and Syria can offer a high quality education compatible with European standards and meets the market needs of the emerging knowledge-based society by modernising their 'environment' curricula, developing and implementing a sustainable bachelor degree programme. Also, EGREEN aims to introduce the concept of climate change in order to graduate professional leaders who can meet market needs of the country as well as it will Develop and integrate a bachelor degree program with an appropriate laboratory component in environment jointly taught by universities in Jordan and Syria and brought into line with the Bologna requirements.

ALL PROJECTS

Based on these details, the [University of Jordan](#) offers a well-rounded environment that emphasizes both academic and social well-being. The new gardens provide relaxing green spaces, fostering a pleasant atmosphere for students, faculty, and visitors. These gardens, like the South Gate Garden and forest area, are designed by the university's own staff to create cost-effective, engaging outdoor areas with diverse plant life, benches, and scenic paths.

Additionally, the Archaeology Museum, which houses artifacts from ancient times through the Islamic era, serves as a cultural and educational hub. Located in a green campus area and equipped with research facilities, it offers a space for students to deepen their understanding of Jordan's cultural heritage, while the museum square allows for social events and workshops, encouraging creativity and relaxation.

The university also provides various practical facilities, including prayer rooms, a well-stocked library, internet labs, and free Wi-Fi zones. A large theater accommodates conferences and events, and a cafeteria serves light meals. These amenities collectively enhance the students' experience by integrating both academic and social resources, making the University of Jordan a balanced and supportive place to study and grow.

### Museum

The Archaeology Museum at the University of Jordan was established in 1962, coinciding with the founding of the university. Initially, it housed a limited number of archaeological pieces. However, recognizing the importance of having a museum of archaeology at the university, there was an initiative to renovate and develop it to align with the distinguished academic status of the University of Jordan. The Archaeology Museum serves as an educational institution and an open

### Honoring Dr. Malek Al-Ajlouni By The University President On The Occasion Of The Opening Of The Green Space

The President of the University of Jordan, Dr. Nazir Obeidat, inaugurated

Obaidat praised this valuable effort and the standards upon which it was achieved, stressing the need to pay attention to the university's green environment and work to preserve and sustain it, also pointing out the importance of investing in student projects in a way that serves their university and develops its facilities and infrastructure under the supervision of faculty members specialized in these fields. Dean of the College of Agriculture, Dr. Safwan Al-Shivab, said in a welcoming speech, "The work on

The [University of Jordan](#) provides public access to various artistic and cultural spaces. The university actively supports young talents in the arts by offering art supplies and fostering a supportive environment. The Deanship of Student Affairs organizes exhibitions and visits to local museums, which help develop students' artistic skills and allow them to showcase their work to the public.

Instructors like Mrs. Zezit Abu Khadra create a family-like atmosphere in their studios, encouraging open communication and personal growth among students. This engagement not only nurtures emerging artists, some of whom pursue careers in art, but also enriches the university's cultural offerings for the wider community. Through these initiatives, the university promotes access to art and cultural artifacts, benefiting both students and the public.

## College Of Art And Design

The College of Arts and Design is a model of leadership and creativity, bringing together under one roof different types of art and design families. Since its establishment by Her Royal Highness Princess Wijdan Al Hashemi, who has taken it upon herself from the beginning to graduate students armed with knowledge and science in the fields of .visual arts, musical arts, performing arts, design and visual communication

The College of Arts and Design is a faithful incubator for our rich Arab and artistic culture and heritage, which, when combined with the expertise and experiences of faculty members from academics and artists, enriches its educational and artistic outputs with a spirit of .modernity and contemporaneity

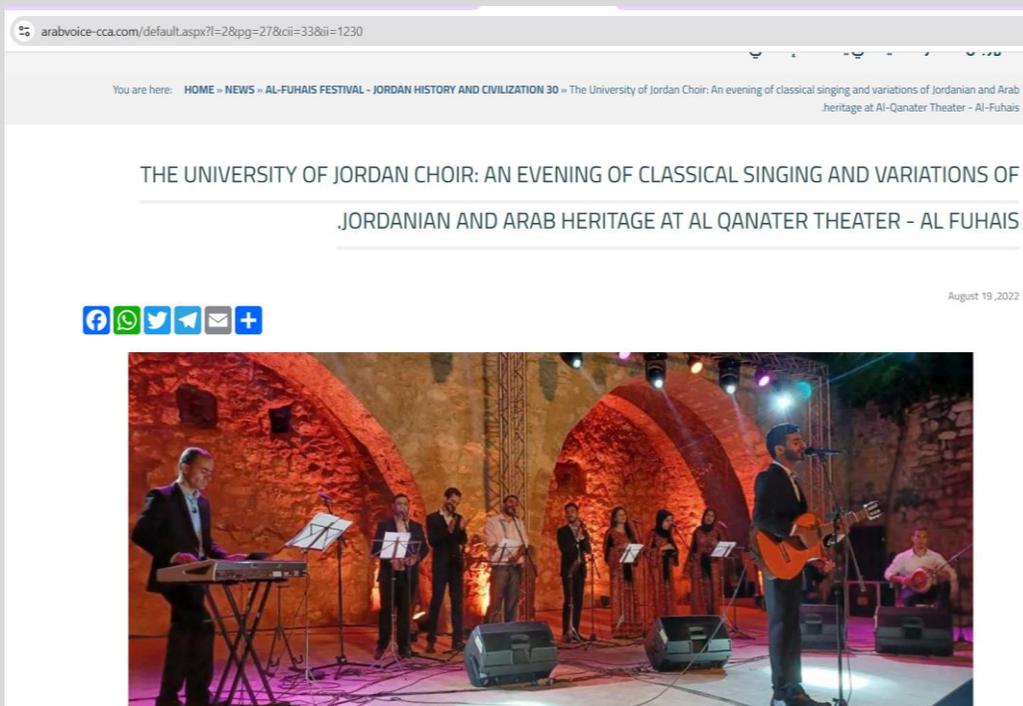

The College of Arts and Design grants a Bachelor's degree in Music Arts, Performing Arts and Visual Arts, a Bachelor's degree in Interior Design, a Bachelor's degree in Graphic Design and Multimedia, in addition to a Master's program in Music, a Master's degree in Visual Arts, a .Master's degree in Performing Arts and a Diploma in Art Therapy

Our deep belief in the importance of art as a basic and important element of the culture of societies always motivates us to empower graduates from the College of Arts and Design students with culture and scientific and practical experiences, which makes us eager for .excellence and creativity. And leadership

The University of Jordan significantly contributes to local arts through various public performances by its choirs, theatre groups, and orchestras. A recent highlight was the University of Jordan Choir's lively performance at the Qanater Theater, which celebrated the wedding of His Royal Highness Crown Prince Al Hussein bin Abdullah II and Princess Rajwa Al Hussein, as well as closing the Fuhais Festival. Directed by Mohammed Al-Zaytawi, the choir featured talented students from various disciplines and engaged the audience with a diverse program, including songs by Umm Kulthum, a Jordanian medley, and pieces from the Levant and Iraq. Lara Makhamreh's rendition of "Jordan, Land of Determination" stood out, and the audience enthusiastically joined in for the finale, "I write your name, my country."

The festival director honored the choir for their performance, with Dean Dr. Muhannad Mobaideen expressing pride in the festival's artistic contributions. Al-Zaytawi praised the unique experience of performing for such a responsive audience, highlighting the strong connection between the performers and the community.

- **The University of Jordan** plans to establish a multi-storey car park behind the computer center near university housing to serve students and the local community. Vice President Dr. Bashir Al-Zaani stated that the project, expected to accommodate around three thousand cars, aims to alleviate traffic congestion on the streets surrounding the university.

Dr. Al-Zaani noted that the university currently has four parking areas, including one multi-storey lot, which have significantly helped reduce traffic issues, especially on Queen Rania Al Abdullah Street (formerly University Street), a major road connecting Amman to neighboring countries.

## Construction of a multi-storey car park in (Jordan)

### Construction of a multi-storey car park in (Jordan)

2009-4-2 12:00 Thursday .Publication date

–A A+ Copy link print

Amman - Al Rai - The University of Jordan intends to establish a multi-storey car park, as the site was chosen behind the computer center near the university housing suburb.

The university's vice president, Dr. Bashir Al-Zoubi, said that the university seeks to establish this parking lot to serve the university students and the local community.

He added that a technical engineering committee is studying the plans and designs for this project, which is expected to accommodate about three thousand cars, stressing that the university seeks to establish this project to find radical solutions to traffic congestion in the streets surrounding the university.

According to Al-Zoubi, the number of parking lots currently on campus is four, one of which is multi-storey. These parking lots have contributed significantly to reducing traffic congestion in the streets

- **The University of Jordan** provides affordable housing support for employees through the University Employees Housing Fund, established in 1972. The fund offers optional participation for employees, with a monthly 4% salary deduction for savings. Employees can access housing loans up to 30,000 JOD, repayable over 15 years, to purchase or build housing. An online portal is also available to streamline fund-related requests.

### University of Jordan Staff Housing Fund Department

University of Jordan Staff Housing Fund Department

#### Director's Word: Welcome Word from the Director

In line with the university's mission and objectives to provide a stimulating environment for its employees (faculty members, administrative staff members) from the university, the hospital, and the University of Jordan, Aqaba Branch, the University Employees Housing Fund was established in 1972 AD, with the aim of encouraging employees to save and providing loans to university employees for housing purposes, purchasing and acquiring real estate and land, developing designs, conducting studies, and constructing housing according to the programs set for it, as participation in the fund is optional and the subscription allowance is deducted from the salaries of subscribers monthly by the Financial Affairs Unit at a rate of (4%) of the total salary subject to social security, and these deductions are transferred monthly to the fund, and a housing loan is disbursed with a .maximum of (30,000) thirty thousand dinars to be repaid over (15) years

To facilitate the work of employees (faculty members, administrative staff members) from the university, the hospital, and the University of Jordan, Aqaba branch, a portal for the Housing Fund for Employees has been activated on the university website to submit requests related to the services provided by the Fund according to approved forms, which saves time and .effort for employees

For inquiries, please contact the Director of the Housing Fund Department, Ms. Hadeel Tayeh

- **The University of Jordan** provides affordable housing options primarily for female students who come from distant areas to study. Through the Housing Department, the university prioritizes ensuring students' comfort, stability, and community integration by offering both on-campus and off-campus housing.

The university has two international residences, Jerash and Ammon, which serve local and international students and aim to foster a supportive community. Additionally, the university has rented buildings, such as the one in the Sixth District, to accommodate more female students. These accommodations offer services such as transportation, guidance, and cultural and recreational activities throughout the academic year, ensuring a holistic experience for students.

The Housing Department also assists students by organizing tours to introduce them to campus services, issuing smart ID cards, and linking students with employment opportunities through collaborations with local companies.

## Student Services and Student Housing Division

Receiving new students and providing them with all facilities and conducting .1 introductory tours for students in the university building and introducing them to the services available to them

Issuing ID cards for students: Issuing ID cards used to be an obstacle for the .2 department, as the process was done on paper by filling out a special form with the student's data and attaching a personal photo, then sending the forms to the University of Jordan/Amman to issue the ID cards. After that, the forms were converted to electronic forms. Recently, the division began making smart cards for students in cooperation with the Computer Center and Cairo/Amman Bank

Supervision of female students' housing: Due to the lack of female student .3 housing on campus, the university rented female student housing in order to attract the largest possible number of female students coming from outside the city of Aqaba. A building was rented in the Al-Shamiya area at the beginning of the 2014/2015 academic year with a capacity of more than (50) female students and qualified supervisors were appointed to supervise the female students and provide transportation for the female students to and from the university. Due to the distance of the building from the city's services, the university decided to rent an alternative building for female students in the Sixth District, as it is a vital area and the building has a capacity of (30) female students. The female .4 students were transferred to it in June 2016 and the building is still rented

Issuing the yearbook: The Student Services Division used to send photos of .4

- **The University of Jordan** prioritizes pedestrian access on and around campus. In partnership with the Greater Amman Municipality, the university has upgraded a pedestrian tunnel with extended length, improved lighting, and handrails. Additionally, a pedestrian bridge is planned for the main entrance, as part of broader efforts to enhance safety and accessibility for all.

## Municipality completes construction on UJ pedestrian tunnel

By JT - Aug 04,2019 - Last updated at Aug 04,2019

Share 8 Tweet 0 googleplus 0 in Share 0 Email 0

AMMAN — The Greater Amman Municipality (GAM) opened the University of Jordan's (UJ) pedestrian tunnel Sunday after completing construction to extend it by eight metres, refurbish the tunnel lights and install handrails, the Jordan News Agency, Petra, reported.

GAM has completed 45 per cent of the Bus Rapid Transport project's construction on Queen Rania Street, extending from UJ's traffic lights to the Jordan University Hospital Bridge, Petra reported.

The municipality has also completed 75 per cent of construction on the service road facing UJ and reports that it will soon begin installing an electrical pedestrian bridge in front of UJ's main entrance.

### OPINION

**Editorial**  
Jordanian Field Hospital in Gaza stands strong despite Israeli bombing  
Saturday 23 December 2023

**A lesson I learned about elections**  
Nov 04, 2024

- The University of Jordan** builds new facilities according to sustainable standards, guided by the “UI Green Metric” rankings. The university emphasizes energy efficiency, climate change mitigation, and green building practices, using energy-saving technologies, incorporating renewable energy sources like solar and wind, and applying green building principles in new constructions. Additionally, the university collaborates with national bodies, such as the Ministry of Energy and Environment, to comply with environmental laws and promote sustainable practices.

## UI Green Metric

NEWS

No data entered

The University of Jordan continued its progress in the “UI Green Metrics” classification by six ..global positions to rank (98) compared to 2014 and (181) positions compared to 2013

The university is interested in this classification to increase its international reputation in the field of environment and sustainable development, to increase awareness within the university and the local community of environmental and sustainable development issues, and to help in developing an improvement plan that reflects positively on the university and Jordan. It is measured by the following indicators

1. Work environment and infrastructure (15%)

The University of Jordan contains a natural forest area extending over an area of 62,500 square meters (6,16%) of the total area of the university, and a percentage of (6,34 %) of the total area is planted with gardens and green spaces

# 11 SUSTAINABLE CITIES AND COMMUNITIES

## Challenges and Areas of Improvements

**The University of Jordan** seeks to further improve SDG 11 (Sustainable Cities and Communities), will implement a variety of initiatives, including sustainable campus design with green building standards and green spaces, as well as enhancing transportation systems with bike racks, pedestrian pathways, and electric vehicle charging stations. The university can also develop smart infrastructure using IoT technology for energy and waste management and integrate renewable energy systems like solar panels and wind turbines to reduce carbon footprints. Waste reduction and recycling programs can be expanded, and community engagement initiatives can promote sustainable practices both on and off-campus. Additionally, the university can improve affordable dormitories for students from remote areas and collaborate with transportation organizations to provide weekend bus services, easing travel for students to visit their families. Disaster resilience strategies and collaboration with local authorities on sustainable urbanization can further strengthen the university's role in fostering sustainable communities, alongside promoting sustainable food practices and educating students on environmental stewardship.

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

**SDG 12: Responsible consumption and production** promotes sustainable consumption and production to reduce environmental impact. It emphasizes minimizing waste, increasing resource efficiency, and fostering responsible consumption patterns to balance economic growth with environmental protection.

**The University of Jordan aligns with SDG 12** through initiatives like waste reduction, recycling programs, and e-waste management. The university publishes reports on its sustainability progress, including studies on recycling and e-waste, and has policies for managing hazardous waste, minimizing plastics, and limiting disposable items. These practices extend to suppliers and services, demonstrating a commitment to responsible consumption and sustainability across campus operations.

- **The University of Jordan (UJ) actively contributes to Sustainable Development Goal 12** by publishing reports on e-waste and recycling. One study estimates e-waste generation across Jordan's governorates, identifying disposal practices and noting that over 8.7 million e-waste items were discarded in 2018, with 58.4% of households still primarily dumping their e-waste. Other practices include gifting, selling, and environmentally sound recycling. The findings are mapped online to raise awareness and support better e-waste management. Additionally, UJ's assessment of campus recycling explores staff and student awareness, program challenges, and highlights barriers to implementing a sustainable recycling system at the university.

### Abstract

#### Purpose

This study sought to assess the process of initiating a sustainable recycling program at the University of Jordan. It illustrates the potentials of recycling, perceived awareness of recycling

- **The University of Jordan** has a commitment to ethical sourcing of food and supplies, evident in its collaboration with the Jordan Food and Drug Administration (JFDA). The JFDA recently praised the university's restaurants for their adherence to health and safety standards, underscoring the university's dedication to providing healthy and safe food for students and staff. The Director of the Restaurants Department has emphasized ongoing efforts to improve food quality and safety at all stages of food handling and circulation. Furthermore, the university has proposed that its restaurants become a training center for those interested in public safety and food service excellence, reflecting its commitment to ethical practices in food sourcing.

Additionally, the university applies strict ethical guidelines in its research involving human subjects, ensuring compliance with internationally recognized standards such as the Declaration of Helsinki and the Belmont Report. It upholds ethical values in research by requiring approval from the Institutional Research Board (IRB) before any project begins, thereby ensuring that ethical considerations guide all aspects of its research activities. This focus on ethical sourcing extends to collaborations with various pharmaceutical companies and local organizations, reinforcing the university's dedication to maintaining high ethical standards in all its operations and partnerships.

**NewsTitle** Food and Drug Administration praises health procedures of Jordanian restaurants.

**NewsBody** University of Jordan News (11 News) Samir Al-Samadi

The Jordan Food and Drug Administration praised the control and health procedures followed in the restaurants of the University of Jordan.

This came during a visit by a delegation from the Foundation today, headed by the Head of the Food Control Department, Dr. Musa Al-Abbadi, to the university restaurants, with the aim of intensifying food health control programs.

Dr. Al-Abbadi appreciated the efforts made by the staff working in the restaurants and their keenness to provide healthy and safe food for the university and all its staff.

In turn, the Director of the Restaurants Department, Dr. Haider Al-Domi, said that the University Restaurants Department is always keen to improve the level of healthy food for students and university employees by ensuring the safety, quality and suitability of food for consumption at all stages of its circulation.

Al-Domi called on the Food and Drug Administration to make the University of Jordan restaurants a training center for those wishing to work in this field, as they are a model to be emulated in the field of providing public safety and safe, healthy food for its patrons.

At the end of the inspection visit, the delegation inspected the places where food is displayed and stored, the personal hygiene of workers, the methods of proper food handling and preservation.

NewsImage

## Representatives of the General Organization for Food and Drug visit the University of Jordan Hospital

:Gerasa News Agency

Representatives from the Jordan Food and Drug Administration (JFDA) visited the University of Jordan Hospital to review the level of food services provided in addition to the food policy followed. The representatives expressed their admiration for the advanced level of quality standards applied in the hospital and its keen interest in food safety. For its part, the hospital administration expressed its thanks and appreciation for the efforts of the Jordan Food and Drug Administration in following up on the implementation of the nutritional principles for the Jordanian citizen, wishing for more cooperation between the two parties.

UNIVERSITY OF JORDAN JOURNALS

SATISFACTION RATE WITH THE DEANSHIP OF SCIENTIFIC RESEARCH FOR THE YEAR 2022-2023

سنة التوافق من جامعة البحث العلمي لعام 2022 - 2023	النسبة المئوية
مستوى عالٍ جداً	81.82%
مستوى عالٍ	86.75%
مستوى متوسط	68.57%
مستوى منخفض	79.86%
مستوى منخفض جداً	71.86%
مستوى غير كافٍ	75.46%
مستوى غير كافٍ جداً	85.96%

The University of Jordan is committed to the principles of scientific research ethics and the internationally recognized and applied instructions when conducting any research involving individuals, especially the Declaration of Helsinki issued by the World Medical Association and the Belmont Report. The University is also guided by the principles agreed upon in the International Conference on Harmonization (ICH) and the Guidelines for Good Clinical Practice (GCP).

The University also adheres to the Food and Drug Administration (FDA) regulation for pharmaceutical research. Conducting research requires obtaining approval from the Institutional Research Board (IRB).

In general, scientific research should be conducted with the upholding of human ethical values and respect for human dignity. This is done by employing the principles of respect for personal autonomy, achieving benefit, and committing to justice towards the people participating in the research.

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

- **The University of Jordan** has established comprehensive policies and practices for the disposal of hazardous materials, primarily through its Chemical and Hazardous Materials Management Instructions. These guidelines, issued by the Council of Deans, are designed to ensure safety and environmental health in university laboratories. They define essential terms such as "laboratory employee" and "hazardous waste," and outline detailed procedures for the proper handling, storage, and disposal of hazardous materials.

The university emphasizes the importance of identifying and labeling waste, adhering to storage limits, and ensuring safe transport of hazardous materials to designated collection sites, in collaboration with the Public Safety Division. Additionally, the university promotes pollution prevention and emergency preparedness, as well as strategies for waste reduction, fostering a culture of safety and compliance with national regulations.

## The College Of Agriculture Holds A Training Course On Public Safety In Its Laboratories And Buildings

In cooperation with the Public Safety and Environment Committee at the College of Agriculture and in coordination with the Office of the Assistant Dean for Development and Quality Affairs, a training course was held entitled

### General safety procedures in the laboratories of the Faculty of Agriculture, including chemical and biological hazards

The course was opened by Prof. Ayed Al-Abdallat, Vice Dean of the College of Agriculture for Research and Development, who explained the importance and effectiveness of such activities and urged students and laboratory workers to attend and participate in them. Dr. Al-Abdallat stressed the importance of making these courses mandatory for graduate students and future laboratory users due to their relevance to human life, health and the environment.

The lecturers stressed the need to strictly adhere to general safety procedures in the college laboratories to preserve the safety of laboratory workers. Dr. Asmaa Al-Bakri spoke at length about the most important chemical hazards facing laboratory workers, dealing with chemicals, and how to dispose of them.

Regarding biological risks, Dr. Muhannad Abu Ajamiya explained the most important biological risks that threaten the safety of laboratory workers and users who use microorganisms in laboratory experiments.

For his part, Dr. Muhammad Al-Qaisi explained the most important recommendations that must be followed

An awareness lecture titled "How to Deal with Chemicals" was held at the Stem Cell Therapy Center at the University of Jordan, attended by around 60 employees from various colleges and medical centers. This initiative is part of a broader plan to enhance awareness of occupational safety and health across the university, reinforcing the institution's commitment to effective waste disposal practices for hazardous materials.

University of Jordan News (UJ News) Qusay Al-Tarawneh - An awareness lecture was held for a number of university employees in the colleges and scientific and medical centers entitled "How to deal with chemicals" at the Stem Cell Therapy Center at the University of Jordan, in coordination with the Higher Committee for Occupational Safety and Health and the Public Safety and Environment Office

The lecture, which was presented by First Lieutenant Ihab Al-Momani from the Central Amman Civil Defense Directorate, explained how to deal with hazardous chemicals inside laboratories, the expected risks, and the

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

- **The University of Jordan** has a proactive approach to waste disposal that includes policies aimed at reducing landfill waste through recycling and sustainable waste management practices. Through initiatives led by the Community Development and Service Center, the university has implemented a recycling awareness and training program to educate students and staff on waste separation at the source. This program, aligned with the university's sustainable development goals, is supported by a partnership with the First Paper and Cardboard Recycling Company, which helps establish effective waste management practices. Additionally, the Water, Energy, and Environment Center has organized workshops to explore waste-to-energy solutions, underscoring the university's commitment to environmentally friendly practices. These initiatives reflect the university's ongoing efforts to measure and reduce waste in alignment with its environmental and sustainability goals.

The University of Jordan launches a project to raise awareness of the importance of recycling and training to separate waste from the source

University of Jordan News (UJ News) - In commitment to adopting sound environmental practices, the Community Development and Service Center today launched an awareness and training program in the field of waste separation at the source for sorting and recycling

The project aims to build and raise the awareness of university students and employees in the field of waste separation at the source and recycling, in an effort to achieve a sustainable university environment that meets green environment standards

Dr. Enaam Khalaf, Vice President for Quality, Accreditation and Strategic Planning, said that the recycling project is one of the projects that focus on sustainable development that aims to achieve a strategic goal at the university, in the hope of providing a safe, healthy and sustainable environment, by targeting awareness among students and university staff of the importance of the green environment and recycling.

NewsTitle Experts discuss solutions and challenges of converting waste into energy

NewsBody University of Jordan News (UJ News) The Water, Energy and Environment Center at the University of Jordan held an international workshop entitled "Waste to Energy: Challenges and Solutions" in cooperation with the Natural Resources Network ( CNRD,) and with the support of the United Nations Development Programme ( UNDP,) Experts and .researchers from Jordan, Germany, Indonesia, and various governmental, private, and academic sectors participated in it

The Vice President of the University of Jordan for Centers and Community Service Affairs/Head of the Aqaba Branch said, upon opening the workshop activities, that universities must play an effective role in transferring knowledge and technology, conducting economic feasibility studies for these projects, transferring foreign expertise in developed countries, and studying the possibility of applying it in Jordan

Al-Lawzi pointed out the importance of holding such meetings that result in recommendations that contribute to and support efforts and endeavors in preparing national policies and local strategies that advance integrated resource and .waste management

For his part, the representative of the center in the CNRD natural resources network confirmedDr. Hussam Al-Khasawneh emphasized the importance of the workshop topic as it represents a link between the water, energy and waste sectors, and .stressed the need for universities to focus on these scientific fields

- **The University of Jordan** has policies focused on minimizing the use of disposable items, particularly through its recycling initiatives. The university has partnered with the First Paper and Cardboard Recycling Company to establish a waste separation system and improve solid waste management. This effort aims to reduce waste, promote recycling, and raise environmental awareness among students and staff.

### Jordanian and First Paper and Cardboard Company sign a memorandum of understanding

Wednesday, January 4, 2023

+ Big font | + Small font

University of Jordan News (UJ News) Hiba Al-Kayed - The University of Jordan today signed a memorandum of understanding with the First Paper and Cardboard Recycling Company regarding an initiative to establish a system that separates waste at the source and improves solid waste management practices within the university campus.

The memorandum, signed on behalf of the university by the Vice President for Accreditation and Quality Affairs, Dr. Enaam Khalaf, and on behalf of the company by its owner, Mr. Khaled Nasr, aims to enhance environmental awareness among students and employees, given the importance of changing behavior towards a culture of recycling instead of disposing of waste in a way that causes harm to the environment and natural resources.

- **The University of Jordan** has signed an agreement with the Ministry of Energy and Mineral Resources to establish a seismic monitoring station at its Aqaba campus. This project will support geophysical research and provide students with opportunities to engage with seismic data. The station, built on a 60-square-meter plot, will monitor seismic activity in the Aqaba region, which is known for its seismic activity. This partnership reflects the university's commitment to environmental sustainability and advancing academic research in collaboration with external organizations.

## Energy Ministry, UJ sign agreement to establish seismic station in Aqaba

By JT - Oct 09, 2024 - Last updated at Oct 09, 2024

Share 0 Tweet 0 googleplus 0 in Share 0 Email 0

AMMAN — The Ministry of Energy and Mineral Resources and the University of Jordan (UJ) on Wednesday signed an agreement to establish a seismic monitoring station at the university's Aqaba campus.

The agreement, initially set for five years with an option to extend, will allocate a 60-square-metre plot of land for the Jordan Seismological Observatory (JSO) to construct the station, according to a ministry statement.

JSO Director Ghassan Sweidan highlighted the strategic significance of the station, noting Jordan's position on the western edge of the Arabian Plate, a region historically and recently prone to seismic activity.

- **The University of Jordan** measures and tracks the waste generated and recycled on campus. The university has implemented a waste recycling project that includes designated collection sites across the campus, where waste is sorted into categories such as paper, plastic, glass, and food waste. The amount of waste disposed of daily is estimated to be around 7 tons. The university also collaborates with the Greater Amman Municipality for waste disposal and aims to increase recycling awareness among students and staff.

NewsTitle Dialogue with university support services officials

NewsBody

Masoud: A plan to recycle waste at the University of Jordan  
 Hatamleh: University cleanliness is not a slogan  
 Awamleh: A shortage of manpower  
 Students: The university is called upon to rehabilitate the main gate

Mohammad Al-Mobaideen - Officials at the University of Jordan confirmed that despite the shortage of manpower, materials, equipment and devices, the efforts of cleaning services are proceeding according to ambitious plans and programs

During a dialogue session (for Jordanian News) that included the Director of the Support Services Unit, Eng. Mohammad Masoud, the Director of the Public Services Department, Issam Hatamleh, and the Head of the Building Cleaning Services Division, Ali Al-Awamleh, a discussion took place about the reality of cleanliness on campus

Masoud stressed that human resources are a basic driver in creating a clean university environment, noting that the Cleaning Division is located at the same distance from all places and buildings on campus to give it a civilized and sophisticated appearance

Masoud pointed out that the unit has an ambitious plan within its strategic plan to divide the university campus into northern, central and southern waste collection sites through a proposed project previously prepared by the Center for Strategic Studies for Waste Recycling

The unit director added that the recycling project includes placing special colored waste containers designated for each type of waste, which includes paper, cardboard, glass, plastic, metal, wood, car oil, food waste, textile and sponge materials

Hatamleh confirms the success of the experiment of establishing a waste collection site that was created near the College of Business, saying, "The site was designed according to specific standards and requirements that ensure that waste is not scattered and facilitates the workers' transportation of it using waste compactors

Hatamleh continues that the site is a qualitative and civilized leap, as artistic murals will be erected around its perimeter to encourage students to throw waste in containers easily and conveniently

Hatamleh praised the role played by the Greater Amman Municipality in contributing to the university's cleanliness, noting in this context that the university disposes of waste using the municipality's compactors that visit the campus several times a day

Hatamleh estimates the amount of waste disposed of by the university daily at about (7) tons, also appreciating the role of the Secretariat in preserving

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

## Challenges and Areas of Improvements

**The University of Jordan** seeks to further improve SDG 12 (Responsible Consumption and Production) through adopting several strategies. First, it can implement a comprehensive waste management system that includes waste segregation, recycling programs, and composting initiatives to reduce landfill contributions. The university could encourage a circular economy by promoting the reuse of materials and the repair of campus facilities and equipment instead of discarding them. Additionally, the university is seeking to apply food waste as fertilizer for its farms, contributing to sustainable agricultural practices. Educational campaigns on sustainable consumption can raise awareness about reducing food waste, using eco-friendly products, and conserving resources like water and energy. The university can collaborate with local businesses to source sustainable, ethically-produced materials and food for campus operations. It could also promote sustainable fashion by creating initiatives that encourage students to buy second-hand clothes or participate in clothing swaps. Integrating sustainability into academic curricula, research, and projects can help students and staff understand the importance of responsible consumption and production, encouraging them to apply these principles in their future careers.

**SDG 13: Climate Action** aims to combat climate change and its impacts by encouraging countries and institutions to adopt policies, strategies, and practices to reduce emissions, enhance climate resilience, and increase awareness. This goal is critical, as climate change poses significant risks to natural ecosystems, communities, and economies. SDG 13 focuses on integrating climate measures into national policies, improving education on climate change impacts and adaptation, and promoting resilience through sustainable practices worldwide.

**The University of Jordan (UJ) actively supports SDG 13** through a range of initiatives focused on climate action and sustainability. UJ conducts and publishes research on climate-related topics, such as CO<sub>2</sub> capture and the effects of climate on local weather patterns, contributing valuable insights to the field. Through partnerships and educational programs, UJ offers courses and workshops on climate change impacts, mitigation, and sustainability policies, encouraging students and faculty to engage in climate solutions. These efforts highlight UJ's role in advancing climate awareness and resilience within the academic community and beyond.

- **The University of Jordan (UJ) actively contributes to SDG 13 through research and programs aimed at addressing climate change challenges. The university publishes reports on its progress, including studies like “Modeling Long-Term Temporal Variation of Dew Formation in Jordan and Its Link to Climate Change.” This research investigates seasonal and regional patterns in dew yield across Jordan, showing how climate change affects water resources, with findings that could enhance dew harvesting in Mediterranean climates.**

Another research initiative, “New Metrics of Green Sorbents for CO<sub>2</sub> Capturing,” focuses on developing eco-friendly materials for carbon capture. By proposing new metrics for evaluating green sorbents, this work promotes sustainable CO<sub>2</sub> management solutions and aligns with green chemistry principles, aiming to reduce greenhouse gas emissions with more environmentally friendly methods.

### New Metrics of Green Sorbents for CO<sub>2</sub> Capturing

Ala'a F. Eftaiha, Abdussalam K. Qaroush, Malyuba A. Abu-Daabes, Hatem M. Alsyouri, Khaleel I. Assaf

First published: 23 March 2020 | <https://doi.org/10.1002/adsu.201900121> | Citations: 13

Read the full text > PDF TOOLS SHARE

#### Abstract

Significant progress has been made in the past decades in the capture, storage, and utilization of greenhouse gases, particularly CO<sub>2</sub>. In general, the synthesis of most of the available CO<sub>2</sub> sorbents is not ecofriendly and can require multistep synthesis in order to prepare and/or activate, which is considered a strict violation of green chemistry principles (GCPs). Therefore, thinking of green frameworks to design chemical products and processes becomes essential to mitigate these challenges. This paper provides an in-depth review of available green sorbents for CO<sub>2</sub> capture with an emphasis on those prepared from biorenewable materials and ionic liquids. A new metric is presented to classify these sorbents based on their degree of compliance to the GCPs, which could be a useful tool in selection of green alternatives. Due to the interdisciplinary nature of this

A University of Jordan study stresses the need for action to curb air pollution, which worsens global warming. Dr. Tariq Hussein highlighted that rising temperatures threaten future prosperity. The study found areas like Al-Jafr have air quality similar to northern Europe, while Amman suffers from higher pollution, mainly from cars. Desert sand, industrial activities, and greenhouse gases contribute to climate change. The study also warns of regional impacts like water scarcity, reduced soil fertility, and increased desertification, with global predictions of a four-degree temperature rise by century's end.

ujnews2.ju.edu.jo/Lists/News/DispForm.aspx?List=6a71da82-c9dc-4e9f-818d-25d85d9402b5&ID=7131&ContentTypeld=0x0100984A62E5BB90CF499A2CA920B18C8645

Study: Umm Al-Summaq air is polluted

NewsBody

A study conducted by the University of Jordan on climate change called for taking effective decisions to limit the increase in air pollution, which contributes to the severity of the global warming phenomenon, which has begun to impose itself on this planet with its temperature rising in a way that makes achieving prosperity in the future far from millions of people, according to what Dr. Tariq Hussein, a professor of science at the University of Jordan, says

Dr. Hussein said that the University of Jordan is currently working on more studies and research on measuring air purity in different areas of the Kingdom. Its initial results indicate that the air purity in some areas, such as the Jafr area, for example, is similar to northern Europe due to the lack of human activities in this area compared to Amman and Zarqa

However, air purity in Amman varies from one area to another depending on human activities and traffic congestion. The Shafa Badran area is the cleanest, while Umm Al-Summaq has the highest concentration of pollutants. The Sports City area and the University of Jordan are located in the middle of it due to the presence of trees that help purify the air in the evening. He explains that cars contribute to 60 percent of air pollution in cities due to population density and the increasing number of cars. We see a brownish-black cloud over the capital caused by car emissions, in parallel with the absence of green areas that work to purify the air, because trees are like lungs that purify polluted air

In addition, a recent global study confirms that the effect of carbon dioxide is one of the most important gases that contribute to this phenomenon due to its production in large quantities through the burning of coal, oil and natural gas in factories and methane gas emitted from landfills, mines and gas pipelines, in addition to the effect of fertilizers and chemicals responsible for the erosion of the ozone layer

This study defined climate change as a disruption in the usual climatic conditions such as temperature, wind patterns and precipitation, such that the pace of climate change in the long term leads to enormous impacts on human society and nature. Dr. Hussein, winner of the Abdul Hameed Shoman Foundation for Arab Researchers' Climate Change Impacts on the Environment Award, explains this by saying, "There are two theories among scientists regarding global warming, the first is a result of the position of the Earth with the stars and orbits, and the second, which everyone is moving towards, is the link between thermal emissions and human activity." He adds that air consists of gases and suspended particles that work together to form the global warming process, in addition to gases resulting from the burning of waste and factory and car waste. He points out with great importance another factor in

- **The University of Jordan's Water, Environment, and Energy Center** held a workshop titled "Climate Change and Ways to Reduce Its Effects," bringing together experts to address regional climate challenges. Dr. Khaldoun Shatnawi highlighted efforts in sustainable water management, while Dr. Abbas Al-Omari and Dr. Kifah Al-Jamaani discussed adaptation needs given predicted declines in rainfall and rising temperatures. Dr. Jihad Al-Sawaier emphasized Jordan's commitment to climate policies. The workshop explored solutions like treated water, water harvesting, and improved irrigation to strengthen resilience in Jordan and the region.

- A Jordanian research team, including members from the University of Jordan, Hashemite University, Balqa Applied University, and King Fahd University of Petroleum and Minerals, successfully captured carbon dioxide using a sugary substance. The team used bacteria to produce the substance in an alkaline medium and studied its reaction mechanism. This achievement gained recognition from the Berkeley Global Science Institute, which highlighted the team's innovative approach. The research was also mentioned at the 2017 World Science Forum held in Jordan.

## M.Sc. In Environmental Technology And Climate Change

The Master Program in Environmental Technology and Climate Changes combines the perspectives of two research groups -Energy Systems and Environmental Technology. This program aims to equip students with the necessary knowledge and skills in the areas of energy, environmental technology and climate change. The program is designed to provide researchers and policy analysts with training in advanced areas of renewable energy and environment technology and policy. The emphasis is on environmental monitoring and resource assessment related to energy systems.

**:About The program And his subjects Basic**

The exploitation of materials and energy resources generates many environmental impacts such as: climate change, uncontrolled depletion of resources and hazardous materials. At a time when global environmental problems and concerns about the long-term availability of natural resources pose many incentives for governments, companies and organizations to use materials and energy in a smarter and more efficient way than the methods currently used.

The Master of Environmental Technology and Climate Change programme combines the perspectives of two disciplines. From the Energy and Environmental Technology Research Group. This program aims to provide students with the necessary knowledge and skills in the fields of energy, environmental technology and climate change. This program is designed to provide researchers and policy analysts with advanced training in the fields of renewable energy technology and environment and its policies. The focus of this program is on environmental monitoring and resource assessment related to energy systems. Furthermore, the Master's program aims to improve environmental performance by bridging the gap between economy and environment and integrating social aspects into environmental development processes. Accordingly,

# 13 CLIMATE ACTION

**C. Ph.D. Program in Geography - Climate Change:** This course explores the causes, theories, and impacts of climate change, including air pollution and global mitigation efforts, with a focus on human health, agriculture, energy, and water resources.

## 2. Workshops and Community Engagement:

**A.** UJ frequently organizes workshops and seminars to raise awareness about climate change. For example, in a workshop led by Ms. Iman Al-Absi, experts like Dr. Zainab Arabiyat and environmental activist Mr. Agustin Ocaña discussed the impacts of climate change on Jordan and the Middle East, stressing community involvement, especially among youth, to combat and adapt to these challenges.

### Workshop on Climate Change

Ms. Iman Al - Absi, the Environmental Culture and Development course coordinator, organized a workshop on climate change on Tuesday, April 4, 2023, from 10:00 to 11:30 am . During the workshop, Dr. Zainab Arabiyat gave a lecture that included general information about the phenomenon of climate change and its effects on coral reefs in the Gulf of Aqaba. She suggested several measures that can be taken .by all members of society, including youth, to reduce the effects of climate change

Mr. Agustin Ocaña, President of the Global Youth Coalition (GYC) and an environmental activist, then gave a lecture on climate change by presenting a number of innovative and sustainable solutions. The workshop raised awareness

**B.** Water, Energy, and Environment Center: This center conducts workshops and projects like the "Sustainable Water Resources Management in Developing Countries" initiative, supported by DAAD. Through collaborative research and training, the center addresses regional climate challenges, specifically focusing on water resource management and adaptation strategies.

The screenshot shows the website for the Water, Energy and Environment Center. It features a logo with a shield divided into four quadrants (sun, water drop, tree, leaf). Below the logo is the text "Water, Energy and Environment Center" and a quote: "And We made from water every living thing (21:33)". There is a "PHOTO GALLERY" section with several small images. A large photo shows a workshop in progress with a speaker at a podium. Below the photo is a caption: "A workshop entitled 'Climate Change and Ways to Adapt and Reduce Its Effects' organized by the Water, Energy and Environment Center at the University of Jordan".

**C.** The Hamdi Mango Center for Scientific Research at the University of Jordan participated in the Second International Conference on Climate Change and Sustainability at Mutah University. Dr. Reda Shibli, the Center's Director, presented a paper on "Food Security in Jordan and the Transition to a Green Economy," discussing the effects of climate change on food security and advocating for sustainable agricultural practices. Center researcher Tamara Al-Qudah also presented on using plant tissue culture to preserve Jordan's wild Alanda plant, highlighting biodiversity conservation as a climate change mitigation strategy. The conference concluded with recognition for participating speakers.

The screenshot shows the news website of the University of Jordan. The header includes navigation links: English, Media, News Archive, Activities, Aqaba branch, University News, Home. The main article is titled "Hamdi Mango Center For Scientific Research At The University Of Jordan Participates In The Activities Of The Second International Conference On Climate Change And Sustainability At Mutah University". The article is dated "08 - Nov 2023". A photo shows a group of people standing in front of a building. The article text mentions that the center participated in the activities of the Second International Conference on Climate Change and Sustainability, which is being held at Mutah University on the 7th and 8th of this month.

- **The University of Jordan is committed to climate action through collaborative efforts with local and international partners.** In December 2015, under the leadership of President Prof. Ekhlaiif Al-Tarawneh, the university's Water, Energy, and Environment Center (WEEC) partnered with the French Embassy to hold a workshop titled "Climate Change: Current Status, Challenges, and Future Directions." The event brought together government representatives, industry leaders, and students to discuss sustainable development strategies and showcase innovative projects for reducing waste and pollution.

In alignment with COP21 goals, the university announced a joint Master's program in "Water and Energy" with AgroParisTech to address environmental challenges. The workshop also included a roundtable where participants developed practical climate solutions for Jordan, demonstrating the university's dedication to local and global climate action efforts.

A screenshot of a PDF document viewer showing a slide from a presentation. The browser address bar at the top displays the URL: centers.ju.edu.jo/ar/weec/Documents/Climate%20change%20Current%20Status,%20Challenges%20and%20Future%20Directions.pdf. The slide header includes the WEEC logo and the text "Water, Energy and Environment Center". The main title of the slide is "Climate change: Current Status, Challenges and Future Directions" in red. Below the title is a photograph of a roundtable discussion with several men seated around a long table on a stage, with an audience visible in the foreground. The background of the photo shows a presentation screen with Arabic text. At the bottom of the slide, there is a paragraph of text in English describing the workshop's organization and participants.

Under the patronage of the University of Jordan president, Prof Ekhlaiif Al-Tarawneh, the Water, Energy and Environment Center (WEEC) in collaboration with the Embassy of France in Amman, organized a workshop entitled "Climate change: Current Status, Challenges and Future Directions" in Thursday December 3<sup>rd</sup> 2015. Many academics, governmental and industrial players were gathered in this workshop including the CEO of Total in Jordan, Dr. Adil Oureaguli, the CEO of Cement Lafarge, Mr. Amr Reda and the technical advisor of the minister of environment, Mr. Raouf Dabbas, in addition to many students from the University of Jordan. The Honorary guest of

- The University of Jordan actively participates in cooperative planning for climate change-related disasters, working closely with government bodies. The university has developed a comprehensive emergency preparedness plan, which includes responses to severe weather events like snowstorms. This plan involves coordination with various units, including crisis management teams and the Central Amman Civil Defense Directorate. Additionally, the university has conducted mock evacuation drills to ensure quick responses to natural disasters or fires. Furthermore, the university collaborates with Public Security and Al-Balqa Applied University through academic programs at the Prince Hussein bin Abdullah II Academy for Civil Protection, which focuses on disaster management, crisis handling, and other related fields. This ongoing cooperation is aimed at enhancing the ability to address climate change impacts and other emergencies both within the country and across borders.

### University of Jordan develops emergency plan to deal with snowstorm

Amman, January 6 (Petra) - The University of Jordan has increased its readiness to deal with the impact of the snowstorm, which is expected, according to weather stations, to cross the Kingdom on Tuesday evening. The President of the University and Chairman of the Higher Committee for Crisis and Emergency Management, Dr. Ekhleif Tarawneh, instructed the relevant units, departments and agencies at the university to follow and implement the crisis, disaster and accident management plan developed by the committee, which aims to increase the university's readiness to confront all forms of disasters and accidents and reduce the negative human and material effects and consequences during the expected snowstorm. Tarawneh pointed out in a press statement on Tuesday that the Higher Committee for Crisis and Emergency Management and its Executive Committee are in a permanent session to follow up on emergency weather conditions. He called for coordination between the university's units and departments and cooperation to confront the prevailing weather conditions in the Kingdom, expressing his pride in the members of the university's student union who launched an initiative to exert their utmost efforts to preserve the university's property during periods of rain and snow. In addition, the Vice President for Administrative and Financial Affairs/Chairman of the Executive Committee for Crisis Management, Dr. Imad Salah, followed up on the necessary measures and precautions taken by the relevant units and departments at the university to deal with what the snowstorm may cause. Salah, accompanied by a number of university officials, toured the campus to ensure the safety of water drainage and communications and the readiness of transportation and mechanisms used to open the campus streets when snow accumulates. In a related context, the University of Jordan Hospital has developed plans to receive medical cases by providing a cadre of specialist doctors and supporting medical and administrative staff to enable the hospital to perform its humanitarian role to the fullest. It is noteworthy that the University of Jordan developed a strategic plan last year to deal with cases that require declaring a state of emergency at the university in the following cases: fires, building collapses, earthquakes, explosions and radioactive, chemical or biological pollution, weather conditions/snowfall and road closures, wars and conflicts. --(Petra) M/K/M A/M/B

## Academic Cooperation Agreement between Public Security, the University of Jordan and Al-Balqa Applied University

- The University of Jordan has joined a project supported by the U.S. National Institutes of Health (NIH) to establish the "Global Center for Climate Change, Water, Energy, Food, and Health Systems."** The project, led by Dr. Ahmed Al-Slaimeh from the university, aims to address the impact of climate change on health, energy, water, and food systems. The initiative is a collaboration between five academic institutions and seven organizations from Jordan and the U.S., with a budget of approximately \$260,000 for the university and a total project funding of \$3.5 million.

During a meeting with Dr. Wael Al-Dalimi from the University of California, San Diego, the university's president, Dr. Nazir Obeidat, emphasized the importance of raising awareness in Jordan about climate change and its effects. Dr. Al-Dalimi also presented a seminar on climate change's health impacts, focusing on rural areas in Jordan and water scarcity. The project aims to research solutions for health outcomes, assist communities affected by water scarcity due to climate change, and develop strategies for adapting to these challenges. The center will involve 30 experts in various fields, including energy, agriculture, health, engineering, and economics.

## Challenges and Areas of Improvements

**The University of Jordan** seeks to improve SDG 13 (Climate Action) by adopting several strategies to mitigate climate change and enhance sustainability. The university can reduce carbon emissions by implementing a campus-wide strategy that includes adopting renewable energy sources like solar panels and wind turbines, improving energy efficiency in buildings, and promoting the use of electric vehicles for campus transport. Climate change and sustainability topics can be integrated into academic programs, offering specialized courses, workshops, and research opportunities focused on environmental issues, climate policy, and sustainable solutions. In terms of sustainable campus operations, the university can adopt water conservation measures, promote waste management strategies, and implement green building practices for new constructions and renovations to reduce its environmental impact. Green research initiatives can be fostered by encouraging interdisciplinary research on climate change, renewable energy, and sustainability, while climate resilience and adaptation projects such as creating green spaces and implementing rainwater harvesting systems can be developed. The university can also establish a carbon offset program to balance its emissions by investing in projects like forest restoration or renewable energy. Furthermore, campus sustainability programs such as a zero-waste campaign, sustainable transportation options, and energy-efficient infrastructure can be launched to promote eco-friendly behaviors. Student-led climate initiatives, including climate awareness campaigns and tree planting, can encourage student involvement, while partnerships with local and international organizations can enhance collaborative efforts on climate action. Lastly, organizing seminars and conferences on climate change solutions can further the university's role in climate change advocacy. By implementing these strategies, the University of Jordan can significantly contribute to combating climate change and promoting a sustainable, climate-resilient future.

**SDG 14: Life Below Water** aims to conserve and sustainably use water resources, encompassing oceans, seas, lakes, rivers, and other aquatic ecosystems. This goal addresses the urgent need to protect aquatic life from pollution, overexploitation, and habitat destruction. It calls for the reduction of marine pollution, the sustainable management of fisheries, the restoration of aquatic ecosystems, and the preservation of biodiversity. Recognizing that these ecosystems are essential for food security, economic growth, and climate regulation, SDG 14 emphasizes a balanced approach that benefits both environmental health and the livelihoods of communities dependent on water resources.

### **SDG 14 and the University of Jordan**

**The University of Jordan (UJ) actively supports SDG 14** through research, education, and community outreach initiatives that focus on sustainable water use and ecosystem conservation. UJ publishes reports on aquatic sustainability, including studies on fish communities in the Gulf of Aqaba and the ecological structure of the Red Sea. The university's Marine Science Station Aquarium educates the public on aquatic biodiversity and the importance of preserving marine ecosystems. Through collaborative programs, UJ raises awareness about sustainable fishing practices and partners with local communities on water conservation and pollution prevention efforts. By working across disciplines, UJ demonstrates a strong commitment to safeguarding Jordan's aquatic environments and promoting responsible stewardship of these critical resources.

# 14 LIFE BELOW WATER

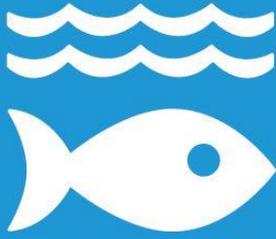

- [The University of Jordan \(UJ\) has conducted significant research to support SDG 14](#), including studies on artificial lagoon fish communities in the Gulf of Aqaba. One such study surveyed 185,026 fish individuals across 101 shallow-water species from 38 families. The research highlighted that the most abundant species included the robust silverside, Red Sea bream, and bluestripe herring, which together constituted around 80% of the total fish population. Additionally, the lagoons have attracted coral reef fish species like butterflyfish and angelfish, establishing a new habitat. These artificial lagoons act as protected areas where fishing is restricted, allowing fish populations to thrive, supporting biodiversity, and enhancing commercial fish stocks.

A screenshot of a web browser showing a ResearchGate page. The address bar contains the URL: researchgate.net/publication/343125670\_DEVELOPMENT\_OF\_FISH\_COMMUNITIES\_IN\_ARTIFICIAL\_LAGOONS\_IN\_THE\_GULF\_OF\_AQABA\_RED\_SEA. # 14 LIFE BELOW WATER

Another key study focused on the community structure of deep-sea fishes in the northern Gulf of Aqaba, using fish traps and long lines to sample fish at depths ranging from 60 to 700 meters. This study identified 369 fish individuals from 37 species and 21 families, revealing valuable information on commercially important species like Blueskin Seabream (*Polysteganus coeruleopunctatus*) and Bigeye Hound Shark (*Iago omanensis*). It provided depth distribution data and GIS maps for these species, contributing essential insights for sustainable fishery management. This research underscores UJ's commitment to marine conservation and sustainable fisheries, aligning with SDG 14's goals to protect aquatic ecosystems.

### Abstract

The aim of this study was to investigate the community structure of deep sea fishes in the northern Gulf of Aqaba. Deep fish traps, short lines and long lines were deployed at depth ranges from 60 to 700 meters. A total of 369 fish individuals from 37 species and 21 families were identified. The most abundant species were Blueskin Seabream (*Polysteganus coeruleopunctatus*) and Bigeye Hound Shark (*Iago omanensis*). The study provided depth distribution data and GIS maps for these species, contributing essential insights for sustainable fishery management. This research underscores UJ's commitment to marine conservation and sustainable fisheries, aligning with SDG 14's goals to protect aquatic ecosystems.

## Program Specifications

PhD in Land, Water and Environment / Program Overview

### About the program and its main topics

The program was established in 2003 to specialize in the land and water sectors with an environmental dimension. Students from related specializations are accepted from the Faculties of Agriculture and Engineering and the Master of Environmental Sciences Program. The main topics of the program include water and land management and their uses, in addition to environmental management and dealing with local and global environmental problems related to the land and water sectors, such as desertification.

- **The University of Jordan** offers various educational and outreach programs focused on the sustainable management of fisheries, aquaculture, and marine resources through its Marine Biology Department and Marine Science Station. The Marine Biology Department is home to a number of faculty members with expertise in aquaculture and marine ecology, and it aims to provide students with comprehensive knowledge on the biology and sustainability of marine life. The department is actively involved in research on marine plants, animals, and aquaculture, which contributes to the sustainable management of marine ecosystems.

**The Marine Science Station, a collaborative effort between the University of Jordan** and Yarmouk University, conducts applied and theoretical research on marine sciences, including fish, coral reefs, and marine sediments. It also focuses on aquaculture and seawater quality monitoring programs. The station's work directly contributes to understanding the impacts of human activities along the coast and promotes sustainable practices in marine resource management. Additionally, the station offers research and analysis tools, including laboratories, diving units, and boats, to support local and national research efforts on marine sustainability.

## Station Strategy

### Marine Science Station Strategic Plan

The Marine Science Station was established in the mid-seventies and is affiliated with Yarmouk University and the University of Jordan. The Marine Science Station seeks to become a scientific institute for research related to applied and theoretical marine sciences in a wide and diverse fields, focusing directly on the marine environment and its components such as fish, coral reefs and sediments, in addition to aquaculture. It operates and supervises monitoring programs for seawater quality and its impact on the marine environment. The increase in human activities along the coast has led to an increase in the role of marine sciences in providing researchers in various marine fields. The Marine Science Station contains laboratories and tools for research and analysis in addition to a diving unit, boats .and housing for visiting researchers and students

Citation: Ali Abdumajeed Zureigat, A. (2022). Challenges and Solutions Related to Hunting Sport in Jordan from the Jordanian Drafting Point of View. *Dirasat: Human and Social Sciences*, 49(6), 240–248.  
<https://doi.org/10.35516/hum.v49i6.4006>

**Abstract**  
The study aimed to identify the level of challenges facing the sport of hunting from the point of view of Jordanian hunters as well as the proposed solutions to those challenges, and to achieve this, the researcher used the descriptive approach on a sample consisting of (n = 133) hunters. To reduce face-to-face interaction, an (open) electronic questionnaire was built using (Google questionnaire), which consisted of (two questions) that addressed the challenges facing the sport of hunting and the proposed solutions from their point of view. Then the researcher worked with the Delphi method, which is building a new questionnaire based on the answers of the study sample on the open questionnaire for the most frequent paragraphs with the five- Answers Likert responses ladder and redirecting them again to the sample. It consisted of (57) paragraphs. The challenges dealt with (26) paragraphs. In addition, the proposed solutions (31) paragraphs. To treat the data statistically, the researcher used means, standard deviations, and the Cronbach Alpha equation. The results of the study showed that the level of challenges was high for the study sample with an average of (4.44). The most important challenge is that the study sample was (limited hunting grounds) and the average of the proposed solutions was high with an average of (4.57). It was the most important solution for establishing hunting resorts to attract tourism.

**Keywords:** Challenges; solutions; sport hunting; Jordanian hunters.

In addition, research conducted by the university, such as the study on fishing practices in Aqaba, highlights the challenges facing local fishermen, including the decline in fish stocks due to environmental pressures. The study suggests solutions such as expanding fishing areas and integrating marine farming to support sustainable livelihoods for fishermen while promoting marine ecotourism. This aligns with the university's efforts to engage the community in preserving marine resources and developing sustainable practices for the future.

**ABSTRACT** An analytical study was conducted on the fishing situation and the social and economic characteristics of fishermen working on the coast of the Gulf of Aqaba in Jordan during one year (2013-2014), in addition to relying on fishing records for previous years starting from 2010. Multiple questionnaires were designed that included approximately 160 fishermen belonging to 129 families, to track and analyze the fishing situation in Aqaba, as well as the social and economic characteristics of the fishermen segment. The results, after statistical analysis, indicated that

- **The University of Jordan** actively supports and organizes events to promote the conservation and sustainable use of water and marine resources. For example, the university hosted a workshop titled "Developments in Water Resources and Irrigation Management in California and Jordan," in partnership with the University of California, FAO, and AARINENA. This event focused on sharing innovations in water management and irrigation techniques, highlighting sustainable practices crucial for Jordan's water-scarce environment.

## Challenges and Areas of Improvements

**The University of Jordan's Aqaba Branch,** located in the coastal city of Aqaba, plays a key role in supporting SDG 14 (Life Below Water). Given its proximity to the Red Sea, the Aqaba campus is uniquely positioned to foster marine research and conservation efforts. The university could further elevate its support for SDG 14 by transforming its Aqaba campus into a "Marine Sustainability Hub," where interdisciplinary teams of students, faculty, and local partners collaborate on marine-focused research and projects. By incorporating cutting-edge technologies like virtual reality tours of coral reefs and oceanic ecosystems, the Aqaba branch could offer immersive learning experiences in marine conservation. Additionally, the university could establish a "Blue Campus" initiative at the Aqaba location, where sustainability practices are embedded in every aspect of campus operations to reduce the environmental impact on the surrounding marine environment. In partnership with marine conservation organizations, students could engage in local "adopt-a-reef" programs, contributing to the restoration of coral reefs and mangroves. An "Ocean Heroes" campaign could be launched at the Aqaba branch, encouraging students and staff to minimize plastic use, adopt biodegradable materials, and participate in beach clean-up activities. By leveraging its coastal location and fostering global collaborations, the University of Jordan's Aqaba Branch could become a center of excellence for ocean sustainability, marine research, and environmental stewardship, making significant contributions to SDG 14.

**15** LIFE  
ON LAND

**SDG 15: Life on Land**, focuses on conserving, restoring, and promoting sustainable use of terrestrial ecosystems. It aims to protect biodiversity, prevent land degradation, and promote sustainable management of forests, mountains, and arid areas. With the growing threats from deforestation, habitat loss, and invasive species, this goal highlights the importance of sustainable land practices that protect vital ecosystems and reduce biodiversity loss. SDG 15 encourages efforts that contribute to ecosystem resilience and support livelihoods dependent on healthy land ecosystems.

**The University of Jordan (UJ) actively aligns with SDG 15** through research, conservation, and outreach initiatives. UJ publishes studies on local ecosystem conservation, such as native plant growth, the impact of planting forage shrubs in arid lands, and economic assessments of invasive species like *Prosopis juliflora*. The university also hosts events and offers educational programs promoting sustainable land use and ecosystem management, including collaborations with local communities and policies supporting biodiversity conservation. Through these initiatives, UJ plays a critical role in advancing environmental sustainability, particularly in Jordan's arid and semi-arid regions, contributing to the global goals of SDG 15.

- **The University of Jordan publishes reports on environmental sustainability, including studies on arid land vegetation, *Prosopis juliflora* invasion, and environmental education. These studies focus on improving land management, addressing ecological challenges, and fostering environmental awareness in local communities:**

**A. The study on planting forage shrubs and barley in Jordan's arid rangelands assessed the effects on natural vegetation. Using three sites with subdivided plots, researchers planted *Atriplex halimus*, *Salsola vermiculata*, and barley in three of the plots, leaving the fourth as natural vegetation. Results showed that plots with *Atriplex* had the highest biomass, rain use efficiency and carrying capacity. However, introducing these plants negatively affected the growth of natural vegetation, indicating that while certain forages may improve yield, further socioeconomic and biodiversity impact studies are necessary before wide adoption.**

The screenshot shows a web browser displaying a ResearchGate article. The browser's address bar shows the URL: [researchgate.net/publication/340829410\\_EFFECT\\_OF\\_PLANTING\\_FORAGE\\_SHRUBS\\_AND\\_BARLEY\\_ON\\_ATTRIBUTES\\_OF\\_NATURAL\\_VEGETATION\\_IN\\_ARID\\_LANDS](https://researchgate.net/publication/340829410_EFFECT_OF_PLANTING_FORAGE_SHRUBS_AND_BARLEY_ON_ATTRIBUTES_OF_NATURAL_VEGETATION_IN_ARID_LANDS). The ResearchGate header includes a search bar, a navigation menu with 'Discover by subject area', 'Recruit researchers', and 'Join for free', and a teal navigation bar with 'Home > Ecology > Arid'. The article title is 'EFFECT OF PLANTING FORAGE SHRUBS AND BARLEY ON ATTRIBUTES OF NATURAL VEGETATION IN ARID LANDS', published in April 2020 in *Fresenius environmental bulletin* 29(6):4777-4788. The authors listed are Mahfouz Abu-Zanat, Hosam H Titi, Muhanad W. Akash, and Tawfiq A Al-Antary, all from the University of Jordan. The article has 1 citation and 31 references. On the right, there is an advertisement for ResearchGate titled 'Build the best teams in science and research' with a 'Find out more' button.

**B. Research on the *Prosopis juliflora* invasion in Sweimeh Village, Jordan, evaluated its economic impact and community management preferences. This invasive species provided firewood and fodder, valued at JOD 2165 per household annually, yet it also decreased household welfare by occupying arable land and causing injuries, resulting in an estimated JOD 1410.5 income loss. Community feedback favored managing rather than eradicating the plant, suggesting policy efforts should balance socioeconomic benefits with controlling environmental harm through collaborative management.**

**C. A study of Earth and environmental sciences teachers in northern Jordan Valley schools explored their environmental knowledge and practices. Among the 86 teachers surveyed, environmental knowledge averaged 76%, with practices at 63%, showing moderate engagement. No significant differences were found based on gender, qualifications, or experience. However, a strong positive relationship existed between knowledge and environmental practices, leading to recommendations for increased idea-sharing and collaboration among teachers to foster an enhanced environmental culture in schools.**

Citation: Taleb, W. , & Malkawi, A.(2020) . The environmental culture of the teachers of Earth and environment sciences in the schools of northern Jordan Valley Brigade and the extent of their practice in light of some variables. *Dirasat: Educational Sciences*, 47(4), 90-103. Retrieved from <https://dsr.ju.edu.jo/djournals/index.php/Fdu/article/view/2444>

#### Abstract

This study aimed to investigate the level of environmental culture among Earth and environment sciences teachers in the northern Jordan valley brigade schools in light of some variables, and the positive practices towards the environment. The study sample consisted of (86) teachers, (55) female teachers and (31) male teachers, who taught Earth and environment sciences. Questionnaires were designed and were applied to the study sample to measure the positive practices towards the environment. The study results showed that the level of environmental knowledge among teachers was of moderate level with a score of (76%). The level of environmental practice among earth and environmental science teachers was moderate with a score of (63%), and there were no statistically significant differences in the level of environmental knowledge among teachers and their practice according to variables of gender, scientific qualification, and experience. The results indicated that there was a positive and strong relationship between the level of environmental knowledge of teachers and the level of environmental practice. The study recommended that earth and environment sciences teachers from different schools should be encouraged to exchange ideas, information and experiences related to environmental culture.

- The University of Jordan supports conservation and sustainable land use by preserving its natural forest and green spaces. It participates in environmental initiatives and organizes tree planting activities to raise environmental awareness among students and community:

**A. Environmental Ranking and Green Spaces:**  
**The University of Jordan continues to improve its position in the UI Green Metrics ranking, where it ranked 98th globally in 2024. As part of its commitment to environmental sustainability, the university has a natural forest area covering 62,500 square meters and green spaces accounting for 6.34% of its total area. The university focuses on preserving these green areas while avoiding overdevelopment and allocates a portion of its budget for sustainable development initiatives.**

The screenshot shows a news article on the UI Green Metric website. The article title is "The University of Jordan continued its progress in the UI Green Metrics ranking by six positions globally, ranking (98) compared to 2014 and (181) positions compared to 2013". The article text includes: "The university is interested in this classification to increase its international reputation in the field of environment and sustainable development, to increase awareness within the university and the local community of environmental and sustainable development issues, and to help in developing an improvement plan that reflects positively on the university and Jordan. It is measured by the following indicators: 1. Work environment and infrastructure (15%)". Another highlighted section states: "The University of Jordan contains a natural forest area extending over an area of 62,500 square meters (6,16%) of the total area of the university, and a percentage of (6,34 %) of the total area is planted with gardens and green spaces". A third highlighted section says: "The university allocates a percentage of the total university budget for sustainable development and green environment purposes". The article concludes with: "In this field and to increase its global ranking , the university seeks to preserve the areas planted with forests, gardens and green roofs in the university environment and not to exhaust them by constructing new buildings. The university also seeks to increase what is allocated in its annual budget for sustainable development purposes". A second indicator is partially visible: "2. Energy and climate change : (21%)".

## B. “Protect it and Its Role” Initiative:

**The University of Jordan participated in the "Protect it and Its Role" initiative at the Ajloun Forest Reserve, in collaboration with the Saudi Embassy, SABIC, and other local partners. This event, held on World Environment Day, aimed to raise awareness about forest preservation and the safe use of plastic. It involved youth from both Saudi and Jordanian universities, who participated in cleaning up the area, attending environmental lectures, and engaging in activities related to recycling and environmental conservation.**

### **C. Tree Planting Activity at the Faculty of Agriculture:**

**The Faculty of Agriculture at the University of Jordan organized a tree planting event to celebrate Tree Day, where forest trees were planted around the college. The initiative aimed to expand green spaces on campus, promote environmental responsibility among students, and enhance the university's aesthetic appeal. The activity also emphasized the importance of volunteer work, community participation, and the preservation of nature.**

- **The University of Jordan actively works to maintain and extend existing ecosystems and their biodiversity. It recently hosted the "Law, Biodiversity, Nature Protection and Heritage" conference, which addressed environmental challenges, including the protection of biodiversity and nature in the Middle East and North Africa region. The conference emphasized the importance of legal frameworks in addressing biodiversity loss, climate change, and pollution. The university's initiatives also include reviewing its academic programs to better tackle environmental challenges and establishing the Institute of Public Health and Public Policy to focus on climate change, water, and biodiversity issues.**

Law, Biodiversity, Nature Protection And Heritage" Discussed At "UJ" In A Conference Launched Today

- The University of Jordan offers educational programs focused on ecosystems, wild flora, and fauna, with a strong emphasis on biodiversity. These include:

### 1. PhD in Life Sciences

The program includes a course on biodiversity, covering topics such as genetic diversity, species diversity, ecosystem diversity, biodiversity loss, and protection strategies. The course aims to equip students with knowledge of biodiversity's role in food security, pharmaceuticals, and ethical considerations.

science.ju.edu.jo/ar/arabic/Lists/Courses/Disp\_Course.aspx?ID=606&dept=العلوم20%الحياتية&prog=علوم20%دكتوراه&deptName=العلوم20%الحياتية

Message

Providing the community with qualified graduates to assume their roles in advancing agricultural development, raising environmental and climate awareness, and working to solve land, water and environmental problems in Jordan through creativity in teaching and scientific research

Mission

- **The University of Jordan offers educational programs and outreach initiatives for sustainable land management in agriculture. Recently, the Faculty of Agriculture, in partnership with the Australian Embassy, organized a workshop on artificial intelligence and machine learning applications in crop irrigation and flood management. This workshop provided students and faculty with insights into modern climate risk management technologies. The initiative is part of a broader project focused on using AI to address climate challenges, such as flash floods and water management, especially in the Dead Sea Basin. This effort aligns with the university's commitment to equip students and the agricultural sector with advanced skills in sustainable land and water management.**

Participants Call For A Roadmap Within The Framework Of Governance Of The Water-Energy-Food-Environment Nexus During The Proceedings Of The Third Water-Energy-Food-Environment Nexus Conference

• **The University of Jordan has actively engaged in efforts to reduce plastic and other waste on campus through various initiatives and partnerships.**

**1. The University of Jordan’s Aqaba Branch recently hosted a workshop on plastic pollution in the Gulf of Aqaba, involving experts from multiple countries. Supported by the European Union, the workshop enhanced skills in marine waste management, with President Dr. Ghaleb Abbasi emphasizing the importance of these efforts for protecting marine ecosystems.**

**The university trained local participants in plastic waste removal, guided by project director Dr. Fouad Al-Hourani. Training included beach clean-ups, underwater waste collection, and sample analysis at the Marine Science Station, aimed at building strategies to monitor and reduce marine pollutants.**

A screenshot of a news article from the Marine Science Station website. The article is titled 'Conclusion of the training workshop on treating plastic pollutants' and is dated 2023-03-25T21:00:00Z. The main image shows Dr. Ghaleb Abbasi, the President of the University of Jordan, Aqaba Branch, sitting at a desk with his hands clasped. The article text describes the workshop's activities, its support by the European Union, and the participation of international experts from various countries. The article also mentions that the President appreciated the workshop's contribution to marine waste management.

**2. In the second semester of 2018-2019, Environmental Culture students led initiatives to reduce pollution by promoting awareness for environmental preservation.**

Environmental Culture Students' Initiatives for the Second Semester 2018-2019

A number of environmental culture students participated intensifying efforts to reduce pollution requires spreading awareness, which begins with individuals and then spreads to all segments of society, which will preserve the environment for a better life for us and for future generations

**3. In September 2023, the University of Jordan launched a Recycling Awareness and Training Project through the Local Community Networking and Development Center. The project aims to educate students and staff on waste separation, sorting, and recycling to promote a sustainable campus. A partnership with Al Oula for Recycling Paper and Cartons was established to improve waste management practices. The initiative supports the university's goal to raise environmental awareness and foster a culture of recycling.**

UJ Launches Recycling Awareness And Training Project

As part of the University of Jordan's (UJ) commitment to adopting sustainability and sound environmental practices, the Local Community Networking and Development Center launched a student awareness and training program in the field of separating, sorting and recycling waste.

The project aims to build and raise awareness among university students and staff in the field of separating waste from the source and recycling to reach a sustainable university environment that...

- The University of Jordan's Chemical Engineering Department offers a course on Hazardous Waste Management (CHE0905574) that focuses on the regulatory frameworks, sources, properties, classification, and safe disposal of hazardous waste. The course covers the minimization of hazardous waste, pollution prevention options, and treatment technologies, as well as remediation processes. It also addresses the management of non-conventional hazardous wastes such as medical waste. The course aims to provide students with a fundamental understanding of waste management, landfill design, biogas production from landfills, and the socio-economic aspects of waste management systems in Jordan. Students gain practical skills for waste collection, routing, and communication with local communities regarding waste management policies.**

**Course Description :**  
Hazardous wastes regulatory framework and international conventions. Hazardous waste sources, properties and classification, storage, transport, fate and transport of contaminants. Hazardous waste minimization and pollution prevention options. Hazardous waste treatment technologies and remediation processes, as well as, safe disposal of hazardous waste. Management of non-conventional hazardous wastes (medical waste, etc).

- **The University of Jordan** hosted a training workshop with IRIDRA as part of the EU-supported NAWAMED project, focusing on nature-based solutions for greywater reuse in urban areas. The workshop aimed to build participants' skills in designing sustainable, low-cost water treatment technologies, including a field visit to a pilot greywater treatment plant at the university.

**Dr. Ahmed Al-Salaymeh**, the project coordinator, highlighted the goal of using non-conventional greywater for domestic purposes like irrigation. Presentations covered water resource management, legal frameworks for non-traditional water use, and pilot treatment plant designs. The workshop fostered collaboration between local and international researchers on sustainable water practices.

University Of Jordan Holds Training Workshop On Nature-Based Solutions For Domestic Water Reuse

University of Jordan News (UJ News) Sanaa Al-Samadi - The University of Jordan held a technical training workshop today in cooperation with the Italian company (IRIDRA), as part of the project 'Nature-Based Solutions for Reusing Household Water in Mediterranean Countries' (NAWAMED), supported by the European Union.

- **The University of Jordan** hosted a workshop on the European Regional Cooperation Program "INTERREG NEXT MED," funded by the EU, led by Dr. Ismat Al-Karadsheh. The program, running from 2021 to 2027, promotes knowledge exchange between Mediterranean countries and the EU, offering funding opportunities for joint projects. Dr. Al-Karadsheh highlighted the upcoming call for project proposals, with over 100 million euros available. Success stories from previous projects, including the CEOMED project on organic waste management and the NAWAMED project on water reuse, were shared, showcasing the program's impact on sustainable development and cross-border collaboration.

PROCEDURES MANUAL IN SCIENTIFIC RESEARCH

- **During the University of Jordan’s Scientific Day for the College of Agriculture, Dr. Nazir Obeidat emphasized the need for sustainable agricultural and food systems to tackle the global food security crisis, exacerbated by climate change. He highlighted that with the world’s population projected to reach nine billion in the next few decades, agriculture must be capable of producing 70% more food than today. Obeidat stressed the importance of developing resilient agricultural practices and increasing funding for research and training to address future challenges. Experts also discussed the rise in obesity rates in Jordan and the need for improved nutrition and food security, recommending the documentation of traditional Jordanian foods and promoting nutrition education in universities.**

- The University of Jordan** launched the "Nexus Watch" project in 2023, supported by Nuffic, to enhance skills in the water, food, and energy nexus for sustainable development. The project includes workshops in Jordan and the Netherlands, involving local and international partners like Mutah University and the University of Twente. In February 2024, a workshop focused on environmental monitoring and geographic information technology was held to improve the nexus, addressing climate adaptation and crop loss mitigation. Additionally, the Hamdi Mango Center hosted a training workshop on advanced devices for monitoring these areas, promoting scientific research and collaboration.

- The University’s Building Services and Maintenance Divisions each play essential roles in maintaining the campus’s functionality, safety, and aesthetics. The **Building Cleaning Services Division** focuses on keeping event sites spotless, distributing cleaning supplies across buildings, and managing materials storage and purchase procedures. The **Parks Division** maintains all campus gardens through planting, pruning, and decorative arrangements for events, while also managing emergency tree cutting and olive harvesting. The **Communications Division** ensures seamless internal and external calls, maintains telephone infrastructure, and updates the phone directory. **Machinery Maintenance** oversees vehicle upkeep for safe use, and the **Movement Division** coordinates all transportation for university-related trips. Finally, the **Teaching Complexes Division** organizes reservations for lecture halls and event spaces, ensuring smooth scheduling for classes, exams, and university events.

# 15 LIFE ON LAND

## Challenges and Areas of Improvements

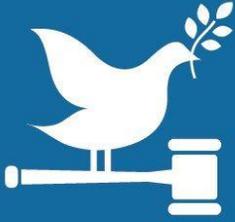

**The University of Jordan** has the potential to be a transformative force in advancing SDG 15 (Life on Land) by embracing creative and forward-thinking strategies to protect, restore, and sustainably manage terrestrial ecosystems. Imagine a campus where native trees bloom, botanical gardens thrive, and wildlife habitats flourish, creating an immersive, living classroom where students can dive into environmental science and conservation firsthand. By weaving land conservation, biodiversity, and ecosystem restoration into academic curricula, the university can inspire a new generation of students to become passionate stewards of the land. Beyond the campus, partnerships with local farmers to adopt sustainable agricultural practices and the establishment of model farms can turn theory into practice, providing students with hands-on learning opportunities. The university could also engage in large-scale reforestation projects, joining forces with local and global conservation groups to restore ecosystems and combat desertification. In addition to this, the university can increase its land holdings, using them responsibly for both human and environmental benefit, creating vibrant spaces that serve as a model for sustainable land use. Hosting dynamic workshops, eco-tourism initiatives, and sustainability campaigns would deepen the connection between the university, students, and the local community, fostering a shared responsibility for the land we all rely on. By taking these bold steps, the University of Jordan would not only enhance its commitment to SDG 15 but also become a beacon of environmental innovation, demonstrating how higher education can be a powerful catalyst for positive change in the world.

# 16 PEACE, JUSTICE AND STRONG INSTITUTIONS

- **SDG 16: Peace, Justice, and Strong Institutions** focuses on building peaceful, just, and inclusive societies by promoting the rule of law, ensuring access to justice, and fostering accountable institutions. It aims to reduce violence, combat corruption, and encourage participation in governance, all essential for sustainable development.
- **The University of Jordan supports SDG 16** through inclusive governance, with elected representatives from students, faculty, and staff in its decision-making bodies. UJ also engages local and national stakeholders, offering expert advice and conducting research to inform policy on topics like security and economics. Through these efforts, UJ contributes to building transparent, accountable institutions and promoting peace and justice in Jordan.
- **The University of Jordan's highest governing body, the Board of Trustees, includes members who are appointed by the King of Jordan, reflecting the close alignment between the university's leadership and national governance. The President of the University serves as an ex-officio member of the Board, meaning the president is a voting member by virtue of their office, with significant influence over policy decisions and strategic directions. This board is crucial in appointing the president, recommending candidates to the monarch, and advising on university governance, thus reinforcing the accountability and executive structure at the University of Jordan.**

The University of Jordan Employees System (2003) defines employee categories such as classified, contract, and temporary employees, detailing their qualifications, responsibilities, and employment conditions. Employees are hired based on qualifications, with a probation period and possible promotions. Policies cover employee duties, performance evaluations, and disciplinary actions. Employees are entitled to various leave types, including maternity, annual, sick, and Hajj leave. Disciplinary procedures may lead to penalties or dismissal, and employees must settle financial obligations upon leaving. The system also outlines the rules for transfers, delegation, and loans, and defines conditions for the end of service, including resignation, dismissal, and health-related incapacity.

## Code of Conduct for Faculty Members at the University of Jordan

The Code of Conduct for Faculty Members at the University of Jordan, established in 2017 and amended in 2022, sets forth ethical standards and professional responsibilities, emphasizing justice, integrity, and adherence to university regulations. Faculty members are expected to perform their duties impartially, respect students' rights, maintain confidentiality, promote moral values, and support students with special needs. They must cooperate with superiors, maintain respectful relationships with colleagues, and avoid actions that could harm the university's reputation or create conflicts of interest. The code also addresses responsible use of university resources, prohibits accepting gifts from students, and emphasizes the secure use of technology. Faculty members are guaranteed rights such as fair treatment, professional development, and a safe working environment, with the university ensuring equal opportunities and accommodations for those with disabilities. Compliance with the code is monitored by university leaders, and faculty members must acknowledge and commit to its principles.

## Code of Conduct and Job Ethics for Members of the Administrative Staff at the University of Jordan

The "Code of Conduct and Job Ethics for Members of the Administrative Staff at the University of Jordan," issued on 3/13/2017, outlines the expectations for university employees to promote efficiency, transparency, accountability, and professionalism. It emphasizes the importance of adhering to ethical standards, job duties, and responsibilities while maintaining confidentiality and protecting university assets. Employees are expected to respect superiors, subordinates, and colleagues, and cooperate in a positive work environment. The code also prohibits conflicts of interest and the acceptance of gifts that could influence objectivity. Violations will result in disciplinary action, and employees must acknowledge their commitment to the code, which is publicly accessible on the university's website.

The screenshot shows a PDF document viewer interface. The address bar at the top displays the URL: [offices.ju.edu.jo/en/gco/sustainabledevelopment/Code%20of%20conduct-%20ED1%20Policy.pdf](https://offices.ju.edu.jo/en/gco/sustainabledevelopment/Code%20of%20conduct-%20ED1%20Policy.pdf). The document title is "Code of conduct- ED1 Policy.pdf". The page number is 10 / 24, and the zoom level is 71%. The document content is displayed in a two-column layout. The right column shows the following text:

**B. Code of Conduct and Job Ethics for Members of the Administrative Staff at the University of Jordan**  
Issued by the Board of Deans Pursuant to its Resolution No. (188/2017) on 3/13/2017  
\*\*\*\*\*

**Article (1):** This code shall be called "**The Code of Conduct and Job Ethics for Members of the Administrative Staff at the University of Jordan**", and it shall be enforced as of the date of its issuance.

**Article (2):** The following terms, wherever they appear in this Code, shall have the meanings assigned to them below, unless the context indicates otherwise:

**University:** University of Jordan

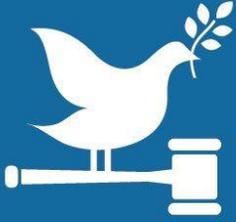

**The employee:** the person appointed to a classified and permanent position within the administrative staff of the university, including those appointed by contract or part-time.

**Article (3):** The provisions of this code shall be applied to all university employees.

**Article (4):** The efficiency of the staff and its ability to perform its mission in providing pioneering services to service recipients is an indicator for judging the efficiency and positivity of management systems. Therefore, the university pays attention to the employee as the mainstay of the comprehensive system of rational management, by acknowledging his/her rights and specifying his/her duties and job responsibilities in order to determine the ethical standards that should govern and frame the employee's performance. Moreover, the university is committed to assigning employees to administrative positions on the basis of merit, adequacy, entitlement, qualification and job training according to the terms and conditions stated in the applicable regulations and instructions in force. Therefore, the university adopts a set of rules of conduct to serve as a guide to achieve the university's vision, mission and goals.

**Article (5):** This code is based on the foundations and principles of justice, transparency, accountability, integrity, professionalism and impartiality, and aims to achieve the following:

1. Instructing employees and directing them towards sound job ethics and self-discipline frameworks that govern workflow. These frameworks are compatible with the legislation in force and are regulating of work at the university.

## Code of Conduct for Students of the University of Jordan

The Code of Conduct for Students at the University of Jordan, issued in 2017, establishes expectations for student behavior, focusing on integrity, respect, and responsibility. It promotes values such as honesty, creativity, and tolerance while emphasizing adherence to university rules both academically and socially. The code outlines misconduct in both academic and non-academic settings, including academic dishonesty (cheating, plagiarism), disruptive behavior (strikes, unauthorized material distribution), theft, property damage, harm (physical or psychological), discrimination, harassment, and substance abuse. It also covers misbehavior in the library, criminal behavior, unauthorized events or speakers, misuse of university property, and inappropriate appearance. Faculty and administrative staff are responsible for enforcing these guidelines to ensure a safe, ethical, and respectful academic environment.

**Amendments**

\*\*\*\*\*

**Article (1):** This code is called “Code of Conduct for Students of the University of Jordan”, and it shall be enforced as of the date of its issuance.

**Article (2):** The University of Jordan is a distinguished academic edifice with an independent identity and history, committed to noble human values and seeking to strengthen and consolidate them among university students and employees. In its quest to provide students with a distinguished learning experience, to adopt research that produces knowledge, and to build strong community bridges and effective partnerships, the University of Jordan promotes the values of creativity, innovation, excellence, tolerance and openness.

**Article (3):** This code of conduct applies to all students of the University of Jordan. It documents the university's expectations of students regarding the rules of conduct at the academic and non-academic levels, in a way that contributes to building students' personalities and making them able to assume responsibility within a framework of respect, honesty and responsible freedom.

**Article (4):** This code aims to explain the rules of acceptable behavior for students, help them understand the consequences of violating these rules in the educational environment, and help them make responsible decisions. Students should inquire and enrich their information about the laws, regulations and instructions of the university through consulting several sources. These include:

1. University website
2. Deanship of Student Affairs website
3. Student counseling offices

## Gender Equality and Social Inclusion Policy

The University of Jordan's Gender Equality and Social Inclusion Policy focuses on promoting a culture of justice, equality, and gender integration within its academic and administrative environments. The policy aims to eliminate gender-based barriers, ensuring equal opportunities for all individuals regardless of gender, and fostering a respectful and inclusive campus culture. It emphasizes women's roles in academia, addressing discrimination and promoting equal access to resources and opportunities. The university is committed to preventing gender-based violence, supporting work-family balance, and fostering female leadership in decision-making. The policy also encourages all members of the university to adhere to principles of respect and fairness, offering regular training and assessments to ensure progress toward these goals.

### سياسة العدالة والمساواة ودماج النوع الاجتماعي في الجامعة الأردنية

**1. المقدمة:**

تلتزم الجامعة الأردنية بتعزيز وتشجيع ثقافة دافعة للعدالة والمساواة ودماج النوع الاجتماعي داخل أروقتها الأكاديمية والإدارية. توضح هذه السياسة التزام الجامعة بإنشاء بيئة جامعية مراعية للنوع الاجتماعي والعدالة حيث يتم تقدير واحترام جميع الأفراد وتوفير فرص متساوية للنجاح. تهدف الجامعة الأردنية لتعزيز المساواة والقضاء على التمييز في مكان العمل.

تُشير المساواة بين الجنسين إلى الحقوق والمسؤوليات والفرص المتساوية للنساء والرجال والفتيات والفتيان، وتعد إحدى إشكاليات حقوق الإنسان، وكأحد الشروط المسبقة، وأحد مؤشرات التنمية المستدامة المركزة على الإنسان. فالمساواة بين الجنسين لا تعني أن المرأة والرجل متماثلان، ولكنها تعني أنه لا ينبغي حرمان المرأة والرجل من ممارسة حقوقهم الإنسانية بسبب جنس أي منهما.

ويُركز إدماج النوع الاجتماعي على إزالة العوائق والمعيقات التي تعرقل أعمال حقوق المرأة والرجل، بسبب الافتراضات التمييزية والممارسات التي تؤدي إلى إنعدام المساواة في المعاملة، وفي الحصول على الموارد والمنافع وتوزيعها. فعملية إدماج النوع الاجتماعي تنظر بطريقة منسجمة في الفروقات بين أدوار المرأة والرجل ومسؤولياتهم وظروفهم وأحوالهم في كل من السياسات والإجراءات، وتعترف أيضاً بأهمية مشاركة المرأة والرجل في وضع الأهداف والأولويات الحساسة والمستجيبة للنوع الاجتماعي. وتهدف عملية إدماج النوع الاجتماعي إلى تعزيز واستكمال مبادرات التدخل الخاصة بالنوع الاجتماعي، وهي لا تعتبر هدفاً بحد ذاتها.

**2. الهدف من سياسة العدالة والمساواة ودماج النوع الاجتماعي :**

1. تعزيز دور المرأة في البيئة الجامعية بجميع أشكاله.
2. ضمان العدالة من خلال تحديد ومعالجة العوائق في الأنظمة والتعليقات التي قد تمنع الوصول المتساوي للفرص والموارد لجميع أفراد مجتمع الجامعة.
3. ضمان أن يتم منح جميع الموظفين وطالبي العمل فرصاً متساوية وأن تكون الجامعة بمنزلة لجميع فئات المجتمع.
4. التعامل بالمساواة والاحترام مع جميع الموظفين، سواء كانوا بدوام كامل أو جزئي أو مؤقت. عند اختيار الجامعة الأردنية للموظفين وأعضاء الهيئة التدريسية أو ترقيتهم أو تدريبهم أو أي فائدة أخرى، سيتم ذلك استناداً إلى وقدراتهم وإمكانياتهم العلمية والعملية.
5. سيتم منح جميع الموظفين الإداريين وأعضاء الهيئة التدريسية المساعدة والتشجيع لتطوير إمكانياتهم الكاملة واستخدام مواهبهم الفريدة، بالتالي، سيتم استخدام مهارات وموارد الجامعة بشكل كامل .

**3. التزامات الجامعة الأردنية:**

- منع التمييز القائم على النوع الاجتماعي في بيئة الجامعة.
- تبني ممارسات عمل صديقة للأسرة تمكن النساء والرجال من المشاركة الكاملة في العمل والحياة الأسرية.
- تعزيز مشاركة النساء وقيدتهن في صنع القرار داخل الجامعة على جميع المستويات.
- تعزيز الشراكات مع المنظمات التي تدعو إلى المساواة القائمة على النوع الاجتماعي.

- The University has written policies and procedures to identify local stakeholders external to the university and engage with them. These are outlined in various aspects of the SWOT analysis, where several positive factors reflect the university's ongoing efforts to establish and maintain strong relationships with local and external entities.

**For example:**

- The university has a variety of **partnerships and memorandums of understanding** with local, regional, and international universities and institutions, aiming to create academic and research collaborations.
- There are **community service and engagement programs** that encourage faculty, staff, and students to actively participate in social and community development projects.
- The **university collaborates with local and international organizations** in various fields, ensuring that its academic programs and research are aligned with both local needs and global trends.
- The **university supports the development of industry links**, offering students opportunities for practical training, internships, and exposure to real-world challenges, further enhancing its role within the community and beyond.

**These strategic policies and procedures demonstrate the university's commitment to identifying key local stakeholders, engaging with them meaningfully, and fostering collaborations that benefit both the institution and the wider community.**

- **Four-Quadrant Analysis Preparation Model" or "SWOT is a strategic planning tool used to evaluate the Strengths, Weaknesses, Opportunities, and Threats of an organization, project, or initiative.**

The University of Jordan has written policies and procedures in place to identify local stakeholders external to the university and engage with them. This is reflected in the university's Strategic Plan (2022-2027), which emphasizes strengthening governance practices such as transparency, accountability, and participation. The university fosters relationships with external stakeholders through partnerships, collaborations, and community engagement efforts.

Moreover, the Good Governance Officer at the university plays a crucial role in promoting diversity, equity, and inclusion, advising on policies and initiatives that involve external community and stakeholders. The university also regularly assesses the satisfaction of both staff and students with its governance practices, ensuring that these relationships align with the university's strategic goals and external engagement efforts.

Through these policies and initiatives, the University of Jordan actively identifies and engages with local stakeholders to enhance its role in the community and beyond.

### Good Governance and Modern Management

#### Good Governance and Modern Management at the University of Jordan Strategic Plan (2022-2027)

The University of Jordan has set a key strategic goal focused on "Good Governance and Modern Management." The goal is supported by the following set of strategic objectives:

The University of Jordan Strategic Plan (2022-2027) includes one of the key strategic goal focused on Good governance and modern

# 16 PEACE, JUSTICE AND STRONG INSTITUTIONS

- The University of Jordan ensures that local stakeholders, including residents, local government, and civil society representatives (such as refugee resettlement agencies), have a meaningful role in university decision-making. This is demonstrated through their involvement in developing the university's strategic plan for 2022-2027, where stakeholders contribute to evaluating and shaping the university's vision, mission, and goals. The university values this input to align its strategies with both internal and external environments, ultimately improving its performance and impact. The university has established policies and procedures for engaging with external stakeholders, focusing on internal employee systems, governance, and collaborations, such as staff delegations to external roles or partnerships with other institutions. This inclusive approach reflects the university's commitment to academic leadership, quality assurance, and fostering connections beyond the university community.

Models Electronic services University Proficiency Exam Strategic planning Follow-up, evaluation and training Accreditation About the Center Home English Contact us Achievements

In order to achieve the vision of the University of Jordan aimed at achieving academic leadership locally and globally and its mission that takes upon itself to provide the local and global community with distinguished and competent graduates in all specializations and fields, the University of Jordan has paid attention to achieving international standards in the quality of its programs and ensuring the achievement of its internal quality. The concept of academic quality assurance includes a set of procedures, standards and performance indicators that adopt an optimal academic practice that ensures the quality of learning and teaching processes and ensures the achievement of the objectives of academic programs and targeted learning outcomes. The importance of academic quality assurance requires the existence of an approved practical guide that includes the most important quality assurance standards adopted by the University of Jordan and is constantly reviewed to keep pace with changes in the field of academic quality management. This guide has been prepared by the Accreditation and Quality Assurance Center, taking into account national references such as the Higher Education Accreditation and Quality Assurance Commission and international standards as detailed in the list of references. The Center also welcomes feedback from all users of this guide to enrich and develop it. It is important to note that we have taken into account the practical procedural aspect in designing this guide, considering that it is directed to faculty and administrative staff members to implement the standards contained therein. A description of each standard was provided, followed by an explanation of its importance and performance indicators that indicate the degree of its application, followed by an explanation of the procedures and models that make the application process clear, easy and stable. It must be mentioned that this guide is in line with the university's applicable regulations and instructions and does not conflict with them or constitute an alternative to them in any case, but rather complements them and ensures their application to improve academic practices at the University of Jordan

**Academic Quality Assurance at the University of Jordan :: A Practical Guide**

- First: Providing quality assurance standards
- Second: Creating and approving academic programs
- Third: Continuous review of academic programs
- .Fourth: Providing modern and effective learning, teaching and evaluation processes
- Fifth: Students, learning resources and student support

## Evaluation of vision, mission and goals by stakeholders

Greetings, As

the University of Jordan is working on preparing the strategic plan for the years 2022-2027, one of the most important procedures for its preparation is involving stakeholders in its construction. Given the importance of your role in evaluating the university's strategic vision, mission and goals as stakeholders and partners, which contributes to developing the university and improving its performance in a manner consistent with its internal and external environments. Accordingly, we kindly ask you to read this questionnaire carefully and put a check mark (✓) in front of the answer that expresses your personal opinion, thanking you for your kind cooperation.

- [The University of Jordan addresses issues related to organized crime, corruption, and bribery through its commitment to promoting awareness and prevention. The university has organized various initiatives aimed at combating such crimes. For instance, it has hosted lectures on critical topics such as human trafficking and cybercrimes, ensuring that students and staff are well-informed about the legal frameworks, societal impacts, and methods of prevention.](#)

Professor Dr. Ibrahim Al-Jarrah discusses the growing role of artificial intelligence (AI) in combating corruption, highlighting its ability to uncover hidden patterns in large data sets that traditional methods struggle to detect. AI is increasingly used worldwide to address issues like fraud in public procurement, tax evasion, and corrupt behavior among government employees. Countries like Ukraine, France, Brazil, and Estonia have implemented AI-driven systems to enhance transparency, detect fraud, and improve decision-making. Dr. Al-Jarrah emphasizes that AI will be a key tool in the fight against corruption, particularly through predictive analysis and the monitoring of financial transactions and government activities.

The University of Jordan's Faculty of Law, in cooperation with the Human Rights Directorate at the Ministry of Justice, held an awareness lecture on human trafficking. The event featured key speakers, including Dr. Hanan Al-Khalayleh, Director of the Human Rights Directorate, and Lieutenant Colonel Mohammad Khalaifat, Director of the Anti-Human Trafficking Unit. The lecture covered the legal aspects of human trafficking in Jordan, highlighting the 2009 law and its 2021 amendments, which increase penalties for traffickers. The discussion also emphasized the need for national efforts in training professionals to identify trafficking signs. The seminar aimed to raise awareness among students and the public about the gravity of human trafficking and encourage prevention efforts.

- The University of Jordan supports academic freedom through its comprehensive scientific research policy, which encourages faculty members to pursue research in areas of their choice. This policy, detailed in the "Scientific Research Instructions," ensures that researchers have access to necessary resources and a conducive environment for their work. Faculty are given time and support for research, and they can freely choose their research topics and publish their findings. The university also provides financial backing for research projects and publication support, allowing faculty to disseminate their work as they deem appropriate. The university ensures that academic freedom is upheld, as researchers can pursue and share knowledge without undue restriction.

# 16 PEACE, JUSTICE AND STRONG INSTITUTIONS

The University of Jordan affirms its commitment to protecting the freedom of opinion and expression for all its members, while emphasizing that such freedom must align with the rule of law and mutual respect. While the university welcomes constructive criticism, recognizing its importance in enriching the institution's progress and contributing to the nation, any form of abuse, slander, defamation, or insults directed at the university, its administration, or faculty members is not tolerated. In cases of such misconduct, students may be summoned by the investigation committees within the Deanship of Student Affairs. The university remains dedicated to fostering a respectful and positive environment for all.

- The University of Jordan publishes its financial data, including detailed reports on its annual budget. The financial information is made available through various documents that summarize the budget, revenues, expenses, and any deficits. For example, in the 2014 budget, which was approved by the Higher Education Council, the total budget amounted to approximately 143 million dinars with an estimated deficit of 47.7 million dinars. The report provides a breakdown of the university's revenue sources (such as tuition fees, government support, and self-revenue) and detailed expense categories (including recurring expenses, scientific research, and capital expenditures). These reports also highlight the collection and spending ratios, as well as the university's financial strategies to manage deficits and control expenditures.

- The University of Jordan provides specific expert advice to local, regional, and national governments through its various research centers and initiatives. For example, the **Strategic Studies Center**, established by royal decree in 1983, conducts research and studies in areas such as regional conflicts, international relations, security, and the political, military, economic, and social aspects of issues that affect Jordan and the Arab world. The center actively contributes to policy guidance by providing decision-makers with essential data and insights, including organizing events like seminars and conferences to facilitate dialogue.

The Center for Strategic Studies was established by royal decree in June 1983 to be an academic unit at the University of Jordan that is primarily concerned with conducting studies and research in the field of regional conflicts, international relations and security. It is also concerned with conducting studies and research in the political, military, economic and social aspects of issues of interest to Jordan and the Arab world that are related to the security of the region and affect its future, in addition to conducting opinion polls with the aim of providing researchers and decision-makers with the required data and information, and organizing events and activities such as seminars and conferences. The Center exercises the tasks and powers stipulated in the instructions of the Center for Strategic Studies at the University of Jordan and their amendments.

- The University of Jordan actively engages in outreach and capacity-building for policymakers and professionals on key issues like law, technology, and climate change. Through initiatives such as the Hamdi Mango Center and various workshops, the university fosters discussions on social issues, offering valuable insights to enhance understanding and skills among students, faculty, and external stakeholders. These efforts contribute to addressing pressing societal challenges.

1. The Hamdi Mango Center for Scientific Research at the University of Jordan hosted a lecture on "Chemical and biological tests conducted in the laboratories of the Department of Laboratories and Criminal Evidence." Presented by Lieutenant Colonel Abdul Qader Al-Dulat, the lecture highlighted the advanced forensic laboratory's role in crime detection using globally recognized devices. It also covered the core values of forensic evidence management, such as integrity, accuracy, and transparency. The event concluded with discussions on potential collaboration between the University of Jordan and the Department of Laboratories and Criminal Evidence.

2. The University of Jordan's Deanship of Student Affairs organized a dialogue seminar addressing university violence from legal, psychological, social, and security perspectives. Moderated by Dr. Ismail Al-Zayoud, the seminar featured experts, including Dr. Majd Al-Din Khamish, Dr. Yousef Abu Hamidan, Attorney Rania Diab, and Dr. Ahmed Qabaa. Discussions emphasized that university violence is often a reflection of broader societal issues. Speakers stressed the importance of education, awareness of legal rights, and maintaining a violence-free campus. The seminar also highlighted the need for universities to educate students on regulations and provide support to ensure a safe and respectful academic environment.

4. In November 2024, the University of Jordan's Faculty of Nursing hosted a dialogue seminar titled "Suicide: Psychological, Legal, and Religious Perspectives." The event, sponsored by Dr. Ashraf Abu Karaki, addressed the issue from multiple angles. Dr. Hassan Al-Tarawneh discussed the legal implications of suicide, highlighting Jordan's 2022 law criminalizing it. Dr. Omar Al-Rousan presented Islamic perspectives, explaining that both the Qur'an and Hadith strictly prohibit suicide. Dr. Youssef Muslim focused on the psychological aspects, emphasizing the importance of understanding the behaviors and causes leading to suicidal thoughts. The seminar concluded with Dr. Abu Karaki presenting honors to the speakers and opening a related exhibition.

**5.** Dr. Nathir Obeidat, President of the University of Jordan, highlighted the critical need for justice and equality during the closing conference of a project aimed at improving legal access for vulnerable groups in North Africa and the Middle East through university legal clinics. Organized by the University Agency of La Francophonie and supported by the French Ministry of Foreign Affairs, the project involved 21 universities from the region. Obeidat stressed the importance of training legal experts who understand human needs and uphold the rule of law, promoting justice for all. French Ambassador Alexis Le Cour Grandmaison and other officials emphasized the project’s role in enhancing legal skills for students and empowering marginalized communities. The initiative was praised for fostering partnerships that strengthen access to justice, and plans are underway to further develop and expand these legal clinics.

- The University of Jordan undertakes policy-focused research in collaboration with government departments, primarily through its Center for Strategic Studies (CSS). Established in 1984, the CSS conducts extensive research on regional and global issues such as geopolitics, security, defense, and foreign policy, as well as topics critical to societal wellbeing, including the rule of law, macroeconomics, health, education, religion, gender, and refugee concerns. The findings produced are valuable for Jordan and the broader MENA region, supporting decision-makers and intellectuals by providing strategic insights and scenario-based analyses on pressing issues.

CSS also produces various periodic reports, including the Arab Barometer, Gender Barometer, Religiosity Barometer, and the “Pulse of the Jordanian Street.” Its recent report, "Jordan's Path in 2021: Trends and Scenarios," is an example of its commitment to evidence-based policy guidance. Recognized as MENA’s top Center for Excellence by the Global Go to Think Tank Index, CSS’s work influences policy discussions nationally and internationally. The center collaborates with government departments by using scientifically rigorous methodologies in its research, thereby supporting evidence-based policy interventions.

Furthermore, the university’s International Affairs Unit (IAU) supports these initiatives by managing international collaborations, academic exchanges, and grants, enhancing the university's global research presence and enabling student and faculty participation in policy-relevant international projects. The IAU also launched the International Students Network (ISN) to support international students and facilitate engagement in EU-supported missions, further enriching the University of Jordan's policy-focused research and international cooperation.

- The University of Jordan provides a neutral platform and "safe" space for diverse political stakeholders to engage in open dialogue. The Center for Strategic Studies (CSS) at the university frequently organizes dialogue sessions that invite diplomats, political experts, and academics to discuss regional and international political issues openly. For example, the CSS recently hosted a dialogue session with the U.S. Ambassador to Jordan, Henry Wooster, where university students discussed American foreign policy and Jordan-U.S. relations in a balanced, respectful environment.

Moreover, CSS offers additional opportunities for political discourse through its Public Policy Forum, fostering constructive discussions on pressing issues relevant to Jordan and the region. With a commitment to impartiality, CSS also engages with topics affecting global geopolitics, frequently covering news from around the world on its website.

On April 25, 2024, the University of Jordan's Center for Strategic Studies (CSS) and the EU Delegation in Jordan held the "Road to Schuman" conference, focusing on defense, maritime security, and cross-border crime. A key topic was the impact of Russia's invasion of Ukraine on EU security strategies, with discussions on strengthening alliances to address rising security threats

Academics And Politicians: Jordan Is Waging A Relief, Diplomatic And Media War In Support Of The Palestinian Cause

# 16 PEACE, JUSTICE AND STRONG INSTITUTIONS

## Challenges and Areas of Improvements

**The University of Jordan** can play a pivotal role in advancing SDG 16 (Peace, Justice, and Strong Institutions) by transforming its campus into a vibrant hub of social justice, ethical leadership, and active citizenship. To begin, the university could launch an "Integrity and Ethics Lab," where students and faculty collaboratively engage in real-world problem-solving for issues like corruption, human rights violations, and social inequities. This could involve developing innovative, student-led projects focused on strengthening rule of law and transparency within local communities. To further instill ethical leadership, the university could offer immersive programs where students participate in mock international courts, peace-building simulations, and restorative justice practices, gaining hands-on experience in conflict resolution and diplomacy. The campus could host a "Voices for Change" series, bringing together thought leaders, activists, and marginalized voices to foster open dialogue on human rights, equality, and justice. Additionally, a "Justice in Action" initiative could invite students to partner with local NGOs, government bodies, and global organizations to contribute to policy reform, legal support, and social advocacy projects. By establishing accessible, transparent communication channels between students, staff, and leadership, the university would ensure inclusive governance and decision-making. Encouraging digital literacy and cybersecurity awareness through creative workshops could further promote the protection of digital rights, while student-led campaigns against all forms of discrimination would ensure an inclusive campus environment. By integrating these dynamic strategies, the University of Jordan can inspire a new generation of leaders who actively advocate for peace, justice, and strong institutions, both within and beyond the university walls.

**SDG 17: Partnerships for the Goals** focuses on global collaboration to achieve sustainable development through partnerships across nations, sectors, and organizations. This goal emphasizes resource sharing, technology access, data improvement, and trade that benefits all. By fostering inclusive partnerships at every level, SDG 17 aims to address challenges like poverty, inequality, and climate change, propelling the UN's Sustainable Development Agenda forward.

### **University of Jordan's Role in Advancing SDG 17**

The University of Jordan (UJ) supports SDG 17 by contributing to policy development, forming partnerships, and engaging in international research. UJ's Center for Strategic Studies has helped shape national health policies through projects like the STEPwise Survey on noncommunicable diseases, collaborating with WHO and USAID. Additionally, UJ participates in SDG dialogues and international projects, such as the EU-funded FOCUS initiative on refugee integration and contributes to data collection through collaborations like the Arab Barometer.

- **University of Jordan (UJ) has direct involvement in national government and regional non-government organizations' SDG policy development. For instance:**

## HelpAge International's Health Assessment for Older Adults in Jordan

HelpAge International, in collaboration with the Center for Strategic Studies at the University of Jordan, launched a health assessment report focusing on the health needs of older adults in Jordan, both Jordanian and Syrian. The study highlighted critical issues such as access to healthcare, chronic illnesses, mental health, and disabilities. The findings stressed the need for policies that promote the well-being of older people in Jordan and called for continued efforts to protect their rights.

In Jordan, the study was implemented to inform partners at the governmental and humanitarian levels about the most prominent health challenges facing this marginalized group. The study, which was conducted through face-to-face interviews with older men and women during the month of August 2020, revealed those axes: access to health services, mental health, nutrition, disability, activities of daily living, and perceptions on public health.

## Strategic Report on Jordan's Regional Geostrategic Position

The Center for Strategic Studies at the University of Jordan unveiled its first-ever strategic report, offering insights into global geopolitical shifts and their implications for Jordan. The report addresses key issues such as security concerns in the Middle East, political reform, and Jordan's strategic positioning within the region, with particular emphasis on its relationship with Israeli occupation and the ongoing Palestinian issue.

مركز الدراسات الاستراتيجية  
الاستراتيجية

Today, the Center for Strategic Studies at the University of Jordan launched its first strategic report on the state of Jordan and the region, in Arabic and English, via virtual reality. The report, which is 28 pages long, covers a number of areas at the regional and international levels.

The Director of the Center, Dr. Zaid Ayadat, said in his speech that this report is the first of its kind issued by the Center since its establishment in 1984.

Ayadat added that the report addresses geostrategic transformations and changes at the global level, examines their causes, trends and paths, and predicts their repercussions and effects on the region and the area, noting that it was prepared before the events and developments taking place in occupied Palestine.

The brief report aims to help intellectuals and decision-makers develop a broad and comprehensive understanding of the factors driving regional and international politics. It is divided into three sections, the first of which, "A World Shrouded in Ambiguity," addresses the level of stability the world is currently experiencing in light of the confusion caused by the pandemic crisis, and the extent to which it is possible to predict the changes that will occur in it.

The second section addresses the security future of the Middle East region, and revolves around global alliances as a geostrategic necessity that accompanies the rise and rise of global powers, identifying three characteristics that affect the features of the region: "political personalization," "regional hegemony," and "the proliferation of nuclear weapons." It did not neglect the Palestinian issue, which is still present with its fundamental and structural impact on the stability of the region.

The third section addressed Jordan's geostrategic situation, pointing to four influential issues: Jordanian-Israeli relations and the power disparity between them, the issue of identity and political reform, and finally Jordan's strategic position in the region and the world and the regional factors and powers influencing its political decisions and choices.

## UNRWA Delegation Visits University of Jordan's Documentation Center

A delegation from UNRWA visited the University of Jordan's Documentation and Manuscripts Center to explore potential cooperation in preserving documents related to Palestinian refugees. The center holds millions of historical records, including legal documents vital for proving the rights of Palestinian refugees. The visit emphasized the importance of safeguarding these materials, and both parties discussed collaboration to ensure their protection for future generations.

## University of Jordan's Role in National and Regional SDG Policy Development

The University of Jordan is actively involved in national government and regional non-government organizations' SDG policy development. For example, UJ's Center for Strategic Studies collaborates with the Ministry of Health and the WHO on national surveys like the STEPwise survey on non-communicable diseases (NCDs). The results help shape public health policy, particularly around conditions like cardiovascular diseases and diabetes, aligning with SDG targets.

## UJ's Involvement in Regional Projects and Environmental Research

UJ is also involved in regional initiatives, such as the FOCUS project, which focuses on refugee integration and social cohesion. Additionally, the university contributes to environmental research, including agricultural water management studies in Jordan that utilize remote sensing techniques. These efforts influence national policies on sustainable water use and are aligned with SDG 6 (Clean Water and Sanitation), contributing to resource management strategies.

### FOCUS: A research project on integration

#### How to live well together

**FOCUS final video**  
"When we want to, we can cope!"

FOCUS is an EU funded research project running from January 2019 to June 2022, led by the IFRC Reference Centre for Psychosocial Support hosted by the Danish Red Cross with partners from nine countries (Austria, Belgium, Croatia, Denmark France, Germany, Ireland, Jordan and the United Kingdom).

FOCUS aims at deepening the understanding of critical dimensions of integration. The project takes stock of the decade passed since the arrival of more than 1 million refugees and migrants from Syria and other countries (UNHCR 2018), with a special emphasis on psychological and social factors, and makes this knowledge accessible in an efficient and useful way.

## Remote Sensing for Agricultural Water Management in Jordan

A study by UJ researchers used remote sensing to improve agricultural water management (AWM) in Jordan. The research mapped irrigated areas and irrigation water consumption (IWC) from 2017-2019 using Landsat 8 and Sentinel-2 data. The findings highlighted that 98,000 hectares were irrigated in 2019, with significant water use from groundwater. The study emphasized the role of remote sensing in identifying areas of illegal groundwater abstraction and forecasting future IWC, recommending the approach for sustainable water management in Jordan.

- **The University of Jordan (UJ) actively initiates and participates in cross-sectoral dialogues related to SDGs, particularly in collaboration with government bodies and NGOs.**

**A prime example is:** The symposium held by the UJ's Center for Strategic Studies in November 2019, where His Excellency Dr. Azmi Mahafzah, Chairman of the Supreme Council of the National Center for Curriculum Development, discussed curriculum development in Jordan. The event fostered a dialogue between educational policymakers and experts, aligning educational reforms with national development goals.

NOVEMBER 11

UJ’s Center for Strategic Studies hosted a discussion seminar in collaboration with the National Center for Curriculum Development on the development of the General Secondary Certificate Examination. The session brought together a diverse group of experts, policymakers, and academics, including prominent figures like Dr. Adnan Badran and Dr. Omar Al-Razzaz, to evaluate and improve Jordan's educational assessment system, with discussions on how to better align these exams with educational and SDG goals.

## Discussion seminar on developing the General Secondary Certificate Examination

The U.S.-Jordan University Cooperation Network (UCN) conference held at UJ also illustrates the university's commitment to cross-sectoral dialogues. The conference focused on sustainable development through academic collaboration, with discussions covering critical issues like climate change, public health, and sustainable energy. This event emphasized the importance of global partnerships to address SDGs, involving U.S. and Jordanian universities in addressing shared challenges.

The University of Jordan further contributes to cross-sectoral dialogue through events like the International Conference and Forum on Business and Digital Economy. These conferences gather experts from various sectors, including business, technology, and sustainable development, to explore the intersection of digital transformation and SDGs. Topics such as energy, climate change, and public health are integral parts of the discussions, reinforcing the university's role in shaping policy dialogues that contribute to SDG achievement.

Arab Barometer is a nonpartisan research network that provides insight into the social, political, and economic attitudes and values of ordinary citizens across the Arab world

arabbarometer.org/about/

## About Arab Barometer

Arab Barometer is a nonpartisan research network that provides insight into the social, political, and economic attitudes and values of ordinary citizens across the Arab world. We have been conducting high quality and reliable public opinion surveys in the Middle East and North Africa since 2006. We are the longest-standing and the largest repository of publicly available data on the views of men and women in the MENA region. Our findings give a voice to the needs and concerns of Arab publics.

Funded Projects

DAAD Projects

Developing Jordanian Universities' Innovation Capacities and Entrepreneurship Education (JUICEE)

- **The University of Jordan (UJ)** collaborates internationally to develop best practices for the SDGs across various fields. UJ's Erasmus+ and DAAD-funded projects, such as "JUICEE" for entrepreneurship education and "Enhancing ICT Competencies of Early Childhood Educators," support SDGs on quality education (SDG 4) and economic growth (SDG 8).

Environmental and energy-focused projects, like "Boosting Solar Energy Technologies" and "DESIRE," align with SDG 7 and SDG 13, bringing EU insights into Jordanian education for climate action. Additionally, UJ's "EDU4ALL" initiative promotes inclusive education for students with disabilities, supporting SDG 10 on reduced inequalities.

In food security, projects like "Agro Technology VET Centres" and "CCSAFS" integrate EU practices to address sustainable agriculture (SDG 2). Through these partnerships, UJ incorporates global insights into local programs to address key SDGs.

Christina Kositaal, head of the IMF mission in the Middle East, praised Jordan's efforts to combat terrorism and maintain regional stability, during a lecture at the University of Jordan's College of Business. She emphasized the IMF's continued support for Jordan's economic reforms, aimed at enhancing stability and growth, and highlighted the resilience of Jordan's economy despite regional challenges. The lecture also covered the IMF's role in guiding countries through financial reforms and emphasized the importance of structural changes, particularly in job creation and fair taxation. Dean Dr. Zubi Al-Zoubi highlighted the educational value of such dialogues for students.

The University Of Jordan Library And UNESCO Office In Jordan Discuss Scientific And Cultural Cooperation

A delegation from the Turkish Ministry of Interior and the International Organization for Migration (IOM) visited the University of Jordan to discuss academic programs related to conflict studies, forced migration, and refugees. The delegation, consisting of 15 officials, met with university representatives, including Dr. Hadeel Yassin and Dr. Hassan Al-Momani, to explore cooperation opportunities and support for refugee students. The university highlighted its academic programs and scholarships for refugees, while the delegation shared insights on asylum and immigration issues in Turkey. The meeting emphasized the importance of regional and international collaboration on refugee-related challenges.

Jordan University News (AJ News) Suha Al-Subaihi - As part of an official visit to the Kingdom, a delegation from the Turkish Ministry of Interior and the International Organization for Migration in Turkey visited the University of Jordan today, Monday, with the aim of learning about the university's expertise and programs in academic fields related to conflict studies, forced migration and refugees.

The delegation, consisting of 15 officials, experts and specialists from the Immigration Department of the Turkish Ministry of Interior and the International Organization for Migration, discussed with the Director of the International Affairs Unit at the University, Dr. Hadeel Yassin, and the Professor of International Relations and Conflict Resolution at the Prince Hussein bin Abdullah II School of International Studies, Dr. Hassan Al-Momani, a number of topics of common interest, such as academic support programs for refugees and refugee studies programs at the University, in addition to international cooperation programs in this field.

On June 20, 2022, WIPO and Jordan's Ministry of Industry, Trade, and Supply celebrated the completion of a national project that helped 11 Jordanian academic institutions develop institutional intellectual property (IP) policies. These institutions include the University of Jordan and several others. The two-year project, which ran from 2020 to 2022, aimed to improve IP management in universities and research institutions, and resulted in the formal adoption of IP policies in most institutions. The initiative also created a national IP policy model and contributed to the establishment of a national network for technology transfer, promoting innovation and commercialization of academic IP.

wipo.int/ar/web/technology-transfer/w/news/2022/news\_0007

## Eleven academic institutions develop institutional IP policies as a result of a national project launched by WIPO in Jordan

June 27, 2022

On June 20, 2022, WIPO, in collaboration with the Industrial Property Protection Directorate of the Ministry of Industry, Trade and Supply in Jordan, celebrated the completion of the national project on institutional intellectual property policies for universities and research institutions, which culminated in the development of eleven institutional intellectual property policies in the following academic institutions

- University of Jordan
- Jordan University of Science and Technology
- Hashemite University
- Mu'tah University
- Balqa Applied University
- German Jordanian University
- Al-Zaytoonah University of Jordan
- Petra University
- Al Hussein Technical University
- Private University of Applied Sciences
- American University of Madaba

WIPO launched and developed this project as a two-year national project with specific objectives and deliverables. It was implemented from August 2020 to June 2022, based on [the WIPO IP Policy Toolkit](#)

As a direct result of the project, the institutional IP policies developed by all participating beneficiary institutions

Dr. Hanan Saadeh, a professor at the University of Jordan's Department of Physics, participated in the International X-ray Spectroscopy Conference (EXRS 2024) held in Athens, Greece, in June. She presented research on detecting iron concentrations and identifying iron compounds in Amman's aerosols using X-ray techniques (PIXE and XANES). The conference, attended by over 300 participants from 30+ countries, featured 123 research papers and focused on advancements in X-ray spectroscopy. Dr. Saadeh received grants from the International Atomic Energy Agency and the conference organizers to attend.

Dr. Hanan Saadeh From The University Of Jordan Participates In An International Scientific Conference In Greece

Dr. Abeer Al-Bawab, Dean of Scientific Research at the University of Jordan, participated in a workshop organized by the Organization for the Prohibition of Chemical Weapons (OPCW) in the Netherlands. The workshop focused on ethical standards in chemistry practice in accordance with the Chemical Weapons Convention. It included representatives from universities, scientific associations, and the chemical industry to review draft practices developed in a previous workshop. The two-day event was the first step toward creating a document on ethical guidelines for chemical work in line with international agreements.

NewsBrief University of Jordan News (UJ News) - Dean of Scientific Research at the University of Jordan, Dr. Abeer Al-Bawab, recently participated in the workshop "Ethical Controls in the Practice of Chemistry According to the Standards of the Chemical Weapons Convention," which was held by the Organization for the Prohibition of Chemical Weapons (OPCW) in the Netherlands.

**The University of Jordan** offers a Professional Diploma Program in Export Management and International Marketing to meet local market needs for skilled leaders in import and export sectors, essential to the national economy. The program, supported by the WTO Chair Programme, has been offered for three years. The university's WTO Chair recognizes academic excellence and provides financial support for research and teaching, promoting involvement in global trade issues.

Additionally, the Center of Competence in "Money, Trade, Finance, and Development", established in 2009, focuses on economic research in macroeconomics and international economics, collaborating with partner universities in emerging economies. The center aims to obtain research grants and foster applied academic research.

The university also participates in the Tempus Project (RUCAS), aimed at reorienting curricula to address sustainability.

**Welcome**

The University of Jordan (UJ) was awarded the WTO Chair programme along with other thirteen Universities in a highly competitive process. This award is an acknowledgement of the competence and commitment of the UJ 's academics. It is also an encouragement to researchers and students to take an interest in WTO and multilateral trade matters, a cornerstone of international global governance.

The WTO will provide financial support to UJ, amounting to CHF 50,000 annually, for a period of four years to facilitate continuous interaction between the University and other think-tanks around the world. It aims at supporting UJ and associated individual scholars in course preparation, teaching, and research and outreach activities. This programme is part of the technical assistance and training programme that the WTO delivers, with a view to enhancing the quality and level of participation of developing countries in the multilateral trading system.

# 17 PARTNERSHIPS FOR THE GOALS

## Challenges and Areas of Improvements

**The University of Jordan** seeks to effectively support SDG 17 (Partnerships for the Goals), by focusing on building global research collaborations through a "Global Solutions Hub" that connects students and faculty with international experts to tackle global challenges. Strengthening partnerships with industry leaders for innovation and entrepreneurship, particularly in sectors like renewable energy and technology, would allow the university to bridge academia with real-world applications. Additionally, establishing a "Policy Lab" to collaborate with local and international policymakers could amplify the university's voice in advocating for evidence-based, sustainable policies. Expanding cross-cultural exchange programs and capacity-building initiatives would empower students with a global perspective while strengthening the university's international presence. The university can also leverage its alumni network by creating an SDG-focused community to contribute to global projects. Developing a digital collaboration platform would further enable global students and educators to share knowledge and work together on SDG-related projects. Hosting multi-stakeholder conferences on SDG progress and leveraging the Aqaba branch for regional partnerships in marine conservation and sustainable tourism would further enhance the university's commitment to fostering cross-sector partnerships. These initiatives would position the University of Jordan as a hub for global cooperation, driving meaningful change and advancing the 2030 Agenda for Sustainable Development.

# Conclusion:

The University of Jordan aligns closely with the United Nations Sustainable Development Goals (SDGs) through various impactful initiatives. Its Innovation and Entrepreneurship Center (SDG 9) fosters local innovation and economic growth, while inclusive sports facilities and cultural exchange programs promote equality (SDG 10). The university's commitment to sustainability is evident in its CLIMASP program and green campus initiatives (SDG 11), alongside efforts in ethical food sourcing and responsible research (SDG 12).

It also emphasizes climate resilience through disaster preparedness plans and academic programs on disaster management (SDG 13). Environmental research in marine conservation (SDG 14) and forest preservation initiatives (SDG 15) further highlight its environmental leadership. Additionally, the student union's democratic structure ensures representation and strong governance (SDG 16), while the university's global collaborations and academic freedom support academic excellence and partnerships (SDG 17). Through these efforts, the university plays a pivotal role in advancing sustainable development locally and globally.

The University of Jordan remains committed to continuously adhering to the United Nations Sustainable Development Goals (SDGs), with an ongoing focus on elevating its practices to new heights. As it moves forward, the university aims to foster an environment of continuous growth and improvement that benefits not only its students but also the wider community and the Kingdom of Jordan. By integrating sustainable practices into its operations, research, and outreach efforts, the University of Jordan will continue to be a driving force for positive change, ensuring its educational and social contributions align with the evolving needs of society. With each step, the university will strive to enhance its impact, empowering future generations and supporting the nation's long-term sustainability and development.
